Philosophy of Religion

Arguments for and against the existence of God.

1. God can't be all good and all-powerful
2. We can explain everything we want to explain by repelling God (we don't need certain things in explaining the existence of God)

Is God needed in order for good and bad to exist?

- God is the standard of what's good, and why those reasonings are deemed as good.
- People are known to disagree about the systems/ explanations of what is good or bad.

No Good Reason - Exploring the Problem with Evil (Louise Antony pgs. 36-45)

Claims about God according to those who believe in God (Judaism, Christianity, and Islam)

- a. God is omnipotent
- b. God is omniscient
- c. God is perfectly good

The Argument against the View of God and Why it Constitutes That There is No "Real God"

- The issue, according to Antony is *suffering*
- Reasoning: we have suffered in the world and because we suffer God is not all-powerful
why do we have these sufferings?
- Because there is suffering, there is no God that is morally sufficient since there are instances of evil that occur

- ★ The Overall Objective of this Argument is: Antony is trying to argue that in the end, the atheists are right: the problem of suffering constitutes a strong enough argument against theism in order to justify atheism.

"How can all of this be squared with the supposition that an all-powerful being set things up with the well-being of His creatures in mind?" - Louise Antony

Theism: a term used to denote the view that God, so conceived, exists.

With that, theists are those who believe that God has complete dominion over the world in which we live; most believe he is the one who created it.

Atheists: are those who deny the existence of God

medieval ontology against the background of the current metaphysical debate on the nature of material objects Volume Two makes available to scholars one of the culminating points in the medieval reception of Aristotle's metaphysical thought by presenting the first critical edition of Book VII of Paul of Venice's Commentary on Aristotle's Metaphysics 1420-1424

Intellectual Traditions at the Medieval University (2 vol. set) Russell Friedman, 2012-10-12 This book traces the rise and decline of two rival intellectual traditions in later medieval trinitarian theology one of them predominantly Franciscan the other predominantly Dominican Disagreeing about the way to understand the identification in John's Gospel of the second person of the Trinity the Son with the Word the two traditions clashed over the issues of concepts and concept formation the category of relation counterfactual logic and the use of authority Considering more than seventy theologians from the period the book presents an overview of the debate while also including detailed studies of the trinitarian views of such thinkers as Thomas Aquinas Henry of Ghent John Duns Scotus Peter Auriol William Ockham Walter Chatton and Gregory of Rimini Who's who in America, 1924 Medical Books and Serials in Print, 1984 *Ancient Readings of Plato's Phaedo*, 2015-09-17 Plato's Phaedo has never failed to attract the attention of philosophers and scholars Yet the history of its reception in Antiquity has been little studied The present volume therefore proposes to examine not only the Platonic exegetical tradition surrounding this dialogue which culminates in the commentaries of Damascius and Olympiodorus but also its place in the reflections of the rival Peripatetic Stoic and Sceptical schools This volume thus aims to shed light on the surviving commentaries and their sources as well as on less familiar aspects of the history of the Phaedo's ancient reception By doing so it may help to clarify what ancient interpreters of Plato can and cannot offer their contemporary counterparts *The Academy*, 1901 **Medical and Health Care Books and Serials in Print**, 1987

Books in Print, 1991 *Paperbound Books in Print*, 1991 **Philosophy and Computing** Thomas M. Powers, 2017-10-26 This book features papers from CEPE IACAP 2015 a joint international conference focused on the philosophy of computing Inside readers will discover essays that explore current issues in epistemology philosophy of mind logic and philosophy of science from the lens of computation Coverage also examines applied issues related to ethical social and political interest The contributors first explore how computation has changed philosophical inquiry Computers are now capable of joining humans in exploring foundational issues Thus we can ponder machine generated explanation thought agency and other quite fascinating concepts The papers are also concerned with normative aspects of the computer and information technology revolution They examine technology specific analyses of key challenges from Big Data to autonomous robots to expert systems for infrastructure control and financial services The virtue of a collection that ranges over philosophical questions such as this one does lies in the prospects for a more integrated understanding of issues These are early days in the partnership between philosophy and information technology Philosophers and researchers are still sorting out many foundational issues They will need to deploy all of the tools of philosophy to establish this foundation This volume

admirably showcases those tools in the hands of some excellent scholars The Moral Psychology of Shame Alessandra
 Fussi, Raffaele Rodogno, 2023-02-01 Few emotions have divided opinion as deeply as shame Some scholars have argued that
 shame is essentially a maladaptive emotion used to oppress minorities and reinforce stigmas and traumas an emotion that
 leaves the self at the mercy of powerful others Other scholars however have argued that the absence of a sense of shame in a
 subject their shamelessness is tantamount to a vicious moral insensitivity As the eleven original chapters in this collection
 attest however shame scholars are entering a new phase one in which scholarship no longer attempts to defend one side of
 shame against the other but rather accepts both faces as faithful to the phenomenon to be explained At the core of our
 understanding of shame there are profound disagreements about the importance of the Other in shaping our moral identity
 As this collection shows by its study of shame the difficulty of the connection between Self Other and morality spans over
 millennia and cultures and currently animates important debates at the core of feminism and disability studies Contributors
