N. Sangmpam, 2012-02-01 Two competing approaches currently dominate the debate about the state and institutions in developing countries The first projects a picture of transnational vertical uniformity descending from the West to developing countries and views liberal democracy as the only game in town In this view the state and institutions resemble or ought to resemble those in the West The second by contrast explains political outcomes by local idiosyncrasies and regional variations in institutions In his original approach to third world politics S N Sangmpam challenges both views by uncovering important similarities in the political features of developing countries He shows that they share political behaviors and features unaccounted for in either local idiosyncratic or liberal democratic theories These behaviors converge toward a common property overpoliticization that defies political compromise leading to an overpoliticized state Sangmpam provides a wealth of empirical historical and quantitative evidence from Latin America Asia Africa and the West and demonstrates the overpoliticized state constitutes the cornerstone of an integrated theory of politics in developing countries      Political Parties and Party Systems Moshe Maor, 2005-08-10 This comprehensive textbook outlines and illuminates the main theories of political parties and party systems Applying these theoretical approaches to British party politics Moshe Maor covers all the key subjects of study including classification of party definitions party systems change party institutionalization cohesion and dissent intraparty conflicts and legislative bargaining multiparty electoral competition Maor's study highlights the importance of the intraparty arena and actors in understanding the shape and behaviour of political parties providing essential reading to students of party systems and of British politics      **Research Methods in Politics** Roger Pierce, 2008-04-09 Packed with features to promote learning this text is ideal for use on an introductory methods course or for readers carrying out their own research project It presents an overview of the philosophy and principles of research qualitative and quantitative research methods and research design a critical review of selected methods methods of gathering information such as interviews and focus groups and discusses issues associated with ensuring quality of information appropriate methods for analysing and interpreting data and covers the process of communicating research The inclusion of chapter objectives regular summaries questions for discussion and

Hiebert, 2017-03-16 This book addresses two closely related questions what is the process by which the relatively short and violent genocides of the twentieth century and beyond have occurred Why have these instances of mass violence been genocidal and not some other form of state violence repression or conflict Hiebert answers these questions by exploring the structures and processes that underpin the decision by political elites to commit genocide focusing on a sustained comparison of two cases the Nazi Final Solution and the Cambodian genocide The book clearly differentiates the structures and processes contained within a larger overall process that leads to genocidal violence Uncovering the mechanisms by which societies at least in the contemporary era come to experience genocide as a distinct form of destruction and not some other form of mass or political violence Hiebert is able to highlight a set of key process that lead to specifically genocidal violence Providing an insightful contribution to the burgeoning literature in this area this book will be of interest to students and scholars of genocide international relations and political violence

*The Economic Sources of Social Order Development in Post-socialist Eastern Europe* Richard Connolly, 2013 Nearly twenty years after the collapse of socialism the countries of post socialist Eastern Europe have experienced divergent trajectories of political development This book looks at why this is the case based on the assumption that societies or social orders can be distinguished by the extent to which competitive tendencies contained within them economic political social and cultural are resolved according to open rule based processes The book explores which economic conditions allow for increased levels of political competition and it tests the hypothesis that the nature of a country s ties with the international economy and the level of competition within a country s economic system will shape the trajectory of political competition within that society The book goes on to argue that after several decades of relative bloc autarky during the socialist period the ongoing process of reintegration with the international economy across the post socialist region has resulted in distinct patterns of structural

economic development and that that these patterns are of crucial importance in explaining the variation in social order type across the post socialist region By offering a more precise analysis of the causal mechanisms that link economic and political competition the book makes a useful contribution to research on the different patterns of political behaviour that have been observed across the post socialist region since the collapse of the socialist regimes
