Daudelin,Kent W. Seibert,1999-09-30 Challenging work experiences are the richest source of learning for today s managers Yet lessons embedded in these experiences are not always obvious This comprehensive book describes a critical yet under researched element of how managers learn from these experiences reflection Today s workplace demands continual learning which in turn requires reflection While this book supports the prevailing view that reflection is central to experiential learning it challenges the traditional views that it is the same as contemplation that it is incompatible with management and that it is time consuming and unnatural for managers Original quantitative and qualitative research reported in this book indicates that two different yet complementary modes of managerial reflection exist active and proactive Active reflection is something that managers naturally engage in during challenging job experiences whereas managers must be prompted to engage in proactive reflection Both modes involve processes of intentional inquiry Different forces are necessary to stimulate each type of reflection Based on these findings the claim is made that the potential to learn from experience is greatest when managers intentionally engage in both modes Accordingly a holistic model that integrates

active and proactive reflection is presented This model has important implications for theorists and researchers of managerial learning by identifying previously unreported aspects of reflection It is also relevant to practitioners and companies who desire to enhance what their managers learn from their workplace experience *Organizing Reflection* Michael Reynolds, 2017-03-02 Through a series of leading edge contributions from pre eminent international scholars in the field *Organizing Reflection* makes a stimulating and distinctive contribution to the study of reflection By doing so it offers the first shift from the individual reflective practitioner to processes of collective and public reflection The unique and varied contributions focus on the development of notions such as public reflection collective reflection and critical reflection In doing so they provide critical insights into new thinking and approaches to the role of reflection in organizations as well as the conceptualization and delivery of learning and change *Organizing Reflection* will be of interest to scholars working in business professional management and organization studies to human development academics and to scholarly practitioners in organizations

**Symbolic Management** James Westphal,Sun Hyun Park,2020-03-17 The theory of symbolic management reveals a pervasive pattern of symbolic decoupling a separation between appearances and reality at every level of the governance system At each level the processes of governance are less efficient or effective than they appear from interpersonal relations within organizations such as those between CEOs and directors top managers and lower level employees to relations between firm leaders and external stakeholders such as journalists and security analysts There is even a separation between appearances and reality at the level of the governance system itself In this book James Westphal and Sun Hyun Park develop symbolic management into a major theoretical perspective on governance Not only does symbolic management provide a compelling behavioral alternative to economic perspectives such as agency theory but it subsumes economic theory Agency theory is reconceived as a historically contingent institutional logic that became taken for granted among corporate stakeholders for a period of time and eventually replaced by a new logic of governance Through a body of extensive empirical research Westphal and Park demonstrate how the symbolic management activities of firm leaders have contributed to this historical shift in prevailing logics of governance and present a warning to regulators investors and the general public
