Redesigning The Communist Economy:

Redesigning the Communist Economy Paul M. Johnson, 1989 A comprehensive survey of economic reform in Eastern Europe with special reference to the 1960s and 1970s *The European Economy 1914-2000* Derek Aldcroft, 2002-01-10 As in earlier editions of this work Professor Aldcroft presents a succinct and lucid account of the development and problems of the European economy throughout the twentieth century The text divides into several clearly defined sub periods the aftermath of the First World War and reconstruction in the 1920s the depression and recovery of the 1930s the impact of the Second World War and the new division of Europe the postwar boom of the 1950s and 1960s the growth slowdown of the 1970s and the pervasive problems of inflation and unemployment **The European Economy Since 1914** Derek Howard Aldcroft, Steven Morewood, 2013 The European Economy Since 1914 provides an invaluable guide to the major economic changes in both Western and Eastern Europe during the twentieth century **The European Economy Since 1914** Derek Aldcroft, Steven Morewood, 2012-12-07 The fifth edition of *The European Economy* provides a succinct and lucid account of the development and problems of the European economy since the first world war It covers the whole of Europe including Russia and Turkey The text divides into several clearly defined sub periods the impact and aftermath of the first world war and recovery and reconstruction during the 1920s the depression and the recovery of the 1930s the impact of the second world war and the new political division in Europe the post war boom of the 1950s and 1960s and then into the growth slowdown of the 1970s and the persistent problems of inflation and unemployment It then analyses the demise of the centrally planned economies of eastern Europe and the move to a more united Europe and then discusses the financial and economic problems that have emerged in the early twenty first century This new edition has been extensively revised new chapters have been added and the reading lists updated Though the volume is designed as a basic introductory text the authors elicit some of the lessons that can be learnt from a study of past development one of which is the limited power of governments to influence the course of events and to combat the operation of market forces *Redesigning Defense* DIANE Publishing Company, 1994-04 The European Economy 1914-1990 Derek Aldcroft, George Penelis, 1993-05-27 This new edition of *The European Economy 1914 1980* has been up dated and revised to take account of the decade 1980 90 and as such covers some of the most dramatic and profound economic events of the twentieth century *The European Economy 1914 1990* includes two additional chapters one dealing with the Western European economies and in particular **Reshaping Economic Geography in East Asia** Yukon Huang, Alessandro Magnoli Bocchi, 2008-10-15 This companion volume to the *World Development Report 2009* comprises twenty papers authored by noted Asian scholars These studies highlight how throughout East Asia spatial considerations have influenced Government policies at the national regional and local levels Key themes include how countries have dealt with 1 agglomeration economies urbanization and regional disparities 2 improving connectivity with infrastructure investments and 3 eliminating barriers across and within countries to favor the movement of

labor goods and services Achievements vary widely across countries while some succeeded in enhancing competitiveness and improving social outcomes others are experiencing increasing inequalities and failures to spur growth in disadvantaged areas The book highlights many examples of how the new economic geography is reshaping development objectives from initiatives to foster growth via enhanced agglomeration and improved local connectivity to the world economy to special decentralization programs that channel resources to lagging regions This volume will be of great interest to readers working in the areas of economic policy poverty reduction and urban rural development strategies and transport led infrastructure policy

The Neoliberal Revolution in Eastern Europe Paul Dragos Aligica, Anthony John Evans, 2009-01-01 Very few studies have ventured to explore the shift in economic ideas that were such a critical factor in shaping and understanding the East European transition process Paul Dragos Aligica and Anthony J Evans have seized upon the potential that this crucial case has to illuminate the larger phenomenon of diffusion and adoption of economic ideas Two different but related research agendas are developed the study of the spread of neoliberalism as seen from the perspective of Eastern European post communist evolutions and the study of Eastern European transition as seen from an ideas centered perspective Combining a distinctive synthesis of the existing data about the spread of neoliberal economic ideas in Central and Eastern Europe with an analysis of the processes at work the authors challenge a series of misunderstandings and myths about the spread of neoliberal economic ideas The disputed topics include the myth of an Eastern European rush to embrace the theories and ideas that may be considered the mark of market fundamentalism the notion that a harsh neoliberal dogmatism was somehow imposed on the region from outside the idea that the standardization and regimentation of economic thinking was a result of the spread of the Western way of doing economics and the belief that the Eastern Europeans passively embraced this uniformity and standardization due to pressure from the Westerners This unusual synthesis will appeal to scholars in economics political science communist post communist studies and new institutionalism as well as policymakers

Economic Transformations in East and Central Europe David F. Good, 1994-09-22 This book provides an invaluable guide to understanding the current problems of this volatile region demonstrating that the area's economic history over the last century has vital legacies for its economic future

Nation, State and the Economy in History Alice Teichova, Herbert Matis, 2003-05-08 Originally published in 2003 this book addresses the rarely explored subject of the reciprocal relationships between nationalism nation and state building and economic change Analysis of the economic element in the building of nations and states cannot be confined to Europe and therefore these diverse yet interlinked case studies cover all continents Authors come to contrasting conclusions some regarding the economic factor as central while others show that nation states came into being before the constitution of a national market The essays leave no doubt that the nation state is an historical phenomenon and as such is liable to expiry both through the process of globalisation and through the development of a cyber society which evades state control By

contrast developments in southeastern Europe the former USSR and parts of Africa and the Far East show that building the nation state has not run its course The Czech And Slovak Republics Carol Leff,2018-02-15 This clear objective introduction to the politics of Czechoslovakia and the successor Czech and Slovak Republics provides a comprehensive analysis of Czechoslovakia in the postcommunist period Carol Leff builds a framework for understanding the dynamics of the triple transition democratization marketization and a national transformation that has reconfigured the dynamic between state and nation She shows how the interaction of these three transformational agendas has shaped Czechoslovakia s development ultimately culminating in the paradoxical disintegration of a state that most of its citizens wished to preserve The book offers a valuable case study of a country coming back to Europe but it also provides an opportunity for analyzing the influence of communism on what had been a significant interwar European state The book s strong comparative element will make it invaluable as well for those seeking to understand contemporary Central and Eastern Europe **Reshaping Poland's Community after Communism** Helena Chmielewska-Szlajfer,2018-06-14 Harnessing a cultural sociological approach to explore transformations in key social spheres in post 1989 Poland Chmielewska Szlajfer illuminates shifts in religiosity sympathy towards others and civic activity in post Communist Poland in the light of Western influence over elements of Polish life Reshaping Poland s Community after Communism focuses on three major cases largely ignored in Polish scholarship 1 a hugely popular faux baroque Catholic shrine which illustrates new strategies adopted by the Polish Catholic Church to attract believers 2 Woodstock Station a widely known free charity music festival demonstrating new practices of sympathy towards strangers and 3 the emergence of national internet pro voting campaigns and small town watchdog websites which uncover changes in practical uses of civic engagement In exploring grass roots everyday negotiations of religiosity charity and civic engagement in contemporary Poland Chmielewska Szlajfer demonstrates how a country s cultural changes can suggest wider dramatic democratic transformation *The Political Economy of Asian Transition from Communism* Sujian Guo,2017-11-28 A comparative study of the political economy of the transition from communism in East and Southeast Asian countries China North Korea Vietnam Laos and Cambodia addressing the key theoretical questions generated from the debate between shock therapists and gradualists While accurately defining the pre reform model this book explores the causal variables that have contributed to reform efforts within Asia examining the significance of the sequencing of political and economic transition and the interplay between politics and the economy in determining variations in transition outcomes Comparing the real world experiences of transition nations in communist Asia with Eastern Europe prominent questions are brought to the fore will market capitalism or market socialism prevail after the grand failure of communism This book makes an important contribution to the political economy theory of comparative communist and post communist studies and provides detailed analytical insights that will prove influential in future theoretical work **The Reshaping of the National Labor Relations Board** James A. Gross,1982-06-30 In this volume

covering the years 1937-1947 James A. Gross describes and analyzes the NLRB's vigorous and uncompromising enforcement of the Wagner Act and the intense political pressure to which the Board was subjected as a consequence. He identifies and examines the forces that succeeded in pressuring the NLRB out of its essential role in the making of U.S. labor policy. This is the story of the transformation of the NLRB from an expert administrative agency that played a major role in the making of labor policy into an insecure politically sensitive agency preoccupied with its own survival and reduced to deciding marginal issues.

Strategic Triangles Reshaping International Relations in East Asia Gilbert Rozman, 2022-06-09 Rozman shows how East Asia's international relations over three decades can be best understood through the lens of triangles analyzing relations between the key nations through a series of trilateral relationships. He argues that triangles present a convincing answer to the question of whether we had entered a new era of bipolarity like the Cold War or an age of multipolarity. Triangulation emerged as a dynamic in East Asia in the aftermath of the Cold War and was accelerated in the course of the Xi and Trump administrations. Even as Sino-US competition and confrontation deepened, triangles had a substantial presence. East Asian triangles share an unusual mixture of three distinct elements: deep-seated security distrust, extraordinary economic interdependence, and a combustible composition of historical resentments and civilizational confidence. The combination of the three makes the case for triangularity more compelling. Rozman argues. The legacy of communism, the pursuit of reunification on the Korean Peninsula, and moves to expand beyond the US-Japan alliance have all driven the way triangles have evolved. Only as bipolarity intensified in the 2020s was triangularity losing ground. The degree of turnabout is analyzed for all of the cases considered. Rozman evaluates each key triangle of states in turn and assesses how the relationship impacts the region more widely. This book provides an essential framework for understanding the current state and trajectory of East Asian international relations for students and policymakers. Reshaping the European Union Klaus Weber, Henning Ottmann, 2018-01-29 Das Buch schlägt eine tiefgreifende Reform der EU vor. Defekte der EU werden identifiziert. Die Vorschläge basieren auf den Konzepten begrenzter Supranationalität und einer ausgewogenen Sicht des Nationalstaats. Die EU wird vor allem gebraucht für Frieden, Wohlstand, Kompensation der relativ geringen Größe und begrenzten Macht ihrer Mitgliedstaaten und zur Bewahrung grundlegender Prinzipien der westlichen Zivilisation. Eine ausgewogene Sicht des Nationalstaats bedeutet Erhaltung der Vorteile des gut gestalteten Nationalstaats im Vergleich zur

EU sowie Vermeidung von Nationalismus und Krieg Das Buch schlägt u a eine Neugestaltung der EU Rechtsetzung und der EU Verträge eine untergeordnete Rolle der Europäischen Kommission einen Court of Appeal und eine geänderte Zusammensetzung der Europäischen Zentralbank vor Möglichkeiten des Überlebens der Eurozone werden diskutiert Bei praktischer Realisierung dieser Vorschläge könnte sich die EU zukünftig in einem besseren Zustand befinden *Ecology, Capitalism and the New Agricultural Economy* Gilles Allaire, Benoit Daviron, 2018-11-14 With increasing pressure on resources the looming spectre of climate change and growing anxiety among eaters ecology and food are at the heart of the political debates surrounding agriculture and diet This unique contribution unravels agricultural environmental issues at different spatial levels from local to global documenting the major shifts in agriculture from a long term perspective The book begins by exploring the changes in the industrialisation and socialisation of agriculture over time through the lens of institutional economics including The French Regulation School and Conventions Theory Building on Polanyi's Great Transformation the chapters in this volume analyse long term and contemporary changes in agriculture and food systems that have occurred throughout the last few centuries Key chapters focus on the historical changes in provisioning and the social relations of production consumption and regulation of food in different socio political contexts The future of agriculture is addressed through an analysis of controversial contemporary political claims and their engagement with strategies that aim to improve the sustainability of agriculture and food consumption To shed light on ongoing changes and the future of food this book asks important environmental and social questions and analyses how industrial agriculture has played out in various contexts It is recommended supplementary reading for postgraduates and researchers in agricultural studies food studies food policy the agricultural food political economy and political and economic geography
