*Scaling* Gary Michael Maranell, 1974-01-01      *Scaling: a Sourcebook for Behavioral Scientists. Edited by Gary M. Maranell* Gary Michael Maranell (1932- Comp), 1974      **Scaling** Gary Maranell, 2017-07-05 Despite the obvious importance of measurement in any scientific endeavor few students of the social sciences receive adequate training in the principles and problems of assigning numerical values to the subjects objects events groups and operations they study and still less in the process of translating theoretical ideas and concepts into variables This kind of casualness with respect to measurement is often in marked contrast to their methodically designed research which has grown out of subtle and sophisticated theoretical consideration Scaling is intended to remedy this deficiency by providing a broad and detailed description of the major processes for developing measurement scales The chapters which include both classics in the field and the best of modern work require no great mathematical sophistication and go well beyond the conventional study of attitudes to the more general uses of scaling They enable the student and researcher to examine the development of measures of scalability and the problems and weaknesses they present to become familiar with the development of tests of significance for reproducibility and scalability and the need for them and to examine the lively history of the subject and experience the excitement that can be secured from sharing with a creative author the first report of his insight Part One presents a series of general articles that deal in philosophic terms with the problem of measurement with what is meant by measurement and scaling as well as the notions underlying the process of measuring Part Two deals with the scaling methods developed by L L Thurstone including paired comparison scaling equal appearing interval scaling and successive interval scaling The third part focuses upon scalogram analysis presenting the background rationale and procedures for Guttman scaling The fourth part is concerned with summated rating or Likert scaling Part Five is a consideration of unfold      **Measurement in the Social Sciences** Hubert M. Blalock, 2017-09-08 Among the frustrations constantly confronting the social scientist are those associated with the general process of measurement The importance of good measurement has long been recognized in principle but it has often been neglected in practice in many of the social sciences Now that the methodological tools of multivariate analysis simultaneous equation estimation and causal modeling are diffused more widely into the social sciences and now that the very serious implications of random and non random measurement errors are being systematically investigated it is all the more important that social scientists give top priority to the quality of their data and the clarity of their theoretical conceptualizations The book is organized so that one proceeds from problems of data collection to those of data analysis It is not intended to be a complete work covering all types of measurement problems that have arisen in the social sciences Instead it represents a series of studies that are deemed to be crucial for the advancement of social science research but which have not received sufficient attention in most of the social sciences The basic purpose is to stimulate further methodological research on measurement and to study the ways in which knowledge that has been accumulated in

some fields may be generalized Part I is concerned with applying scaling approaches developed in psychometrics to problems that arise in other social sciences The focus is on finding better ways to ask questions of respondents so as to raise the level of measurement above that of simple ordinal scales Part II focuses on multiple indicator theory and strategies as applied to relatively complex models and to change data In this section the emphasis shifts to how one analyzes fallible data through the construction of explicit measurement error models Part III deals with the statistical analysis of ordinal data including the interpretation and empirical behaviors of various ordinal measures of association

*The Process of Social Research* Jeffrey C. Dixon,Royce Singleton,Bruce C. Straits,2016 The Process of Social Research successfully meets two major challenges of teaching social science methods to make the material interesting and accessible to students and to provide them with the tools necessary to understand evaluate and conduct research Authors Jeffrey C Dixon Royce A Singleton Jr and Bruce C Straits employ a conversational writing style that is engaging and student friendly Using everyday examples to introduce chapters and clarify complex concepts they provide current research examples on such cutting edge topics as immigration family composition prosecutorial misconduct organized racism homelessness social inequality and education and alcohol consumption and grades Placing a unique emphasis on the research process the book helps students understand the logic and mechanics of social research giving them the tools and the power to evaluate the research of others and to conduct their own research Beginning with the introduction every chapter contains flowcharts of research processes As each diagram is presented the authors relate the specific method to the overall research process Then over the course of the chapter or section they flesh out each step This way they convey information about the nuts and bolts of research while ensuring that students do not lose sight of the logic of inquiry Comprehensive and up to date without attempting to be encyclopedic in its coverage The Process of Social Research provides a balance between qualitative and quantitative research taking a more integrated approach to describing the relationship between theory and research

Pedhazur,Liora Pedhazur Schmelkin,2013-04-15 In textbooks and courses in statistics substantive and measurement issues are rarely if at all considered Similarly textbooks and courses in measurement virtually ignore design and analytic questions and research design textbooks and courses pay little attention to analytic and measurement issues This fragmentary approach fosters a lack of appreciation of the interrelations and interdependencies among the various aspects of the research endeavor Pedhazur and Schmelkin s goal is to help readers become proficient in these aspects of research and their interrelationships and to use that information in a more integrated manner The authors offer extensive commentaries on inputs and outputs of computer programs in the context of the topics presented Both the organization of the book and the style of presentation allow for much flexibility in choice sequence and degree of sophistication with which topics are dealt      **Books in Series** ,1980      *Catalogue of the Population Council Library, New York: Author* Population Council. Library,1979      *Sourcebook of Family Theories and Methodologies* Kari Adamsons, April L. Few-Demo,Christine Proulx,Kevin Roy,2022-11-07 This sourcebook is an unparalleled resource in the field of family science It provides a comprehensive overview of both traditional and contemporary theories and methodologies to promote a greater understanding of increasingly complex family realities It focuses on broad developments in research design and

conceptualization while also offering a historical perspective on developments in family science over time particularly emerging theories from the past several decades Each chapter summarizes and evaluates a major theory or methodological approach in the field delving into its main principles its debates and challenges how it has evolved over time its practical uses in policy education or further research and links to other theories and methodologies In highlighting recent research of note chapters emphasize the potential for innovative future applications Key areas of coverage include Risk and resilience family stress feminist critical race and social exchange theories Ambiguous loss intersectionality Queer and family development theory Life course framework Biosocial theory and biomarker methods Symbolic interactionism Ethnography Mixed methods participatory action research and evaluation *Books in Print Supplement* ,1978 **Books in Print** ,1977

**Sourcebook of Family Theories and Methods** Pauline Boss,William J. Doherty,Ralph LaRossa,Walter R. Schumm,Suzanne K. Steinmetz,1993-03-31 Origins We call this book on theoretical orientations and methodological strategies in family studies a sourcebook because it details the social and personal roots i e sources from which these orientations and strategies flow Thus an appropriate way to preface this book is to talk first of its roots its beginnings In the mid 1980s there emerged in some quarters the sense that it was time for family studies to take stock of itself A goal was thus set to write a book that like Janus would face both backward and forward a book that would give readers both a perspective on the past and a map for the future There were precedents for such a project The Handbook of Marriage and the Family edited by Harold Christensen and published in 1964 the two Contemporary Theories about the Family volumes edited by Wesley Burr Reuben Hill F Ivan Nye and Ira Reiss published in 1979 and the Handbook of Marriage and the Family edited by Marvin Sussman and Suzanne Steinmetz then in production *Scaling* Gary Michael Maranell,1974 By turning the book four different ways the reader may view the graphics of familiar objects and gain a different perception each time

**Stakeholder Support and Collaboration in Entrepreneurial Ecosystems** Anne Kathrin Bischoff,2019-03-06 This thesis examines stakeholder relationships in entrepreneurial ecosystems by focusing on the importance of sustainability education and culture in this context A three staged research approach on the topic is employed First based on a systematic literature review the relevance of stakeholder theory for the creation of sustainable entrepreneurial ecosystems that encourage sustainable entrepreneurship is examined as conceptual approach Second a qualitative empirical stance is used to investigate stakeholder involvement from the entrepreneurial ecosystem at 20 higher educational institutions in 19 European countries with regard to entrepreneurship education Third comparative quantitative empirical research is conducted to identify cross cultural and stakeholder related factors that determine the perceived strength of the sustainable entrepreneurial ecosystems in Austria and Germany The findings of this thesis indicate that stakeholder theory sustainability education and culture all matter for developing strong entrepreneurial ecosystems These results can be of interest for policy makers entrepreneurship educators entrepreneurs and other entrepreneurial stakeholders who aim at strengthening regional

entrepreneurial ecosystems      A Critical Dictionary of Sociology Raymond Boudon, Francois Bourricaud, 2002-09-10 Unlike most other sociology or social science dictionaries in this translation of the Critical Dictionary of Sociology taken from the second French edition of the Dictionary and edited by the English sociologist Peter Hamilton the critical value of this distinctive work is at last made available for a wider audience Each entry grapples directly with an issue whether theoretical epistemological philosophical political or empirical and provides a strong statement of what the authors think about it The discussions are considered but argumentative By reaffirming that a non marxist style of critique is still possible Boudon and Bourricaud have presented a distinctive approach to the key issues which confront the societies of the Twentieth and Twenty First centuries For some this work will be a textbook for others an indispensable sourcebook of sociological concepts and for most a way of opening our eyes to new dimensions in our understanding of the great ideas and theories of sociology
