glimpse of him it s more than I can stand My husband is as nervous over it as I am but he is out at his work all day while I get no rest from it What is he hiding for What has he done Except for the girl I am all alone in the house with him and it s more than my nerves can stand Holmes leaned forward and laid his long thin fingers upon the woman s shoulder He had an almost hypnotic power of soothing when he wished The scared look faded from her eyes and her agitated features smoothed into their usual commonplace She sat down in the chair which he had indicated *Constitution, List of Meetings, Officers, Committees, Fellows and Members* American Association for the Advancement of Science,1850 **Proceedings of the American Association for the Advancement of Science** American Association for the Advancement of Science,1851

The Disc Embedding Theorem Stefan Behrens,Boldizsar Kalmar,Min Hoon Kim,Mark Powell,Arunima Ray,2021-07-15 Based on Fields medal winning work of Michael Freedman this book explores the disc embedding theorem for 4 dimensional manifolds This theorem underpins virtually all our understanding of topological 4 manifolds Most famously this includes the 4 dimensional Poincar conjecture in the topological category The Disc Embedding Theorem contains the first thorough and approachable exposition of Freedman s proof of the disc embedding theorem with many new details A self contained account of decomposition space theory a beautiful but outmoded branch of topology that produces non differentiable homeomorphisms between manifolds is provided as well as a stand alone interlude that explains the disc embedding theorem s key role in all known homeomorphism classifications of 4 manifolds via surgery theory and the s cobordism theorem Additionally the ramifications of the disc embedding theorem within the study of topological 4 manifolds for example Frank Quinn s development of fundamental tools like transversality are broadly described The book is written for mathematicians within the subfield of topology specifically interested in the study of 4 dimensional spaces and includes numerous professionally rendered figures

Uncreative Writing Kenneth Goldsmith,2011-08-16 Can techniques traditionally thought to be outside the scope of literature including word processing databasing identity ciphering and intensive programming inspire the reinvention of writing The Internet and the digital environment present writers with new challenges and opportunities to reconceive creativity authorship and their relationship to language Confronted with an unprecedented amount of texts and language writers have the opportunity to move beyond the creation of new texts and manage parse appropriate and reconstruct those that already exist In addition to explaining his concept of uncreative writing which is also the name of his popular course at the University of Pennsylvania Goldsmith reads the work of writers who have taken up this challenge Examining a wide range of texts and techniques including the use of Google searches to create poetry

the appropriation of courtroom testimony and the possibility of robo poetics Goldsmith joins this recent work to practices that date back to the early twentieth century Writers and artists such as Walter Benjamin Gertrude Stein James Joyce and Andy Warhol embodied an ethos in which the construction or conception of a text was just as important as the resultant text itself By extending this tradition into the digital realm uncreative writing offers new ways of thinking about identity and the making of meaning **Chicago Daily News Almanac and Political Register** ,1919 *Piaget and Knowing* Beryl.A.
