Marx, Engels and the Philosophy of Science David Bedford, Thomas Workman, 2022-12-31 This book expounds the dialectical conception of science largely implicit in the writings of Marx and Engels offering a sympathetic reconstruction of a philosophy of science commensurate with Marx's thought Drawing on a reading of dialectics found in Plato and Hegel it recasts Marx's implicit ontology in terms of dialectical conceptions of the world as these conceptions have responded to the growing sophistication of modern science It thus deepens our understanding of materialist philosophy as it relates to science and draws out Marx's logic of science in light of continuing discussions As such it will appeal to philosophers with interests in the nature and development of science and Marxist thought *The New York Times Book Review*, 1963

A Theory of Full Employment Nancy Brenner-Golomb, 2017-11-30 In *A Theory of Full Employment* Y S Brenner reviews the current drift toward a society he finds neither economically expedient nor morally attractive and N Brenner Golomb discusses the risks involved for science and society in the newfangled sophism hiding behind post modern ideas and political correctness Both authors emphasize the need to revive the public's political engagement and revise economic theory to restore to society the humane perspective that inspired the welfare state They contend that if people will abandon outworn habits of thought consider alternatives and renew their political engagement

they may find useful employment for all who are able and willing to work and end the fear of destitution Although scientists philosophical backgrounds seldom influence their answers they do determine their questions and the final outcome can depend on this Neoclassical economists are ill equipped to ask questions about the long term dynamic processes of our complex economic reality They leave out of their models variables not easily quantified and prefer mathematical precision to the study of the intricacy of life Paul Samuelson Robert Solow and others have tried to overcome this by grouping self adjusting elements into proxy variables thus synthesizing neoclassical and Keynesian ideas But most of today s critics of the ruling dogma go largely unheard This volume is intended to convince professional economists who study the economic system as a whole to reexamine some of the assumptions behind reigning economic theories A second objective is to explain to the general public why currently fashionable policies cannot solve massive long term unemployment Finally it shows that if political engagement is revived we may escape the economic morass and moral wasteland into which the fashionable policies have been leading us since the 1970s This book will appeal to economists politicians sociologists and a wider public concerned about today s economic malaise

The Course Reflection Project Nicole Schonemann, Emily Metzgar, Andrew Libby, 2015-05-01 Service learning is entering a post initiatory phase At tertiary institutions of all types and sizes service learning programs are common and service learning requirements for graduation are growing in popularity Taken together alongside continued faculty interest in effective teaching these factors have raised the visibility and popularity of service learning Now the greater need in service learning is not to prove the need for or efficacy of service learning but to turn the focus squarely back on practice Following established best practice is not enough instructors also need to reflect on how this fits within the specific context and application of each unique course and service learning partnership While there are many excellent resources that detail best practice and showcase exemplary service learning courses faculty reflection and course revision often goes unmentioned In response to the lack of attention on the role of reflection and course revision we convened groups of faculty from a variety of disciplines to reflect deeply on their courses paying specific attention to obstacles and challenges These conversations were converted to articles for this edited collection each chapter representing the process of reflection and revision and serving as a guide to develop effective practice in varied curricular contexts This text contributes to the

body of literature on service learning in a unique and practical manner Faculty teaching or interested in teaching service learning classes would benefit from this text as well as university administrators and community service directors involved in service learning at a programmatic and institutional level This book should be marketed to faculty teaching disciplinary service learning classes and service learning pedagogy classes and administrative offices involved in service learning This could be a supplementary text for graduate level pedagogy courses Higher education institutional libraries would benefit from this text as well as the national and state campus compact offices
