Reef and Shore Fauna of Hawaii Donald Putnam Abbott, Andrew Todd Newberry, Kendal Morris, 1977 *A Guidebook of Introduced Marine Species in Hawai'i* Lucius G. Eldredge, Celia Marie Smith, 2001 *Tunicates in Evolutionary Developmental Biology* Paolo Sordino, Lucia Manni, Chiara Anselmi, Rosa Maria Sepe, 2025-02-27 The evolution of morphological novelties i.e. anatomical structures unique to a taxonomic group is generally associated with changes in developmental mechanisms Tunicates the closest relatives of vertebrates have historically had a great conceptual impact on our understanding of the rules that guide a developmental program A broad range of studies have addressed how developmental genes or molecular networks contributed to the evolutionary transition from invertebrates to vertebrates and to the morphological radiation of tunicates In addition tunicate species display several traits of evolutionary interest e.g. solitary or colonial habitus conservative anatomy high genetic polymorphism cryptic speciation different developmental pathways sexual and asexual development whole body regeneration to name a few Therefore they offer unique experimental models for exploring levels of evolutionary divergence in developmental programs behind alternate body plans and for obtaining insight regarding the embryological and evolutionary mechanisms that generate animal diversity The increasing amount of available tunicate genomes and expression data now make feasible efforts to distinguish between homologous convergent or superficially similar gene networks Recent evidence indicating that in tunicates there is great variability in the molecular genetics underlying specific characters of interest or developmental programs makes it fundamentally important to reveal which genes or gene modules determine functional and morphological homology Moreover the availability of sophisticated techniques of live imaging coupled with FACS sorting cell transplantation and transgenic cell labelling make tunicates excellent models for the study of stem cells and their evolutionary traits **Ascidian News**, 2003 Ascidians in Coastal Water H.
