## **Reducing Territorial Frameworks:**

**Reducing Territorial Frameworks** Hideyuki Fujisawa,1986      **Reducing Territorial Frameworks** Fujisawa Shuko,Hideyuki Fujisawa,1998-09-01      *Handbook of Disaster Risk Reduction for Resilience* Saeid Eslamian,Faezeh Eslamian,2021-06-14 This book is part of a six volume series on Disaster Risk Reduction and Resilience The series aims to fill in gaps in theory and practice in the Sendai Framework and provides additional resources methodologies and communication strategies to enhance the plan for action and targets proposed by the Sendai Framework The series will appeal to a broad range of researchers academics students policy makers and practitioners in engineering environmental science and geography geoscience emergency management finance community adaptation atmospheric science and information technology This volume discusses how to measure and build disaster resilience at society s capacity drawing upon individual institutional and collective resources to cope with and adapt to the demands and challenges of natural disaster occurrences The book will serve as a guide outlining the key indicators of disaster resilience in urban and rural settings and the resources and strategies needed to build resilient communities in accordance with the targets of the Sendai Framework Readers will learn about multi risk reduction approaches using computational methods data mining techniques and System Thinking at various scales as well as institutional and infrastructure resilience strategies based on several case studies      *Linear Planning to Reduce Regional Inequality* Rossella Moscarelli,2023-04-24 This book explores the advantages of a linear model of planning in reducing regional inequalities Linear planning commonly discussed in the past as a method which plans the development of the city is completely redefined here in the form of a design approach inspired by projects shaped by linear routes such as cycle or walking paths Such concept is applied to the urgent topic of territorial marginality which specifically neglects rural and mountainous areas and recently is coped by European and National policies The analysis of these policies demonstrates the necessity of alternative strategies equipped to deal with both the internal and external causes that determine the critical conditions in these fragile environments By implementing the concept of linear planning in these contexts this book proposes to enlarge the perspective of traditional policies contrasting the regional inequalities that usually determine the design of projects just within the boundaries of the marginal areas Cycle and walking paths are experimental cases of linear planning as they have not been influenced or formed by political boundaries and therefore are able to equally involve both the central and marginal zones This book presents a review of current issues such as regional inequalities with attention to their related policies as well as an analysis of the concept of linear planning as seen through the study of one of the most famous cases of a walking path the Way of St James in Spain      **Comprehensive analysis of the disaster risk reduction system for the agriculture sector in Turkmenistan** FAO,2024-09-12 This report aims to highlight the current strengths of the institutional DRR system for agriculture in Turkmenistan as well as indicate existing gaps and capacity needs to further enhance it A comprehensive assessment is conducted which includes a general overview of the country s

agricultural sector and outlines the most frequent natural hazards that are impacting the sector. It is followed by an analysis of the existing legal policy and institutional structure and discusses various components of the system including e.g. the functioning of early warning systems, assessments of disaster risks, post-disaster needs assessments including damages and losses assessments, and the availability of agricultural insurance for farmers. It concludes by providing recommendations for capacity building interventions to strengthen the current system to reduce the adverse impacts of natural hazards in particular floods, landslides, and droughts, and climate change on agriculture in Turkmenistan. *The Role of Mitigation in Reducing Federal Expenditures for Disaster Response* United States. *Urban Policy in the Framework of the 2030 Agenda* María Ángeles Huete García, Adrián Rodríguez Miranda, Vicente Ugalde, Rafael Merinero Rodríguez, 2023-08-30. The book provides comparative information about the materialization of the 2030 Agenda in urban policy in ten countries located in Europe and Latin America. The Declaration of Quito is the starting point for the implementation of SDGs into public policies in urban areas. However, there are fewer efforts to understand the impact that the 2030 Agenda and specifically the instruments developed for its application in cities. The information of each country is presented in relation to two aspects: the construction of a public policy style in each country and the results and impacts on urban public policies implemented in specific cities within the national frameworks. The first means the emergence of a public policy framework and its materialization in public policy instruments. In this regard, the book raises the following questions: To what extent have the SDGs come to generate a common framework for cities in the countries? And how are Urban SDGs translated to national urban policies? The second results and impacts at the local level is related to two aspects: a substantive the goals of the policy and b procedural management aspects related to the policy design, governance, and institutional capacity building.

**The Development of a Comprehensive Legal Framework for the Promotion of Offshore Wind Power** Anton Ming-Zhi Gao, Chien-Te Fan, 2016-04-24. There is clearly an urgent need worldwide to increase the share of renewable energy in the overall energy supply as rapidly as possible. With a well-developed and proven feasible technology, offshore wind power has come to the fore as the most promising means of achieving this goal. However, fragmented authorities and procedures may pose tremendous challenges to the development of an integrated legal framework for offshore wind, and the complex installation and grid interconnections it requires. This book surveys and analyses the features essential for the development of such a framework, drawing on the experience of ten countries that have such schemes in place: France, Germany, the United Kingdom, Italy, Norway, the United States, Australia, China, Korea, and Taiwan. Discussing the impact of technological, economic, spatial, and market issues on the legal framework, eleven key policymakers in their respective countries contribute chapters that together reveal the contours of a strong and sound legal framework that serves to enable and facilitate the efficient application of policy initiatives and subsidies. Topics

and issues raised and examined include the ways a sound legal framework addresses the following aspects of offshore wind power development license schemes construction of turbines infrastructure of grid construction harbor and vessels environmental health and safety regulations and loan and finance risk The contributors show that a carefully planned mix of incentives and supplementary schemes is indispensable The essays are drawn on the presentations and papers offered at the International Conference on a Comprehensive Legal Framework for the Development of Offshore Wind Power Around the World held in Taiwan in August 2016 As a major new contribution to the debate on the importance of a legal framework for offshore wind power and grid interconnections this book will prove indispensable to lawyers policymakers officials and academics concerned with the management of sea space to include the wind power necessary to achieve and sustain renewable energy goals OECD Public Governance Reviews Auditing Decentralised Policies in Brazil Collaborative and Evidence-Based Approaches for Better Outcomes OECD,2020-11-26 Public policies and services such as education health welfare infrastructure and sanitation are increasingly developed and provided via different levels of government national regional and local creating co ordination and governance challenges This report describes how Brazil s 33 courts of accounts can use their oversight function including audits to help make such decentralised policies more effective and coherent

**Territorial Inequalities** Magali Talandier,Josselin Tallec,2024-01-11 Spatial planning has embraced the idea of dealing with territorial inequalities by focusing on equipment logic on a national scale and then economic development on a local scale Today this issue is creating new angles of debate with strong political resonances e g Brexit French gilets jaunes movement Interpretations of these movements are often quick and binary such as the contrast between metropolises and peripheries between cities and the countryside between the north and the south or between the east and the west of the European Union Territorial Inequalities sheds light on the social political and operational implications of these divergences The chapters cover the subject at different scales of action and observation from the neighborhood to the world but also according to their interdependences To deal with such a vast and ambitious theme the preferred approach is that of territorial development in terms of public policy namely spatial planning Best Practices in Poverty Reduction Else Øyen,Alberto D. Cimadamore,2002-08 This book is a contribution to the central question of how to develop effective anti poverty strategies worldwide **2017 The State of Food and Agriculture** Food and Agriculture Organization of the United Nations,2018-04-04 One of the greatest challenges today is to end hunger and poverty while making agriculture and food systems sustainable The challenge is daunting because of continued population growth profound changes in food demand and the threat of mass migration of rural youth in search of a better life This report presents strategies that can leverage the potential of food systems to become the engine of inclusive economic development and rural prosperity in low income countries It analyses the structural and rural transformations now under way and examines the opportunities and challenges they present to millions of small scale food producers It shows how an agroterritorial planning approach focused

on connecting cities and towns and their surrounding rural areas combined with agro industrial and infrastructure development can generate income opportunities throughout the food sector and underpin sustainable and inclusive rural transformation

*Portable Prisons* James Gacek, 2022-01-15 The pervasiveness of surveillance punishment and control within and outside of spaces such as jails prisons and detention centres suggests that the carceral is becoming an increasingly prevalent presence in our lives going beyond historical standards The contemporary use of electronic monitoring extends carceral territory beyond prison walls into people's homes and everyday lives Empirically and empathetically driven *Portable Prisons* is a telling exploration of the electronic monitoring of offenders based on an ethnographic case study from Scotland Electronic monitoring must be understood in both intent and effect as a carceral practice an expression of the carceral state and its overreaching punitive capabilities James Gacek demonstrates that various people experience punishment by means of restrictions around mobility space and time in ways that strongly overlap with the reported experiences of interviewed prisoners Drawing attention to how the neoliberal state outsources the labour of punishment to private corporations and the punished themselves he also rejects the idea that soft punishment is in any way related to the movement for decarceration Offering an original contribution to our understanding of the geography of incarceration *Portable Prisons* is a sophisticated account of electronic monitoring underlining the growing significance of this field

*Territorial Division for Public Action* Antoine Laporte, Antonine Ribardi re, 2025-05-13 The reader may be amazed when they are faced with the sheer number of territorial divisions associated with public action and full of questions What justifies this diversity What are the problems that arise from these divisions Why don't the limits of public action simply follow administrative and political subdivisions *Territorial Division for Public Action* focuses on the situation in France proposing three different approaches First we consider the functions that are associated with these territorial divisions equitable distribution of resources across the territory administration and the management of public services However they are also a tool for maintaining power Lastly we consider the effects these divisions have on the implementation of public action and on socio spatial structures These divisions reflect political projects which embody the issues as much as the partition design itself does The recent reform of territorial regions alongside a gradual imposition of intercommunal links in France has given rise to political debates at both local and national levels

**Development and Territorial Restructuring in an Era of**

**Global Change** Elisabeth Peyroux, Christine Raimond, Vincent Viel, Emilie Lavie, 2023-08-22 Thinking about development and the environment simultaneously is one of the biggest scientific and societal challenges of the 21st century Understanding the interactions between biophysical systems and human activities in an era of global change requires overcoming disciplinary

divides and opening up new epistemological perspectives This book explores these challenges using a territorial lens Combining various scales of analyses from global to local and contexts both urban and rural in the North and in the South it analyzes the relationships between environment and development through a variety of geographical objects i e cities rural and agricultural areas coastlines watershed themes i e ecological transitions food energy transport agriculture mining activities and methodologies i e qualitative and quantitative approaches modeling in situ measurements By engaging in a dialogue between social science and natural science disciplines within different fields and with a variety of forms of knowledge production this book provides essential information for understanding and reading the complexity of a globalized world This book is targeted at academics and students in social sciences and at stakeholders in the field of territorial and environmental management

**Public Policy to Reduce Inequalities Across Europe** Paul Cairney, Michael Keating, Sean Kippin, Emily St Denny, 2022 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations There is a broad consensus across European states and the EU that social and economic inequality is a problem that needs to be addressed Yet inequality policy is notoriously complex and contested This book approaches the issue from two linked perspectives First a focus on functional requirements highlights what policymakers think they need to deliver policy successfully and the gap between their requirements and reality We identify this gap in relation to the theory and practice of policy learning and to multiple sectors to show how it manifests in health education and gender equity policies Second a focus on territorial politics highlights how the problem is interpreted at different scales subject to competing demands to take responsibility This contestation and spread of responsibilities contributes to different policy approaches across spatial scales We conclude that governments promote many separate equity initiatives across territories and sectors without knowing if they are complementary or contradictory This outcome could reflect the fact that ambiguous policy problems and complex policymaking processes are beyond the full knowledge or control of governments It could also be part of a strategy to make a rhetorically radical case while knowing that they will translate into safer policies It allows them to replace debates on values regarding whose definition of equity matters and which inequalities to tolerate with more technical discussions of policy processes Governments may be offering new perspectives on spatial justice or new ways to reduce political attention to inequalities
