Readings in Exceptionality and Pedagogy M. Virginia Epps, Pearson Custom Publishing, Paula K. Neville, Diane E. Ormsby, 1997-09 **Exceptionality: Selected Readings** Gabriel A. Nardi, Peter J. Belch, Anne H. Nardi, 1972 *Readings Exceptionality and Pedagogy* Pearson Custom Publishing, 2000-01-01 *Encyclopedia of Diversity in Education* James A. Banks, 2012-05-17

The diversity education literature both nationally and internationally is broad and diffuse. Consequently there needs to be a systematic and logical way to organize and present the state of research for students and professionals. American citizens need to understand the dynamics of their increasingly diverse communities and institutions and the global world in which we live, work and lead. With continually evolving information on diversity policies, practices and programs, it is important to have one place where students, scholars, teachers and policymakers can examine and explore research, policy and practice issues and find answers to important questions about how diversity in U.S. education is enriched with theories, research and practices in other nations, are explained and communicated, and how they affect institutional change at both the K-12 and postsecondary levels. With about 700 signed entries with cross references and recommended readings, the *Encyclopedia of Diversity in Education* (4 volumes in both print and electronic formats) will present research and statistics, case studies and best practices, policies and programs at pre and postsecondary levels. Diversity is a worldwide phenomenon and while most of the entries in the *Encyclopedia* will focus on the United States, diversity issues and developments in nations around the world, including the United States, are intricately connected. Consequently, to illuminate the many aspects of diversity, this volume will contain entries from different nations in the world in order to illuminate the myriad aspects of diversity. From A to Z, this *Encyclopedia* will cover the full spectrum of diversity issues, including race, class, gender, religion, language, exceptionality and the global dimensions of diversity as they relate to education. This four-volume reference work will be the definitive reference for diversity issues in education in the United States and the world. *Universal Design 2014: Three Days of Creativity and Diversity* H.A. Caltenco, P.-O. Hedvall, A. Larsson, 2014-05-30

Creating Contexts for Learning and Self-authorship Marcia B. Baxter Magolda,1999 This book is intended to help college faculty create conditions in which students learn to construct knowledge in their disciplines and achieve self authorship A significant and often overlooked dimension mediating learning and self authorship centers on learners ways of knowing or their assumptions about the nature limits and certainty of knowledge A learner who assumes that all knowledge is certain expects to hear answers from an authority figure in contrast a learner who views knowledge as relative expects to explore multiple viewpoints By taking a constructive developmental approach the author demonstrates how students ability to construct knowledge is intertwined with the development of their assumptions
