Readings In Sociobiology:

Readings in sociobiology, 1981 *Readings in Sociobiology* James Traniello, 2001-01-01 *Selected Readings in Sociobiology* James H. Hunt, 1980 **Handbook of Global Social Policy** Stuart Nagel, 2019-09-16 Discussing how to use public policy to improve the quality of life for those at the bottom of the social hierarchy this text makes the case for policy that expands employment and facilitates jobs finances education and economic and cultural integration rewards merit and encourages voting and political participation Political scientists from around the world measure the effect of democratization religion ethnicity race and mass media on internal conflict during the initial post Cold War period in Africa Asia Europe and Latin and North America Some topics include the role of mass communication on Egyptian family planning Russian nationalism and the Guatemalan peace process Biology, Medicine and Society 1840-1940 Charles Webster, Lyndal Roper, 2003-02-13 This volume originates from a Past and Present conference on The Roots of Sociobiology held in 1978 and incorporates the results of recent research on problems in the social relations of the biological sciences The authors describe different historical aspects of the interrelationship of technical experience and social policy in the fields of health education and social welfare *Behavior Genetics* John L. Fuller, Edward C. Simmel, 2021-09-30 Originally published in 1983 this volume is a collection of papers by research workers active at the time It includes reviews of special areas within the field and discussions of interactions with other behavioral sciences such as psychology ethology and sociobiology Applications to medicine psychiatry and education are also considered Contributors were encouraged to integrate history present knowledge and projections for the future Although the book is not divided into sections there is some grouping of related chapters

Biopolitics and Gender Meredith W Watts Jr, 2012-12-06 Here is an important book for social scientists interested in the influence of gender on certain types of behavior Several perspectives are presented on the general topic of biopolitics and gender including the points of view of brain science endocrinology ethology psychophysiology and such conventional interests as political attitudes socialization participation social structure and political hierarchy The varied and provocative ideas explored in this volume will broaden discussions of gender beyond an exclusive focus on sex links to oppression and discrimination **Good and Evil** Edward Farley, What does it mean to be human in a world filled with tragedy With creativity and insight Edward Farley one of today's most respected theologians here addresses this universal and haunting question of evil Farley anchors his discussion firmly in interhuman I thou dynamics as a key to unfolding the personal and social spheres of human existence It is says Farley the corruption of elemental passions and the resulting contagion of the personal and social spheres that provide a total view of human evil and its redemptive possibilities *Illness and Power* Brant Wenegrat, 1996-09 Since ancient times physicians have believed that women are especially vulnerable to certain mental illnesses Contemporary research confirms that women are indeed more susceptible than men to anxiety depression multiple personality and eating disorders and several forms of what used to be called hysteria Why are these disorders more

prevalent in women Brant Wenegrat convincingly asserts that women's excess risk stems from a lack of social power He reviews women's social power from an evolutionary and cross cultural perspective and places mental disorders in the context of evolution and societal organization In this comprehensive look at mental disorders commonly associated with women Brant Wenegrat convincingly asserts that women's excess risk stems from a lack of social power **The Corsini Encyclopedia of Psychology and Behavioral Science, Volume 4** W. Edward Craighead, Charles B. Nemeroff, 2002-11-11 A complete reference to the fields of psychology and behavioral science Volume 4 is the final volume in The Corsini Encyclopedia of Psychology and Behavioral Science series Providing psychologists teachers researchers and students with complete reference for over 1 200 topics across four volumes this resource is invaluable for both clinical and research settings Coverage includes conditions assessments scales diagnoses treatments and more including biographies on psychologists of note and psychological organizations from across the globe The Third Edition has been updated to reflect the growing impact of neuroscience and biomedical research providing a highly relevant reference for the highest standard of care Readings in Contemporary Sociological Theory Donald McQuarrie, R. Serge Denisoff, 1995 This accessible guide to the maze of modern sociological theory features a collection of 39 essays written by prominent American and European theorists representing the last fifty years of sociological work **The Sociobiology Debate** Arthur L. Caplan, 1978 **Communication Yearbook 4** Dan Nimmo, 1980-01-01 **Biology as Society, Society as Biology: Metaphors** Sabine Maasen, E. Mendelsohn, P. Weingart, 2013-12-01 not lie in the conceptual distinctions but in the perceived functions of metaphors and whether in the concrete case they are judged positive or negative The ongoing debates reflect these concerns quite clearly namely that metaphors are judged on the basis of supposed dangers they pose and opportunities they offer These are the criteria of evaluation that are obviously dependent on the context in which the transfer of meaning occurs Our fundamental concern is indeed the transfer itself its prospects and its limits Looking at possible functions of metaphors is one approach to understanding and elucidating sentiments about them The papers in this volume illustrate by quite different examples three basic functions of metaphors illustrative heuristic and constitutive These functions represent different degrees of transfer of meaning Metaphors are illustrative when they are used primarily as a literary device to increase the power of conviction of an argument for example Although the difference between the illustrative and the heuristic function of metaphors is not great it does exist metaphors are used for heuristic purposes whenever differences of meaning are employed to open new perspectives and to gain new insights In the case of constitutive metaphors they function to actually replace previous meanings by new ones Sabine Maasen in her paper introduces the distinction between transfer and transformation Human Origins Camilla Power, Morna Finnegan, Hilary Callan, 2016-12-01 Human Origins brings together new thinking by social anthropologists and other scholars on the evolution of human culture and society No other discipline has more relevant expertise to consider the emergence of humans as the symbolic species Yet social anthropologists have been conspicuously

absent from debates about the origins of modern humans These contributions explore why that is and how social anthropology can shed light on early kinship and economic relations gender politics ritual cosmology ethnobiology medicine and the evolution of language

Meat Planet Benjamin Aldes Wurgaft, 2020-10-13 In 2013 a Dutch scientist unveiled the world's first laboratory created hamburger Since then the idea of producing meat not from live animals but from carefully cultured tissues has spread like wildfire through the media Meanwhile cultured meat researchers race against population growth and climate change in an effort to make sustainable protein Meat Planet explores the quest to generate meat in the lab a substance sometimes called cultured meat and asks what it means to imagine that this is the future of food Neither an advocate nor a critic of cultured meat Benjamin Aldes Wurgaft spent five years researching the phenomenon In Meat Planet he reveals how debates about lab grown meat reach beyond debates about food examining the links between appetite growth and capitalism Could satiating the growing appetite for meat actually lead to our undoing Are we simply using one technology to undo the damage caused by another Like all problems in our food system the meat problem is not merely a problem of production It is intrinsically social and political and it demands that we examine questions of justice and desirable modes of living in a shared and finite world Benjamin Wurgaft tells a story that could utterly transform the way we think of animals the way we relate to farmland the way we use water and the way we think about population and our fragile ecosystem's capacity to sustain life He argues that even if cultured meat does not succeed it functions much like science fiction as a crucial mirror that we can hold up to our contemporary fleshy dysfunctions

Brill's Companion to the Philosophy of Biology Andrea Borghini, Elena Casetta, 2019-12-16 In this volume Andrea Borghini and Elena Casetta introduce a wide spectrum of key philosophical problems related to life sciences in a neat framework and an accessible style with a special emphasis on metaphysical issues The volume is divided into three parts The first addresses the two main questions stemming from life sciences what is life and what is the correct understanding of the theory of evolution The second part looks at metaphysical questions concerning biological entities environments species organisms and biological individuals The third part focuses on theoretical questions of particular ethical and political significance sex and gender the biotechnological revolution and the evolution of behavior and culture Each chapter is followed by a list of further readings

Readings for A History of Anthropological Theory Paul A. Erickson, Liam Donat Murphy, 2010-01-01 This comprehensive anthology presents 40 readings that are critical to an understanding of anthropological theory and the development of anthropology as an academic discipline The readings have broad anthropological appeal emphasizing social and cultural anthropology The third edition has been completely revised throughout and organized to work more closely alongside the companion overview text *A History of Anthropological Theory* It includes six new readings as well as two original essays written by contemporary anthropologists on Why Theory Matters These new essays help ground the more abstract readings in the collection The glossary has been significantly expanded and the discussion questions have been revised The result is a volume that offers

not only a strong foundation in the history of the discipline but also a good overview of developments in twentieth and twenty first century anthropological theory including feminist anthropology postmodernity medical anthropology globalization postcolonialism and public anthropology

Companion to Science in the Twentieth Century John Krige, Dominique Pestre, 2003 This work on science in the 20th century represents work in America Europe and Asia It includes such topics as the countries that have made the most significant contributions the relationship between science and industry and the importance of instrumentation

Companion Encyclopedia of Science in the Twentieth Century John Krige, Dominique Pestre, 2013-11-05 With over forty chapters written by leading scholars this comprehensive volume represents the best work in America Europe and Asia Geographical diversity of the authors is reflected in the different perspectives devoted to the subject and all major disciplinary developments are covered There are also sections concerning the countries that have made the most significant contributions the relationship between science and industry the importance of instrumentation and the cultural influence of scientific modes of thought Students and professionals will come to appreciate how and why science has developed as with any other human activity it is subject to the dynamics of society and politics

Adopting the Track of Phrase: An Psychological Symphony within **Readings In Sociobiology**

In a global eaten by monitors and the ceaseless chatter of instant transmission, the melodic elegance and psychological symphony developed by the prepared word often fade in to the backdrop, eclipsed by the relentless noise and disturbances that permeate our lives. Nevertheless, situated within the pages of **Readings In Sociobiology** an enchanting fictional value filled with natural feelings, lies an immersive symphony waiting to be embraced. Crafted by a wonderful composer of language, this interesting masterpiece conducts readers on an emotional journey, skillfully unraveling the hidden songs and profound affect resonating within each cautiously constructed phrase. Within the depths with this poignant analysis, we shall investigate the book is central harmonies, analyze its enthralling writing model, and surrender ourselves to the profound resonance that echoes in the depths of readers souls.
