Reforming The Schools For Teachers:

Professionalism and Community Karen Seashore Louis, Sharon D. Kruse, 1995-03-24 Authors Louis and Kruse examine the question Why do some school communities succeed and others fail They take a look at five urban schools that have been attempting restructuring for several years enough time to show results They describe how the development of a professional community or the lack thereof impacts the implementation of change and how teachers efforts at professionalism can positively affect the process Focusing on the structural social and human conditions of schooling the authors describe how to form a professional community Using their extensive research on professionalism they develop a framework for evaluating the elements of community and then use the framework to present a cross case analysis of various schools in the study Professionalism and Community is a potent source of information for all policymakers and school leaders who are committed to long term effective change It reveals a significant reason why so many well intentioned well planned reforms fail in spite of individual commitment and the heroic efforts of the participants By observing those who have gone before readers can learn important lessons from this study and discover the keys to making their own reform efforts work Reforming Teacher Education Sheila Nataraj Kirby, 2006 Teacher education has been subject to both scathing criticism and innumerable efforts designed to reform it or to save it from being dismantled One of the latest and most well funded efforts aimed at teacher education reform is boldly titled Teachers for a New Era TNE Eleven colleges and universities of various types nationwide were selected to participate in TNE The TNE initiative emphasizes evidence based decisionmaking close collaboration between education and arts and sciences faculty and teaching as an academically taught clinical practice profession The RAND Corporation and the M **Reforming Teaching and Teacher Education** Eija Kimonen, Raimo Nevalainen, 2017-03-21 What are the prerequisites for reforming education and how can these reforms be seen in school development and culture How should teacher education support this reform process What are the principles and practices underlying the functioning of the schools of tomorrow These questions are examined in this unique volume The authors in this book argue that the central function of teacher education and education in general is to respond to the challenges brought on by the twenty first century According to this approach the competencies and skills needed in the future are not merely a new addition to school activities but rather something requiring a comprehensive reform of school culture encompassing teacher education curricula and teaching methods Such a fundamental process of change in the action and thinking models used by schools would be an effort to achieve a complete transformation the result of which would be schools developing into organizations that are both creative and imbued with a strong sense of community A central attribute is that the creation of new knowledge is not just restricted to the classroom but also takes place in out of school environments This would link learning to its natural context eventually leading to an ideal instruction that is actively problem oriented holistic and life centered This reform minded volume is divided into three parts The first part focuses on the reform

processes in teacher education the second on the reforms of pedagogics at schools and teacher education institutions and the third on the processes of reculturing schools New prospects for active schools in the United States and Europe as well as in Japan and China are discussed *Extending Educational Reform* Amanda Datnow, Lea Hubbard, Hugh Mehan, 2005-11-02 In an effort to improve student achievement thousands of US schools have adopted school reform models devised externally by universities and other organizations Such models have been successful in improving individual schools or groups of schools but what happens when educational reform attempts to extend from one school to many Through qualitative data from several studies this book explores what happens when school reform goes to scale Topics covered include why and how schools are adopting reforms the influence of the local context and wider constraints on the implementation of reform teachers and principals as change agents in schools the evolution of reform design teams the implementation sustainability and expiration of reform and its impact on educational change Each chapter concludes with guidelines for policy and practice This book will be of interest to educational leaders and staff developers educational researchers and policy makers in the US and internationally

Reforming Schools Kimberly Kinsler, Mae Gamble, 2001-06-01 *Reforming Schools* will transform the study of school reform development and improvement It not only provides an overview of research findings professional and political issues and policy developments and their history it also relates such thinking to practice through a rich and multi faceted case study of school reform Particular emphasis is given to urban schooling with a candid look at what can be learned not only from successful school reforms but also from failure Throughout the book readers are guided by questions points for reflection and hypothetical exercises that facilitate interaction with case study material This book enables the reader to experience what it is like to be involved in the field as no other book on school reform does This is the first true textbook in this area written in an accessible style and supported by thought provoking questions and useful exercises

Reforming the Schools For Teachers John W. Friesen, 1987-08-14 This book examines a series of recently suggested educational reform plans provides an analysis of each pointing out the inadequacies of the plans for the teaching profession and then elaborates a new reform program of administration known as autonomous education Autonomous education proposes that the administration of local schools be turned over to members of the teaching profession for development as somewhat unique learning enters in terms of educational emphases and philosophy Autonomous education would more fully utilize the potentialities of teachers by providing them with authority in educational decision making thus enhancing their morale and subsequently improving student performance

Reforming Teaching Globally Maria Teresa Tatto, 2009-09-28 This book examines globalisation s impact on teacher education development and work offering theoretical analysis and comparative examples It highlights conflicts convergence and implications for teaching learning and indigenous knowledge in the globalisation era
