Intelligence--91 Brian Mayoh, 1991 **Scandinavian Conference on Artificial Intelligence-93** Erik Sandewall, Carl Gustaf Jansson, 1993 The Nordic countries are traditionally strong in the application of new computer technology This work represents the state of the art in some of the artificial intelligence areas currently subject to active R qualitative reasoning machine learning neural networks and knowledge based systems Both basic and applied AI research are represented

Scandinavian Conference on Artificial Intelligence 89 Hannu Jaakkola, S. Linnainmaa, 1989 **Thirteenth Scandinavian Conference on Artificial Intelligence** S. Nowaczyk, 2015-11-06 Artificial intelligence AI has featured widely in the news recently It is vital to the continued development of computer science and informatics and is indispensable for the effective functioning of a multitude of systems in fields such as medicine economics linguistics philosophy psychology and logical analysis as well as industry This book presents the proceedings of the 13th Scandinavian Conference on Artificial Intelligence SCAI 2015 held in Halmstad Sweden in November 2015 SCAI is the main biennial conference for the AI research communities of Scandinavia but also attracts the attendance of a wide range of international participants The book features 17 accepted papers from the conference as well as extended abstracts describing the work of six Ph D students who presented their research in progress to a panel of experts in the doctoral symposium which forms part of the conference A wide range of topics are covered including machine learning data mining logical reasoning robotics and planning and the papers included here focus on both the theory and practical applications of AI The book will be of interest to all those wishing to keep abreast of the latest developments in the field of AI **Twelfth Scandinavian Conference on Artificial**

Viappiani, 2013-11-14 Artificial intelligence has become so much a part of everyday life that it is now hard to imagine a world without it This book presents papers from the 12th Scandinavian Conference on Artificial Intelligence SCAI held in Aalborg Denmark in November 2013 The SCAI conference is the main biennial platform for the AI research community in Scandinavia and the papers collected here not only include contributions from Scandinavia

but also from other European and non European countries Topics cover the entire range of AI with a particular focus on machine learning and knowledge representation as well as uncertainty in AI and applications In addition to the 28 regular papers extended abstracts of the presentations made by Ph D students of their research in progress to a panel of experts in the doctoral symposium a new feature at this conference are also included here This book will be of interest to all those who wish to keep up to date with the latest developments in artificial intelligence

Seventh Scandinavian Conference on Artificial Intelligence Henrik Hautop Lund, B. H. Mayoh, John W. Scandinavian Conference on Artificial Intelligence Thore Danielsen, 1988 **New Directions in AI Planning** Malik Ghallab, Alfredo Milani, 1996 **Artificial Intelligence in Education** Ben Du Boulay, R. Mizoguchi, 1997 The theme of this book is Knowledge and Media in Learning Systems and papers that explore the emerging roles of intelligent multimedia and distributed technologies as well as computer supported collaboration within that theme are included The spread of topics is very wide encompassing both well established areas such as student modelling as well as more novel topics such as distributed intelligent tutoring on the World Wide Web Far from undermining the need to understand how learning and teaching interact the newer media continue to emphasise the interdependence of these two processes Collaboration and tools for collaboration are the major topics of interest Understanding how human learners collaborate how peer tutoring works and how the computer can play a useful role as either a more able or even a less able learning partner are all explored here

Advances in Intelligent Systems Francesco Carlo Morabito, 1997 Intelligent Systems can be defined as systems whose design mainly based on computational techniques is supported in some parts by operations and processing skills inspired by human reasoning and behaviour Intelligent Systems must typically operate in a scenario in which non linearities are the rule and not as a disturbing effect to be corrected Finally Intelligent Systems also have to incorporate advanced sensory technology in order to simplify man machine interactions Several algorithms are currently the ordinary tools of Intelligent Systems This book contains a selection of contributions regarding Intelligent Systems by experts in diverse fields Topics discussed in the book are Applications of Intelligent Systems in Modelling and Prediction of Environmental Changes Cellular Neural Networks for NonLinear Filtering NNs for Signal Processing Image Processing Transportation Intelligent Systems Intelligent Techniques in Power Electronics Applications in Medicine and Surgery Hardware Implementation and Learning of NNs **SCAI '97** G. Grahne, 1997 The major theme of this book is Intelligent Agents An agent is a hardware or software

system that is autonomous interactive with and reactive to its environment and other agents An agent can also be pro active in taking the initiative in goal directed behaviour Intelligent Agents are one of the most important and exciting areas of research and development in computer science today Nordic Artificial Intelligence Research and Development Kerstin Bach,Massimiliano Ruocco,2019-11-21 This book constitutes the refereed proceedings of the Third Symposium of the Norwegian AI Society NAIS 2019 held in Trondheim Norway in May 2019 The 11 full papers and 3 short papers were carefully reviewed and selected from 21 submissions The papers focus on all aspects of artificial intelligence machine learning knowledge representation robotics planning and scheduling natural language processing computer vision search algorithms multi agent systems industrial applications and philosophical and ethical foundations *Applications Of Ai, Machine Vision And Robotics* Kim L Boyer,Horst Bunke,Louise Stark,1995-02-28 This text features a broad array of research efforts in computer vision including low level processing perceptual organization object recognition and active vision The volume s nine papers specifically report on topics such as sensor confidence low level feature extraction schemes non parametric multi scale curve smoothing integration of geometric and non geometric attributes for object recognition design criteria for a four degree of freedom robot head a real time vision system based on control of visual attention and a behavior based active eye vision system The scope of the book provides an excellent sample of current concepts examples and applications from multiple areas of computer vision *Hybrid Problems, Hybrid Solutions* John Hallam,1995 Hybridness is a topical if somewhat ambiguous concept in a research environment where there is increasing acceptance of multiple co existent research paradigms artificial intelligence with its emphasis on reasoning with abstract symbols the connectionist approach with its exploration of the synergies of many interconnected simple structures and Nouvelle Robotics which places a focus on the interplay between systems generating skill or behaviour in complete agents There is scope for considerable argument about principles research programmes the Nature of Things as well as room for compromise and synthesis This collection of papers presented at AISB 95 the 10th biennial conference on AI and the Simulation of Behaviour reveals both argument and synthesis **Information Modelling and Knowledge Bases VI** Hannu Kangassalo,1995 This sixth IMKB volume attempts to synthesize research done over a longer period of time in a reference book format The work presents in survey articles the efforts to study foundations and applications of conceptual modelling in various environments The motivation of these efforts is the fact that conceptual modelling and knowledge representation together with various kinds of inference systems are important subfields in the design and use of information systems The modelling problem is essential in many disciplines such as database design knowledge engineering logic artificial intelligence cognitive science philosophy linguistics etc A central and comprehensive bibliography is included **Reusable Components for Knowledge Modelling** Enrico Motta,E. Motta,1999 *Artificial Intelligence for Knowledge Management* Eunika Mercier-Laurent,2020-07-15 This book features a selection of extended papers presented at the 6th IFIP WG 12 6 International Workshop on Artificial

Intelligence for Knowledge Management AI4KM 2018 held in Stockholm Sweden in July 2018 in the framework of the International Joint Conference on Artificial Intelligence IJCAI 2018 The 11 revised and extended papers were carefully reviewed and selected for inclusion in this volume They present new research and innovative aspects in the field of knowledge management such as machine learning knowledge models KM and Web knowledge capturing and learning and KM and AI intersections
