**Reducing Intergroup Bias** Marika J. Lamoreaux, 2008 Sherif 1958 hypothesized that competition between groups increases intergroup bias cooperation decreases bias and that cooperation's beneficial effects will be maximized when groups work together toward superordinate goals i.e. goals which cannot be achieved without both group's contributions The purpose of this dissertation is to test whether bias decreases when intergroup cooperation improves the probability of goal achievement i.e. is instrumental and increases bias when intergroup cooperation reduces the probability of goal achievement i.e. is dysfunctional Three studies investigated and supported this hypothesis The first study used real world data from groups with a pre-existing history of conflict The first study used Catholic and Protestant university students in Northern Ireland and assessed their perceptions of the instrumentality of intergroup relations and their feelings of warmth and forgiveness toward the religious outgroup The second study established causality as well as distinguished instrumentality from the mutual intergroup differentiation model in a laboratory context To establish causality the second study directly manipulated perceptions of instrumentality by explaining to participants that because of their respectively different thinking styles it would be instrumental or dysfunctional to work with another group In a control condition no information was offered about instrumentality To distinguish instrumentality from the mutual intergroup differentiation model which emphasizes the importance that groups maintain distinctive identities during interactions the second study also manipulated participants' abilities to differentiate the in from the out group Although bias was lowest under instrumental conditions bias actually increased when the groups were more clearly differentiated from each other during the cooperative interaction The third study established factors that influence instrumentality and distinguished instrumentality from reinforcement To assess factors that influence instrumentality the third study manipulated the relative skill of the ingroup high or low and how the two groups' contributions would be combined adding or averaging When the intergroup performance was calculated by adding all participants' scores working together was instrumental for each group However when the performance was calculated by averaging each person's contribution to derive the intergroup score cooperation was dysfunctional they would have preferred to work separately for the highly skilled group as they could achieve a higher score working alone The results revealed that intergroup bias was lower when cooperation was instrumental than when it was dysfunctional To distinguish instrumentality from a reinforcement perspective I assessed how much the instrumental conditions produced positive affect which was assumed to be a proxy for reinforcement and then assessed whether instrumentality had unique effects on bias controlling for reinforcement Although there was no main effect of instrumentality on positive affect instrumentality no longer related to intergroup bias when positive affect was statistically controlled However when controlling for positive affect there is a reliable negative relationship between perceived instrumentality and

bias Therefore whether the effects of instrumentality on intergroup bias are completely independent of reinforcement is equivocal at this time      Reducing Intergroup Bias: The Moderating Role of Ingroup Identification Richard J. Crisp, Sarah R. Beck, 2005 Abstract Recent work developing interventions designed to reduce intergroup bias has sometimes yielded disparate findings We tested whether the varying effectiveness of such interventions may have a motivational basis In two experiments we examined whether differential ingroup identification moderated the effectiveness of a differentiation reducing intervention strategy In Experiment 1 thinking of characteristics shared between the ingroup and outgroup reduced ingroup favoritism to a greater extent for lower identifiers than for higher identifiers In Experiment 2 we replicated this finding with different target groups and evaluative measures while controlling for information load We discuss the implications of this work for developing social psychological models of bias reduction      **Handbook of Psychology: Personality and social psychology** Irving B. Weiner, Donald K. Forgas, 2013-12-19 This provocative book provides the first

comprehensive and informative overview of the role of various subjective experiences in social cognition and behavior and argues that the study of such experiences may be one of the key unifying themes of social psychology. Based on recent theoretical and empirical developments in the discipline, this select group of leading international researchers surveys extensive evidence and shows that subjective experiences play a key role in most aspects of social cognition and social behavior. The book contains five main sections discussing the role of subjective experiences in social information processing: Part 1 their influence on memory; Part 2 and their role in intergroup contexts; Part 3 The role of affective experiences in social thinking and behavior is analyzed; Part 4 and the influence of subjective experiences on the development and change of attitudes and stereotypes is also addressed; Part 5 International Handbook of Organizational Teamwork and Cooperative Working Michael A. West, Dean Tjosvold, Ken G. Smith, 2008-05-27. In today's fast-changing, hyper-competitive environment, teamwork and cooperative working enhance the organization's adaptive capability. The team, rather than the individual, is increasingly seen as the building block of organizations and a key source of competitive advantage. The International Handbook of Organisational Teamwork and Cooperative Working provides a clear focus on the psychological and social processes that can stimulate successful cooperation and teamwork. Michael West, Dean Tjosvold, and Ken Smith have brought together the world's leading authorities from a range of social science disciplines to provide a contemporary review of established and emerging perspectives. Throughout the book, processes that both facilitate and obstruct successful cooperation and teamwork are detailed alongside guidance on best practice and methodology. The challenging and alternative perspectives presented will inform future research and practice. The result is a systematic and comprehensive synthesis of knowledge from a range of disciplines that will prove invaluable to professionals, researchers, and students alike. A systematic and coherent framework which organizes and structures the knowledge in this field. An outstanding collection of authoritative, high-profile authors. Challenging alternative perspectives that will stimulate and enlighten future research and practice. Selective, updated bibliographies of key literatures support every chapter, a valuable resource for students, trainers, and practitioners.

**Advanced Social Psychology** Eli J. Finkel, Roy F. Baumeister, 2019-03-15. Social psychology uses clever, even ingenious, research methods to explore the most essential questions of the human psyche: Why do we help some people and harm others? Why do we pay so much more attention to high-powered people than they pay to us? If humans evolved from great apes, why are human selves so much more elaborate? How does our attachment to our parents when we are infants influence the success or failure of our romantic relationships when we are adults? Can behaving morally license us to behave immorally shortly afterward? How do social relationships make us more versus less prone toward physical illness? This volume, an update to the original 2010 edition, provides a graduate-level introduction to social psychology. The target audience consists of first-year graduate students (MA or PhD) in social psychology and related disciplines: marketing, organizational behavior, etc. Although it is also appropriate for upper-level undergraduate courses, the authors are world-renowned leaders.
