Reducing inequalities in health, 1988

Health in the European Union Philipa Mladovsky, 2009 Good health is a fundamental resource for social and economic prosperity and Europe has seen improvements over the past few decades in both health status and living and working conditions But this study investigates differences in health status within and between European countries and examines some of the challenges faced by those seeking a healthier and more equitable society Within the context of the European Union the range of living conditions has widened tremendously in recent years as the Union has gone through an enlargement process This diversity has translated into varied patterns of health across the region Inequalities in income education housing and employment have directly or indirectly affected public health In addition certain diseases and causes of death are more likely to affect young people whereas most are associated with older ages All these factors need to be taken into account and this study addresses some of the complexities involved This book discusses and analyzes the relationship between living conditions socioeconomic factors and health with the objective of framing a debate and policy action to create a healthier and fairer society across Europe This study will stimulate focused discussion by offering an essential overview of key issues affecting European nations and the health and well being of their peoples

Handbook of Social Problems George Ritzer, 2004 Ritzer's Handbook of Social Problems offers a comprehensive treatment of today's major societal issues The articles are authored by some of the top scholars in the field and address problem areas that will capture the interests of students and professors alike The international coverage is most welcome in this time of intensifying global inequalities Nancy Jurik Arizona State University The Handbook of Social Problems A Comparative International Perspective provides a unique broadly comparative perspective on the current state of social problems and deviance in a variety of societies around the world Editor George Ritzer along with leading U S and international sociologists examines the relationship between social problems and a society's level of development and affluence The essays in this volume focus on four interrelated issues involved in the relationship between social problems and the level of development and affluence Less developed and less affluent societies are more likely to experience a range of social problems than developed and affluent societies Affluence causes or at least brings with it a series of social problems that do not exist in less affluent societies It is only with affluence that certain things can come to be imagined as social problems such as excessive consumption The very affluence of a society makes it vulnerable to problems that would not be

social problems in poorer societies The Handbook explores the theory of the weakness of the strong in other words strong or wealthy nations may have greater vulnerability to some social problems than less developed or affluent societies This theory is clearly illustrated in this volume by the aftermath of September 11 2001 depicting the vulnerability of the U S to social problems in far removed corners of the world In addition the international and comparative essays in this volume cover other important issues such as the impact of modern technologies on social problems ecological problems global inequality health as a social problem and much more The Handbook of Social Problems is a vital resource for sociologists and graduate students as well as an excellent addition to any academic library

Health Impact Assessment John Kemm, Jayne

Parry, Stephen Palmer, 2004-04-01 Health effects are often overlooked when planning development projects ranging from new runways at major airport sites to developing water supply systems to improve sanitation Health Impact Assessment HIA is the assessment of the health effects positive or negative of a project programme or policy It is therefore concerned with the health of populations and attempts to predict the future consequences for health of decisions which have not yet been implemented HIA is a new and growing field with numerous schools of thought and areas of controversy This book is the first to give a comprehensive overview of the concepts theory techniques and applications of HIA to aid all those preparing projects or carrying out assessments It draws on examples and thinking from many different disciplines and many parts of the world It identifies the areas of agreement and the questions remaining unanswered It maps a confused field and signposts possible directions for future progress HIA is intended to help decision makers in all areas foresee the consequences of their decisions to ensure the consequences are considered and reduce the risk of population health being damaged through some indirect and unintended consequence of a decision This book is a practical handbook for those preparing the assessments be they epidemiologists environmentalists health economists or public health specialists as well as serving as a conceptual guide for policy makers decision makers and planners at national and international level This book will serve both as a reference for the established HIA practitioner and as an introduction for the novice

approach the contributors to this edited collection critically analyze the structural inequalities embedded in our society and the socio economic factors that affect health including income education employment housing food security gender and race This new edition includes recent statistics new developments in early childhood education and the implementation of Canada s national childcare system and new content on the social determinants of Indigenous Peoples health Particular attention is paid to how economic globalization and the acceptance of neoliberal governing ideology is shaping the health of Canadians The COVID 19 epidemic vividly illustrated the importance of the social determinants of health as sickness and death rates were strikingly higher among Canadians in groups already experiencing adverse living and working conditions and poorer health lower income Canadians recent immigrants of colour and those experiencing housing and food insecurity If anything positive is to come out of this experience it will be recognition that in the current post COVID 19 environment it is essential to understand the socio economic conditions that shape the health of individuals and communities Social Determinants of Health Fourth Edition is aimed at courses focusing on the social determinants of health at Canadian universities and colleges particularly those in health studies and nursing but also allied health sociology and human services

Action on Poverty Today Issue 14 (Autumn 2006) , Health Action Zones Marian Barnes,Linda Bauld,Michaela Benzeval,Mhairi Mackenzie,Helen Sullivan,Ken Judge,2012-09-10 Health Action Zones HAZ were one of the earliest and most prominent area based initiatives launched by the New Labour government in England soon after it came to power in 1997 Written by members of the team undertaking the national evaluation of HAZ this book examines the initiative s development and impact from a variety of perspectives It outlines important features of the social policy and evaluative environment within which HAZ were established and discusses enduring themes such as building and developing capacity with diverse and unequal partners within complex policy systems Multidisciplinary in nature the book provides in depth analysis of a key policy initiative offering guidance on how best to design implement and evaluate future initiatives intended to deal with fundamental social problems

Trends in EU Health Care Systems Winfried de Gooijer,2007-03-20 For decades the nations of the European Union wrote the book on universal health coverage Recent economic developments however have created problems ranging from widening inequities of care to growing numbers of uninsured a progression expertly described by Win de Gooijer in Trends in EU Health Care Systems De Gooijer s dual background as an economist and the CEO of Dutch health care corporations together with his broad international experience give him a unique understanding of his subject He traces world economic currents that have affected quality of and access to health care throughout the EU trends that took years to develop but are coming to rapid fruition Comparative illustrations from Europe and the US show national interests at odds with global ones as governments transfer social responsibilities to market driven agencies Included in his discussion Expansion versus reform a forty year analysis of Europe s health care systems Why governments cannot completely control the always evolving dynamics of health care Ethical and medical issues arising from the continent s changing politics

Predictions on future directions in EU health care how much change is possible how much is necessary Some may find De Gooijer's ideas startling and the book is bound to be the subject of controversy But it is critical reading for health care managers and policymakers politicians and insurers advanced students of public health in short anyone looking to Europe for the next phase of this far reaching evolution This book is a very important contribution to the debate about the future direction of health policy in Europe It captures the economic and social trends that underpin health systems with a keen and objective eye and poses some very challenging questions about the future It will not be a comfortable read for politicians but it is a book that must be read Brian Edwards President of the European Hospital and Health Care Federation HOPE The concept of subsidiarity is prohibitive to a sound discussion of health care systems on a European level Economic principles dominate the debate and their consequences for health care are hardly understood The author bridges the gap between economic and health care developments and wrote a book that is essential reading for policy makers and health care managers who really care Rob Koning Past President of the European Health Management Association EHMA The future development of European health policy should not be an exclusively political affair Hospital managers should also be actively involved particularly as regards the design and organization of present and future European hospitals For this purpose this book is a useful and well founded manual It not only clarifies the dangers but also points to the challenges and possible alternative policy options Therefore this book should be in the boardroom of each and every European hospital Willy Heuschen Secretary General of the European Association of Hospital Managers EAHM Win de Gooijer brings immense clarity to a complex issue In this book he draws major and new conclusions and raises many challenging questions We hope this book will draw the attention it deserves Gerard Vincent President International Hospital Federation
