Apple, 1987-12-16 In the nineteenth century infants were commonly breast fed by the middle of the twentieth century women typically bottle fed their babies on the advice of their doctors In this book Rima D Apple discloses and analyzes the complex interactions of science medicine economics and culture that underlie this dramatic shift in infant care practices and women's lives As infant feeding became the keystone of the emerging specialty of pediatrics in the twentieth century the manufacture of infant food became a lucrative industry More and more mothers reported difficulty in nursing their babies While physicians were establishing themselves and the scientific experts and the infant food industry was hawking the scientific bases of their products women embraced scientific motherhood believing that science could shape child care practices The commercialization and medicalization of infant care established an environment that made bottle feeding not only less feared by many mothers but indeed natural and necessary Focusing on the history of infant feeding this book clarifies the major elements involved in the complex and sometimes contradictory interaction between women and the medical profession revealing much about the changing roles of mothers and physicians in American society The strength of Apple's book is her ability to indicate how the mutual interests of mothers doctors and manufacturers

led to the transformation of infant feeding Historians of science will be impressed with the way she probes the connections between the medical profession and the manufacturers and with her ability to demonstrate how medical theories were translated into medical practice Janet Golden Isis *Sold American* Charles F. McGovern, 2009-01-06 At the turn of the twentieth century an emerging consumer culture in the United States promoted constant spending to meet material needs and develop social identity and self cultivation In *Sold American* Charles F McGovern examines the key players active in shaping this cultural evolution advertisers and consumer advocates McGovern argues that even though these two professional groups invented radically different models for proper spending both groups propagated mass consumption as a specifically American social practice and an important element of nationality and citizenship Advertisers McGovern shows used nationalist ideals icons and political language to define consumption as the foundation of the pursuit of happiness Consumer advocates on the other hand viewed the market with a republican inspired skepticism and fought commercial incursions on consumer independence The result says McGovern was a redefinition of the citizen as consumer The articulation of an American Way of Life in the Depression and World War II ratified consumer abundance as the basis of a distinct American culture and history *The Oxford History of Popular Print Culture* Gary Kelly, Joad Raymond, Christine Bold, 2011 Planned nine volume series devoted to the exploration of popular print culture in English from the beginning of the sixteenth century to the present **Heart Language** Elsie Singmaster, Susan Colestock Hill, 2009 A selection of short stories by Elsie Singmaster that focus on the Pennsylvania German experience Includes commentary framing them in historical cultural and literary contexts Provided by publisher *Encyclopedia of the Gilded Age and Progressive Era* John D. **Advertising Progress** Pamela Walker Laird,2020-01-15 Selected by Choice Magazine as an Outstanding Academic Title Originally published in 1998 Drawing on both documentary and pictorial evidence Pamela Walker Laird explores the modernization of American advertising to 1920 She links its rise and transformation to changes that affected American society and business alike including the rise of professional specialization and the communications revolution that new technologies made possible Laird finds a fundamental shift in the kinds of people who created advertisements and their relationships to the firms that advertised Advertising evolved from the work of informing customers telling people what manufacturers had to sell to creating consumers persuading people that they needed to buy Through this story Laird shows how and why in the intense competitions for both markets and cultural authority the creators of advertisements laid claim to progress and used it to legitimate their places in American business and culture
