Library Users and Reference Services Linda S Katz, 2013-05-13 This useful book helps reference librarians understand the information seeking needs and behaviors of the diverse groups of people in the communities they serve With the increasing diversity of the American population librarians striving to plan and deliver excellent reference services must enhance their understanding of how best to assist many types of individuals and groups from children to the elderly Library Users and Reference Services provides much needed help in this area delivering strategies and methods to aid readers in their quest for increasingly effective service for all members of the communities in which they work Library Users and Reference Services is divided into four sections of chapters which cover a broad range of topics to assist readers in planning and delivering appropriate services Section One explores customer service economics of information and marketing as key concepts useful in studying information needs of specific groups in the population Section Two focuses on scholars and students in three broad academic disciplines science humanities and social sciences Section Three covers groups with special characteristics such as age economic standing gender or profession Section Four discusses evaluation and provides guidance in the use of the most widely accepted measures for assessing reference effectiveness The book s final chapter explores redesigning reference services for the future providing a glimpse of how such services may change Library Users and Reference Services is a practical guide to help readers understand the many issues related to serving diverse populations in a community Reference librarians and graduate library school students and faculty will learn more effective ways to help a heterogeneous public with the help of this new book The American Public Library Handbook Guy A. Marco, 2011-11-29 A detailed reference work that documents every aspect of the American public library experience through topical entries statistics biographies and profiles The American Public Library Handbook is the first reference work to focus on all aspects of the American public library experience providing a topical perspective through comprehensive essays and biographical information on important public librarians Based upon the author s own notes and extensive experience as well as library periodicals library reference books monographs textbooks Internet sources and correspondence with individual libraries this book comprises nearly 1 000 entries addressing all aspects of public library service Each topical essay considers terminology of the area covered its historical context and current concerns and issues Biographies highlight the philosophical perspective of the individuals covered while entries on specific libraries present timely data and interesting facts about each facility This

unique handbook also offers up to date statistics historical highlights and information about programs and events of individual libraries

Maple V Library Reference Manual Bruce W. Char,Keith O. Geddes,Gaston H. Gonnet,Benton L. Leong,Michael B. Monagan,Stephen Watt,2013-12-01 The design and implementation of the Maple system is an on going project of the Symbolic Com putation Group at the University of Waterloo in Ontario Canada This manual corresponds with version V roman numeral five of the Maple system The on line help subsystem can be invoked from within a Maple session to view documentation on specific topics In particular the command updates points the user to documentation updates for each new version of Maple The Maple project was first conceived in the autumn of 1980 growing out of discussions on the state of symbolic computation at the University of Waterloo The authors wish to acknowledge many fruitful discussions with colleagues at the University of Waterloo particularly Morven Gen tleman Michael Malcolm and Frank Tompa It was recognized in these discussions that none ofthe locally available systems for symbolic computation provided the facilities that should be expected for symbolic computation in modern computing environments We concluded that since the basic design decisions for the then current symbolic systems such as ALTRAN CAMAL REDUCE and MACSYMA were based on 1960 s computing technology it would be wise to design a new system from scratch Thus we could take advantage of the software engineering technology which had become available in recent years as well as drawing from the lessons of experience Maple s basic features elementary data structures Input output arithmetic with numbers and elementary simplification are coded in a systems programming language for efficiency
