Just Responsibility Brooke A. Ackerly, 2018 It has been well established that many of the injustices that people around the world experience every day from food insecurity to unsafe labor conditions and natural disasters are the result of wide scale structural problems of politics and economics These are not merely random personal problems or consequences of bad luck or bad planning Confronted by this fact it is natural to ask what should or can we do to mitigate everyday injustices In one sense we answer this question when we buy the local homeless street newspaper decide where to buy our clothes remember our reusable bags when we shop donate to disaster relief or send letters to corporations about labor rights But given the global scale of injustices related to poverty environmental change gender and labor can these individual acts really impact the seemingly intractable global social political and economic structures that perpetuate and exacerbate them Moreover can we respond to injustices in the world in ways that do more than just address their consequences In this book Brooke A Ackerly both answers the question of what should we do and shows that it s the wrong question to ask To ask the right question we need to ground our normative theory of global justice in the lived experience of injustice Using a feminist critical methodology she argues that what to do about injustice is not just an ethical or moral question but a political question about assuming responsibility for injustice regardless of our causal responsibility and extent of our knowledge of the injustice Furthermore it is a matter that needs to be guided by principles of human rights As she argues while many understand human rights as political goals or entitlements they can also guide political strategy Her aims are twofold to present a theory of what it means to take responsibility for injustice and for ensuring human rights as well as to develop a guide for how to take responsibility in ways that support local and global movements for transformative politics In order to illustrate her theory and guide for action Ackerly draws on fieldwork on the Rana Plaza collapse in 2013 the food crisis of 2008 and strategies from 125 activist organizations working on women s and labor rights across 26 countries Just Responsibility integrates these ways of taking political responsibility into a rich theory of political community accountability and leadership in which taking responsibility for injustice itself transforms the fabric of political life

Responsibility

Barbara S. Stengel, 2023-11-16 Students parents teachers leaders and policy makers generate and take responsibility for their efforts often without understanding the nature of the responsibility they hold Barbara S Stengel argues that every educational interaction is a call to and opportunity for responsibility for all involved In short responsibility represents the goal for students the guiding vision for educators practice and a useful design principal for leaders and policy makers Using

a critical pragmatist framing of the concept of responsibility Stengel shows how greater attention to responsibility allows for a deeper understanding of diversity and equity as well as individual and common goods It enables a deeper understanding of the moral dimensions of teaching and learning prospectively in growth rather than retrospectively in blame The philosophical discussion of responsibility is coupled with discussion of the lived experiences of students teachers aides and administrators and draws evidence from a case study of a middle school turnaround in Nashville USA The Bailey Middle School community developed a reading of responsibility that matched educators intuitions and experiences of their work while enhancing students understanding of their place in the world The book represents a call for educators to be and become responsible for their and their students lives in common and the individual well being of all in the community Naval Investigation, Hearings Before the Subcommittee of the Committee on Naval Affairs, United States Senate, 66th Congress, 2d Session, 1921 United States. Husserl, Heidegger and the Crisis of Philosophical Responsibility R. Philip Buckley,1992 This volume sheds light upon the omnipresent discussion of crisis in our times by returning to the thought of the two philosophers upon which much of this talk is consciously or unconsciously based namely Edmund Husserl and Martin Heidegger By tracing the narrative of the crisis from Husserl s early treatment of arithmetic and logic through to Heidegger s meditations on the essence of technology the author not only proposes a unified reading of both Husserl s and Heidegger s work but points to important elements of the often underplayed continuity between these phenomenologists At the same time the concept of crisis also illustrates the difference between Husserl and Heidegger Though both define the crisis as one of forgetting and both view this forgetting as a matter of philosophical responsibility essential divergence emerges in their interpretation of this phenomenon Three questions uncover these points of convergence and divergence First does not the forgetfulness reveal itself as a type of *felix culpa* a necessary decay that now reveals itself in a positive light indeed as the precondition of history itself
