Exporting Japanese Aesthetics Tets Kimura, Jennifer Harris, 2020-05-04

Exporting Japanese Aesthetics brings together historical and contemporary case studies addressing the evolution of international impacts and influences of Japanese culture and aesthetics The volume draws on a wide range of examples from a multidisciplinary team of scholars exploring transnational regional and global contexts Studies include the impact of traditional Japanese theatre and art through to the global popularity of contemporary anime and manga Under the banner of soft power or Cool Japan cultural commodities that originate in Japan have manifested new meanings outside Japan By re mapping meanings of selected Japanese cultural forms this volume offers an in depth examination of how various aspects of Japanese aesthetics have evolved as exportable commodities the motivations behind this diffusion and the extent to which the process of diffusion has been the result of strategic planning Each chapter presents a case study that explores perspectives that situate Japanese aesthetics within a wide ranging field of inquiry including performance tourism and visual arts as well as providing historical contexts The importance of interrogating the export of Japanese aesthetics is validated at the highest levels of government which formed the Office of Cool Japan in 2010 and which perhaps originated in the 19th century at governmentally endorsed cultural courts at world fairs Increased international consumption of contemporary Japanese culture provides a much needed boost to Japans weakening economy The case studies are timely and topical As host of the 2020 2021 Tokyo Olympic Games and the 2025 Osaka Expo Cool Japan will be under special scrutiny *Architecture and the Landscape of Modernity in China before 1949* Edward Denison, 2017-02-17 This book explores China s encounter with architecture and modernity in the tumultuous epoch before Communism an encounter that was mediated not by a singular

notion of modernism emanating from the west but that was uniquely multifarious deriving from a variety of sources both from the west and importantly from the east. The heterogeneous origins of modernity in China are what make its experience distinctive and its architectural encounters exceptional. These experiences are investigated through a re-evaluation of established knowledge of the subject within the wider landscape of modern art practices in China. The study draws on original archival and photographic material from different artistic genres and architecturally concentrates on China's engagement with the west through the treaty ports and leased territories. The emergence of architecture as a profession in China and Japan's omnipresence, not least in Manchuria which reached its apogee in the puppet state of Manchukuo. The study's geographically temporally and architecturally inclusive approach framed by the concept of multiple modernities questions the application of conventional theories of modernity or post-colonialism to the Chinese situation. By challenging conventional modernist historiography that has marginalised the experiences of the west as other for much of the last century this book proposes different ways of grappling with and comprehending the distinction and complexity of China's experiences and its encounter with architectural modernity.

Critical Care Angelika Fitz, Elke Krasny, Architekturzentrum

Wien, 2019-06-18 How architecture and urbanism can help to care for and repair a broken planet essays and illustrated case studies. Today architecture and urbanism are capital centric speculation driven and investment dominated. Many cannot afford housing. Austerity measures have taken a disastrous toll on public infrastructures. The climate crisis has rendered the planet vulnerable even uninhabitable. This book offers an alternative vision in architecture and urbanism that focuses on caring for a broken planet. Rooted in a radical care perspective that always starts from the given in the midst of things this edited collection of essays and illustrated case studies documents ideas and practices from an extraordinarily diverse group of contributors. Focusing on the three crisis areas of economy ecology and labor the book describes projects including village reconstruction in China irrigation in Spain community land trust in Puerto Rico revitalization of modernist public housing in France new alliances in informal settlements in Nairobi and the redevelopment of traditional building methods in flood areas in Pakistan. Essays consider such topics as ethical architecture land policy creative ecologies diverse economies caring communities and the exploitation of labor. Taken together these case studies and essays provide evidence that architecture and urbanism have the capacity to make the planet livable again. Lefebvre for Architects Nathaniel Coleman,2014-12-05

While the work of Henri Lefebvre has become better known in the English speaking world since the 1991 translation of his 1974 masterpiece *The Production of Space* his influence on the actual production of architecture and the city has been less pronounced Although now widely read in schools of architecture planning and urban design Lefebvre s message for practice remains elusive inevitably so because the entry of his work into the Anglosphere has come with repression of the two most challenging aspects of his thinking romanticism and Utopia which simultaneously confront modernity while being progressive Contemporary discomfort with romanticism and Utopia arguably obstructs the shift of Lefebvre s thinking from being objects of theoretical interest into positions of actually influencing practices Attempting to understand and act upon architecture and the city with Lefebvre but without Utopia and romanticism risks muting the impact of his ideas Although Utopia may seem to have no place in the present Lefebvre reveals this as little more than a self serving affirmation that there is no alternative to social and political detachment Demanding the impossible may end in failure but as Lefebvre shows us doing so is the first step towards other possibilities To think with Lefebvre is to think about Utopia doing so makes contact with what is most enduring about his project for the city and its inhabitants and with what is most radical about it as well Lefebvre for Architects offers a concise account of the relevance of Henri Lefebvre s writing for the theory and practice of architecture planning and urban design This book is accessible for students and practitioners who wish to fully engage with the design possibilities offered by Lefebvre s philosophy [Architecture of Middle Georgia](#) John Linley,2014 The middle Georgia area is a vast living museum of classic southern architecture First published in 1972 this sweeping survey remains one of the best books on the topic covering primitive Gothic Greek Revival and Victorian styles and beyond [Technical Reports Awareness Circular : TRAC.](#) ,1987-05 **3ds Max Design Architectural Visualization** Brian L.
