

Business Communication

What is Communication?

The word communication comes from a Latin word 'communicare' which means to 'share' or 'participate'.

Communication is the process by which we exchange meanings, facts, ideas, opinions or emotions with other people. It is the art of exchanging opinions, thoughts, facts and ideas in an emphatic manner so that the person at the other end receives and understands the subject matter involved clearly and perceives it in the same way it was intended by the sender.

According to Peter Little, "Communication is the process by which information is transmitted between individuals and/or organizations, so that it results in an understanding response."

Business Communication has become an absolute requirement for all organizations for various reasons, such as:

- * It acts as the basis of organizational growth in terms of human and public relations
- * It widens the outlook of people making them understand the business scenario from a broader perspective
- * Business Communication enhances the overall relationship maintenance capabilities of the organization
- * It empowers the organization to handle public relations in an effective manner
- * It increases personal productivity and confidence of all in the organization by multi-fold levels

Current Issues in Reading, Writing and Visual Literacy Helene Christina

Demirci, Christina Gitsaki, Melanie Taylor Gobert, 2015-10-28 This volume brings together a collection of papers presented at the 2014 World Congress of the International Association of Applied Linguistics (AILA) held in Brisbane, Australia, and represents current research and practice from across the globe related to reading, writing, and visual literacy. Given that globalisation has resulted in an increase in the pursuit of second language, often English, literacy for those who want to enhance their access to better education and employment options, the development of literacy skills cannot be left to chance. This book explores current efforts to tease out the variables involved in the development of literacies and will inform educators and teacher trainers of ways to improve classroom pedagogies and increase learner literacy competencies. The volume will be of use to both new and seasoned researchers wishing to enhance their understanding of current and emerging perspectives in the development of literacies. It will also be of interest to language teachers and language policy makers as the papers address current issues in language education.
