Regards d'un biologiste Marc Klein,1980 Becoming a Physician Thomas Neville Bonner,2000 Focusing on the social intellectual and political context in which medical education took place Thomas Neville Bonner offers a detailed analysis of transformations in medical instruction in the United Kingdom France Germany and the United States between the Enlightenment and World War II From a unique comparative perspective this study considers how divergent approaches to medical instruction in these countries mirrored as well as impacted their particular cultural contexts The book opens with an examination of key developments in medical education during the late eighteenth century and continues by tracing the evolution of clinical teaching practices in the early 1800s It then charts the rise of laboratory based teaching in the nineteenth century and the progression toward the establishment of university standards for medical education during the early twentieth century Throughout the author identifies changes in medical student populations and student life including the opportunities available for women and minorities **Regards d'un biologiste** Marc Klein,1980 Discovering Life, Manufacturing Life Pierre V. Vignais,Paulette M. Vignais,2010-06-21 Francis BACON in his Novum Organum Robert BOYLE in his Skeptical Chemist and Ren DESCARTES in his Discourse on Method all of these men were witnesses to the th scientific revolution which in the 17 century began to awaken the western world from a long sleep In each of these works the author emphasizes the role of the experimental method in exploring the laws of Nature that is to say the way in which an experiment is designed implemented according to tried and tested techniques and used as a basis for drawing conclusions that are based only on results with their margins of error taking into account contemporary traditions and prejudices Two centuries later Claude BERNARD in his Introduction to the Study of Experimental Medicine made a passionate plea for the application of the experimental method when studying the functions of living beings Twenty first century Biology which has been fertilized by highly sophisticated techniques inherited from Physics and Chemistry blessed with a constantly increasing expertise in the manipulation of the genome initiated into the mysteries of information technology and enriched with the ever growing fund of basic knowledge at times appears to have forgotten its roots *Regards d'un biologiste* Marc Klein (médecin.),1980

nach Clermont Ferrand verlagerte Universität de Strasbourg war ein Zentrum des französischen Widerstandes gegen die Nationalsozialisten und deutschen Besatzer. Zahlreiche Universitätsangehörige Lehrende und Studierende wurden in verschiedene Konzentrationslager deportiert. Bereits zwei Jahre nach Kriegsende veröffentlichte die Universität de Strasbourg 1947 die *T moignages strasbourgeois* eine eindrucksvolle Sammlung von Berichten in denen überlebende ihre Verschleppung in die Konzentrationslager schilderten. Mit den Berichten über die Konzentrationslager Buchenwald und Mittelbau Dora liegt nun erstmals eine Auswahl der *T moignages strasbourgeois* in deutscher Übersetzung vor. *History of Science* Alistair Cameron Crombie, Michael A. Hoskin, 1981 A review of literature and research in the history of science medicine and technology in its intellectual and social context. *Comptes rendus des séances de l'Académie des sciences*, 1980. **A Vital Rationalist** Georges Canguilhem, 2000-04-04 Georges Canguilhem is one of France's foremost historians of science. Trained as a medical doctor as well as a philosopher he combined these practices to demonstrate to philosophers that there could be no epistemology without concrete study of the actual development of the sciences and to historians that there could be no worthwhile history of science without a philosophical understanding of the conceptual basis of all knowledge. A Vital Rationalist brings together for the first time a selection of Canguilhem's most important writings including excerpts from previously unpublished manuscripts and a critical bibliography by Camille Limoges. Organized around the major themes and problems that have preoccupied Canguilhem throughout his intellectual career the collection allows readers whether familiar or unfamiliar with Canguilhem's work access to a vast array of conceptual and concrete meditations on epistemology methodology science and history. Canguilhem is a demanding writer but Delaporte succeeds in marking out the main lines of his thought with unrivaled clarity. Readers will come away with a heightened understanding of the complex and crucial place he holds in French intellectual history. *Revue d'histoire des sciences*, 1982. **National Union Catalog**, 1980. Includes entries for maps and atlases. *Comptes rendus des séances de l'Académie des sciences* Académie des sciences (France), 1980. *Histoire de Strasbourg des origines à nos jours: Strasbourg de la guerre de Trente Ans à Napoléon, 1618-1815* Georges Livet, Francis Rapp, 1980. 212 2010 01-01-2021, *Instruire, guérir, servir* Christian Bonah, 2000. **Monographic Series** Library of Congress, **Centaureus**, 1981. **L'Université de Strasbourg de la Révolution française à la guerre de 1870** Georges Livet, 1996. Alsacia ha tenido la suerte de haber vivido después de las guerras en tiempo de paz el clasicismo y la herencia revolucionaria y napoleónica por parte francesa y el idealismo literario filosófico y pedagógico del lado renano y helvético. De esta mezcla de influencias y de una actividad propia y original ha nacido una forma de civilización literaria científica y artística donde tiene su sitio la Universidad de Estrasburgo. En el mundo post revolucionario las Facultades buscan su vida renuevan la tradición combinan la ciencia que se transmite y la ciencia que se crea tienden a interesarse por el discurso histórico.
