Rethinking equality Chris Armstrong, 2013-07-19 Although formally equal relations between citizens are actually characterised by many and varied forms of inequality Do contemporary theories of equality provide an adequate response to the inequalities that afflict contemporary societies And what is the connection between theories of equality and the contemporary politics of citizenship Accessible and comprehensive Rethinking equality provides a clear critical and very up to date account of the most important contemporary egalitarian theories Unusually it also relates these theories to contemporary political practice assessing them in relation to the impact of neoliberalism on contemporary welfare states and the shift from social to active forms of citizenship As well as representing a significant intervention within academic debates on equality and citizenship this book represents essential reading for students of contemporary political theory

mainstream approach to the understanding of pain continues to be governed by the biomedical paradigm and the dualistic Cartesian ontology This Volume brings together essays of scholars of literature philosophy and history on the many enigmatic shades of pain experience mostly from an anti Cartesian perspective of cultural ontology by scholars of literature philosophy and history A section of the essays is devoted to the socio political dimensions of pain in the Indian context The book offers a critical perspective on the reductive conceptions of pain and argue that non substance ontology or cultural ontology supports a more humane and authentic understanding of pain The general ontological features of the self in pain and culturally imbued dimensions of pain experience are thus brought together in a rare blend in this Volume The essays dwell on the importance of understanding what cultural social and political forces outside our control do to our pain experience They show why such understanding is necessary both to humanely deal with pain and to rectify erroneous approaches to pain experience They also explore the thoroughly ambivalent spaces between pain and pleasure and the cathartic and productive dimensions of pain The essays in this Volume investigate pain experiences through the fresh lenses of history gender ethics politics death illness self loss torture shame dispossession and denial

Rewriting Democracy Elizabeth Deeds Ermarth, 2017-05-15 Illuminating and comprehensive this excellent volume addresses the problematic relationship between democratic institutions and the current critique of enlightenment and modernity Since at least the beginning of the twentieth century and across the range of practice from science to politics to art various cultural shifts have unsettled assumptions that have been fundamental to the development of democratic institutions assumptions concerning individual identity the nature of political systems and the viability of egalitarian ideals Can democracy survive these changes to the value systems upon which it has been based for over two centuries This study does not focus on the often repeated particulars of past or current events such as 9 11 or the genocide in Darfur but instead examines the terms and conditions under which it would be possible to prevent such events in the future

Bottlenecks Joseph Fishkin, 2014-01-10 Equal opportunity is a powerful idea and one with extremely broad appeal in contemporary politics political theory and law But what does it mean On close examination the most attractive existing conceptions of equal opportunity turn out to be impossible to achieve in practice or even in theory As long as families are free to raise their children differently no two people's opportunities will be equal nor is it possible to disentangle someone's abilities or talents from her background advantages and disadvantages Moreover given different abilities and disabilities different people need different opportunities confounding most ways of imagining what counts as equal This book proposes an entirely new way of thinking about the project of equal opportunity Instead of focusing on the chimera of literal equalization we ought to work to broaden the range of opportunities open to people at every stage in life We can achieve this in part by loosening the bottlenecks that constrain access to opportunities the narrow places through which people must pass in order to pursue many life paths that open out on the other side A bottleneck might be a test like the SAT a credential requirement like a college degree or a skill like speaking English It might be membership in a favored caste or racial group Bottlenecks are part of the opportunity structure of every society But their severity varies By loosening them we can build a more open and pluralistic opportunity structure in which people have more of a chance throughout their lives to pursue paths they choose for themselves rather than those dictated by limited opportunities This book develops this idea and other elements of opportunity pluralism then applies this approach to several contemporary egalitarian policy problems class and access to education workplace flexibility and work family conflict and antidiscrimination law

Protecting Human Rights and Building Peace in Post-Violence Societies Nasia Hadjigeorgiou, 2020-02-20 This book critically examines the relationship between protecting human rights and building peace in post violence societies It explores the conditions that must be present and strategies that should be adopted for the former to contribute to the latter The author argues that human rights can aid peacebuilding efforts by helping victims of past violence to articulate their grievance and by encouraging the state to respond to and provide them with a meaningful remedy This usually happens either through a process of adjudication whereby human rights can offer guidance to the judiciary as to the best way to address such grievances or through the passing and implementation of human rights laws and policies that seek to promote peace However this positive relationship between human rights and peace is both qualified and context specific Through an interdisciplinary and comparative analysis of four case studies the book identifies the conditions that can support the effective use of human rights as peacebuilding tools Developing these the book recommends a series of strategies that peacebuilders should adopt and rely on Winner of the Constantinos Emilianides Award in Law for 2020 joint conferment

The American and British Debate Over Equality, 1776-1920 James L. Huston, 2017-10-16 Historians have long contested the degree to which the central tenet of the Declaration of Independence that all men are created equal has manifested itself in American society and national policy According to James L Huston many historians have focused too

intently on class differences slavery and inequalities arising from ethnicity sexuality and gender while overlooking important areas where notions of equality flourished during the century and a half after the Declaration's signing In *The American and British Debate Over Equality 1776-1920* Huston examines the egalitarian communities in rural northern America particularly those enclaves that differed from the openly aristocratic cities and towns of the British Isles In the aftermath of the American Revolution British and American writers alike recognized that a growing philosophical rift divided the two nations whereas Great Britain continued to embrace the inequality of its hierarchical class system the United States professed allegiance to democratic ideals of equality limited though these were by racial and gender norms of the day Huston argues that the two countries engaged in an intellectual debate during the next century and a half over which ideal equality or inequality worked best in promoting social stability political hegemony and economic success Exploring the effects of equality and inequality on many aspects of American life he examines civil behavior social customs treatment of others politics education religion economic opportunity and general public optimism Drawing from decades of publications by American and British writers Huston reveals the rhetorical strategies contemporary observers employed in defending or rejecting the organization of a society around broader notions of human equality *The American and British Debate Over Equality 1776-1920* informs the modern debate over equality and inequality not by theorizing and philosophizing but by offering a glimpse into the practical applications of a functioning egalitarian society as compared to one that extolled monarchy and institutionalized inequality
