Reflection and Software Engineering Walter Cazzola,Robert J. Stroud,Francesco Tisato,2000-06-28 This book presents the state of the art of research and development of computational reflection in the context of software engineering Reflection has attracted considerable attention recently in software engineering particularly from object oriented researchers and professionals The properties of transparency separation of concerns and extensibility supported by reflection have largely been accepted as useful in software development and design reflective features have been included in successful software development technologies such as the Java language The book offers revised versions of papers presented first at a workshop held during OOPSLA 99 together with especially solicited contributions The papers are organized in topical sections on reflective and software engineering foundations reflective software adaptability and evolution reflective middleware engineering Java based reflective languages and dynamic reconfiguration through reflection **Reflection and Software Engineering** Walter Cazzola,Robert J. Humphrey has more than met that promise But his contributions go beyond methodology For decades his deeply personal writings on project management have been admired by software engineers worldwide Reflections on Management brings together Humphrey s best and most influential essays and articles sharing insights that will be indispensable for anyone who must achieve superior results in software or any other endeavor Collected here for the first time these works offer compelling insights into everything from planning day to day work to improving quality encouraging teamwork to becoming a truly great leader All of these writings share a powerful vision grounded by a life in software that has extended across nearly six decades The vision is this To succeed professionals must effectively manage far more than plans schedules and code they must manage teams bosses and above all themselves **Agile and Lean Concepts for Teaching and Learning** David Parsons,Kathryn MacCallum,2018-10-24 This book explores the application of agile and lean techniques originally from the field of software development and manufacturing to various aspects of education It covers a broad range of topics including applying agile teaching and learning techniques in the classroom incorporating lean thinking in educational workflows and using team based approaches to student centred activities based on agile principles and processes Demonstrating how agile and lean ideas can concretely be applied to education the book offers practical guidance on how to apply these ideas in the classroom or lecture hall as well as new concepts that could spark further research and development Philosophy and Engineering: Reflections on Practice, Principles and Process Diane P Michelfelder,Natasha McCarthy,David E. Goldberg,2014-01-13 Building on the breakthrough text Philosophy and Engineering An Emerging Agenda this book offers 30 chapters covering conceptual and substantive developments in the philosophy of engineering along with a series of critical reflections by engineering practitioners The volume demonstrates how reflective engineering can contribute to a better understanding of engineering identity and explores how integrating engineering and philosophy could lead to innovation in engineering methods design and education The volume is divided into reflections on practice principles and process each of which challenges prevalent assumptions and commitments within engineering and philosophy The volume explores the ontological and epistemological dimensions of engineering and exposes the falsity of the commonly held belief that the field is simply the application of science knowledge to problem solving Above all the perspectives collected here demonstrate the value of a constructive dialogue between engineering and philosophy and show how collaboration between the disciplines casts light on longstanding problems from both sides The chapters in this volume are from a diverse and international body of authors including philosophers and engineers and represent a highly select group of papers originally presented in three different conferences These are the 2008 Workshop on Philosophy and Engineering WPE 2008 held at the Royal Academy of Engineering the 2009 meeting of the Society for Philosophy and Technology SPT 2009 at the University of Twente in the Netherlands and the Forum on Philosophy Engineering and Technology fPET 2010 held in Golden Colorado at the Colorado School of Mines **Engineering Distributed Objects** Wolfgang Emmerich,Stefan Tai,2003-06-29 This book constitutes the

thoroughly refereed post proceedings of the Second International Workshop on Engineering Distributed Objects EDO 2000 held in November 2000 in Davis California USA The 15 revised full papers presented together with session surveys were carefully reviewed and selected from 30 submissions The book presents topical sections on middleware selection resource management architectural reasoning distributed communication advanced transactions and service integration
