READINGS ON PRODUCTIVITY IN POLICING, 1975 *Police Educational Characteristics and Curricula* Larry T. Hoover, 1975 The monograph consists of an examination of the rationale for higher police educational standards a report of research relevant to the impact of upgrading efforts a critique of current educational programming and the explication of a model criminal justice curriculum appropriate for both police and other criminal justice system personnel Three distinct but related rationales are developed relevant to educational upgrading The rationales involve police ability to control crime perform their order maintenance function and properly exercise discretion The research reported includes an assessment of current police recruit educational levels patterns of employment of collegiate recruits the impact of the Law Enforcement Education Program police cadet programs and agency reward programs the influence of agency characteristics in attracting and retaining collegiate recruits and the impact of the development of educational programs in law enforcement and criminal justice An examination of present educational programming postulates several major deficiencies A model curriculum is proposed which provides a broad theoretical orientation to the entire criminal justice process The model consists of guidelines for twenty criminal justice courses Each guideline includes both selected related readings and a content outline

The National Manpower Survey of the Criminal Justice System National Institute of Law Enforcement and Criminal Justice, National Planning Association, 1978 *Forensic Evidence and the Police* Joseph L. Peterson, 1984 **Improving the Use of Quality Circles in Police Departments** Harry P. Hatry, 1986 This report examines the practical issues that police departments face when considering the adoption design and implementation of quality circle programs in which small groups of employees primarily nonmanagement personnel from the same work unit meet regularly to identify analyze and recommend solutions to problems confronting their work unit This book reports on a 2 year 1983 and 1984 study of quality circles that involved a relevant literature review a mail survey of police departments telephone interviews with department personnel responsible for quality circles a review of materials and onsite field work The study resulted in indications of the likely outcomes of police quality circles and information about specific ways to better apply quality circles and similar employee participation programs in police departments The study concludes that the use of quality circles in police departments has the potential to achieve a number of small scale service improvements in work units that use them The effective use of quality circles however requires modest expenditures for training overtime pay and other activities of quality circles There is no evidence to date that quality circles produce any major improvements in service delivery or productivity The circles have typically focused on improving working conditions and the resolution of relatively minor narrowly focused operating problems Absent continuing maintenance of the circles and the identification of issues that impact employees work quality circles tend to deteriorate after a year or two The long term survival of quality circles depends on voluntary participation a motivated facilitator who is given time to devote to the circle s operation and explicit support and recognition

from upper management Detailed recommendations are offered for the development and maintenance of quality circles so they can fulfill their potential for improving work unit operations and employee morale 24 notes and 101 references

 Researcher for COREPOL EU FP7 *Psychology and Policing* Neil Brewer, Carlene Wilson, 2013-06-17 Psychological theory
 and research have much to contribute to the knowledge and skill bases underlying effective policing Much of the relevant
 information however is dispersed across a variety of different psychological and criminal justice policing journals and seldom
 integrated for those applied psychologists interested in policing issues or for police policymakers administrators and others
 working in the criminal justice area who are not familiar with the psychological literature Designed to accommodate the
 needs of these different groups this book addresses both operational policing issues and issues relevant to the improvement
 of organizational functioning by providing integrative reviews of psychological theory and research that deal with effective
 policing It illustrates how the theory and research reviewed are relevant to specific policing practices These include
 eyewitness testimony conflict resolution changing driver behavior controlling criminal behavior effective interviewing and
 techniques of face reconstruction The volume's readable style makes it accessible to a diverse audience including
 undergraduate and postgraduate students in forensic organizational applied psychology criminal justice and police science
 programs and police administrators and policymakers It will also interest psychologists whose primary focus includes
 policing and criminal justice issues The book should draw attention to the often unrecognized and valuable contribution that
 mainstream psychology can make to the knowledge base underpinning a wide variety of policing practices **Police**
