should also due to the urgency of mutual confidence facilitate the realization of an open world During the Second World War while being actively involved in the Allied atomic bomb project Bohr was able to obtain access to Prime Minister Churchill and President Roosevelt to promote his view After the war he continued his confidential approaches to the statesmen while publishing more generally oriented articles on the issue Although Bohr put in as much work in appeals to the statesmen as in his other writings they were not intended for publication This has called for the inclusion of a greater number than in earlier volumes of the Collected Works of previously unpublished documents as well as a particularly extensive historical introduction written by the editor The material adds up to a fascinating story of the political dedication and social responsibility of one of the major scientists of the twentieth century Part II documents Bohr's other social and political activities such as his long time presidency in the Royal Danish Academy of Sciences and Letters and his promotion of the peaceful uses of atomic energy Taking a broader approach than most of his other publications these occasional writings which are most often published versions of talks at public events are particularly well suited to present Bohr to the general public as a thinker as well as a person Niels Bohr Open World Atomic Bomb Project Science and Politics Collected Works Archival Documents Original Photographs
