*Scarcity, Choice and Public Policy in Middle Africa* Donald Rothchild, Robert L. Curry Jr., 2023-11-15 New challenges and opportunities have come to the fore as the middle African States have consolidated their independence In grappling with economic scarcity and restricted choice decision makers must transform domestic institutions and practices and reformulate their relationship to the global economy The authors of this book believe that their efforts can be advanced by resorting to a problem solving focus Such an approach will in their opinion allow social scientists to remain true to their professional disciplines while permitting them to embrace African designated objectives By inquiring into decision processes and results policy analysis seeks to identify optimal courses of action in the context of prevailing societal demands and constraints In general African decision makers have adopted three choice strategies with an eye to reducing scarcity and expanding alternatives accommodation reorganization and transformation When these choice strategies are related to system goals striking variations in preferences and priorities emerge the most significant of which concern decision on mobilizing and distributing resources and achieving freedom from external control In various trade off situations involving negotiations by producer cartels bargaining between multinational companies and African host countries and external economic assistance diverse policy patterns among the groups in relating to the benefits and costs of particular lines of action appear Each choice strategy has its own benefit cost combination Since no approach may be equally valid cross nationally the decision elites of each country are left with the responsibility for determining their own goals and priorities New challenges and opportunities have come to the fore as the middle African States have consolidated their independence In grappling with economic scarcity and restricted choice decision makers must transform domestic institutions and practices and ref Scarcity, Choice and Public Policy in Middle Africa John Rothchild, 1978 Zambia's Foreign Policy Douglas G Anglin, 2021-12-12 This volume examines Zambia's role in the search for African independence unity and development particularly in the context of southern Africa It also analyses the problems of dependence and underdevelopment and their impact on foreign policymaking By concentrating on the key issues and major crises that confronted Zambia's decision makers during the nation's first years the authors explain the country's current preoccupations and future prospects Although their primary focus is on Zambia they also treat a range of substantive and theoretical issues Political Development Theory Richard Higgott, 2005-06-28 This book examines development theory from a political perspective It considers modernisation theory and public policy as well as Marxism the state and the third world A Select Bibliography On Economic Development John P. Powelson, 2019-05-20 This bibliography of more than 2 000 titles contains both books and journal articles primarily those published since 1970 Most of the entries are annotated The material is classified according to forty eight categories and there is also a list of relevant titles for each major country in Africa Asia and Latin America **Thirty Years of Public Sector Reforms in Africa** Paulos Chanie, Paschal B. Mihyo, 2013 Over the past three decades African countries have been reforming their public

sector with a view to improving efficiency effectiveness accountability and transparency as part of efforts to improve the delivery of public services Reform actions have included privatisation public private partnerships commercialisation and adoption of private sector approaches in managing public organisations This book put together by OSSREA reviews measures by African countries in that regard the extent to which the measures have achieved their intended results as well as the factors behind the failure to achieve those results where this was the case *The Palgrave Handbook of African Politics, Governance and Development* Samuel Ojo Oloruntoba, Toyin Falola, 2017-10-10 This handbook constitutes a single collection of well researched articles and essays on African politics governance and development from the pre colonial through colonial to the post colonial eras Over the course of these interconnected periods African politics have evolved with varied experiences across different parts of the continent As politics is embedded both in the economy and the society Africa has witnessed some changes in politics economics demography and its relations with the world in ways that requires in depth analysis This work provides an opportunity for old and new scholars to engage in the universe of the debate around African politics governance and development and will serve as a ready reference material for students researchers policy makers and investors that are concerned with these issues *The Failure Of The Centralized State* James Wunsch, Dele Olowu, John W Harbeson, Vincent Ostrom, 2019-07-11 This book is an outcome of the workshop on Political Theory and Policy Analysis held in Indiana during the 1985 86 It seeks to explain why the centralized African state has failed and discusses the breakdown of social processes indirectly caused by the policies of the centralized state *Democratization in South Africa* Timothy Sisk, 2017-03-14 Timothy Sisk presents a new way of conceiving the transition to democracy in South Africa Unlike authors such as Horowitz and Lijphart who have sought to prescribe an ideal set of post apartheid political institutions Sisk asks what kinds of institutions show signs of actually emerging given recent history and present realities He treats the problem of constructing a democratic post apartheid society in South Africa as part of a larger condition common to societies deeply divided by ethnic religious racial or national discord Though its profound cleavages of race and class make it a least likely candidate for conflict resolution through democratization Sisk argues that the centripetal pull on moderate politicians of all parties was greater than the seemingly natural polarizing trend in a divided society This centripetal pull led to the adoption of an interim constitution in 1993 after protracted negotiations An American Fulbright scholar sent to South Africa after the end of the 21 year rupture of official scholarly exchanges between the two countries Sisk analyzes the changes in the strategic calculations of the white minority government the black liberation movement and other parties over the course of negotiations since 1990 He concludes that intermittent upsurges of violence often reinforced rather than reduced the incentives of leaders on both sides to negotiate a settlement that would avoid mutually damaging outcomes Drawing on extensive interviews with political figures as well as other primary and secondary sources Sisk finds reason for hope that a democratic social contract can evolve balancing majority rule with minority representation and guaranteeing equal economic

opportunity and social justice Originally published in 1994 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 *Nigeria, Africa, and the United States* Olayiwola Abegunrin, 2016-12-07 The U S Department of Defense is fighting a new shadow war in Africa Africa is the battlefield of tomorrow and the United States military is spreading secret wars in the continent This book explores how and why this has happened Since the beginning of the twentieth century the formulation of the United States policy towards Africa has always been based on the strategic importance of the natural resources of Africa and how these can be used in the national interests of the United States However most Americans gave very little thought to Africa but instead referred to it as the Dark Continent not only because its peoples are dark skinned but also because it was unknown to them Africa is no longer dark but is rather becoming one of the lions on the move This book examines and analyzes Nigeria and U S policy on the continent since the Cold War It looks at Nigeria and the challenges facing the country including problems of development good governance and security It particularly focuses on the impacts of terrorism on Nigeria and U S Africa relations since the Cold War and the realities of September 11 2001 in relations to Nigeria and United States Islamists jihadists terrorism in Africa There is huge potential in Nigeria the country has the largest population in Africa and is well endowed in terms of both natural and human resources Nigeria also has the largest economy on the continent the largest black population in the world a burgeoning and vibrant youthful population and a tradition of international engagement since its independence Its advantageous geographical location in West Africa enables trade within the continent as well as with Europe North and South America and Asia Nigeria is the most important strategic partner for the United States in the African continent and will become increasingly so in this century **Political Science in Africa** , 2023-12-28 Bringing together African and international scholars this book gives an account of the present state of the discipline of political science in Africa generating insights into its present and future trajectories and assessing the freedom with which it is practiced Tackling subjects including the decolonization of the discipline political scientists as public intellectuals and the teaching of political science this diverse range of perspectives paints a detailed picture of the impact and relevance of the political science discipline on the continent during the struggles for democratization and the influence it continues to exert today *Governments And Mining Companies In Developing Countries* James H. Cobbe, 2019-03-13 This book examines the relationship between the governments of less developed countries LDCs and foreign owned firms engaged in the extraction of minerals for export With an approach that synthesizes economic theory technical considerations and political factors Cobbe provides a fresh look at the policy aspects of the resource bargaining pro *African Security Issues* Bruce E. Arlinghaus, 2019-08-16 As African

nations emerge more fully from the immediate postindependence era there is a pressing need to examine their security concerns from both African and global perspectives Issues of strategic access and resources superpower and regional conflict economic growth and internal stability and the role of African nations as a significant bloc      [Africa in Economic Crisis](#) John Ravenhill,1986-09-19      **Africa in World Politics** Timothy M. Shaw,1989-07-17 Africa's international relations are in a state of transition as the continent enters the last decade of the twentieth century Old assumptions about development security diplomacy and dependence are being challenged by new realities of debt drought devaluation and destabilisation Collective self reliance remains elusive despite the demise of nationalism This collection identifies the major issues in Africa's foreign and development policies and prospects as she enters the 1990s      [Trade Unions and the Coming of Democracy in Africa](#) J. Kraus,2007-12-09 In this book top scholars look at the efficacy of trade union and worker protest in overthrowing authoritarian governments in Africa The analytical introduction and case studies from major African countries argue that unions were often the most important single social force in the democratization process      *Policymaking Under Adversity* Yehezkel Dror,2017-09-29 This groundbreaking study systematically treats recent policymaking trends starting with a reconsideration of salient theoretical issues of policymaking and its study and culminating with a survey of current policy related predicaments in various countries Dror proposes that the task for social science research is to uncover underlying causes of policymaking inadequacies Standard research methods Dror states have been unable to uncover the realities of important decisions made inside governments In order to gain an understanding of pressing predicaments he believes that policymakers need to examine the foundations of contemporary practices of present assumptions and that they need a multiplicity of approaches to policymaking After prescribing a set of requirements that policymaking must satisfy in order to adequately respond to challenges Dror posits several improvements needed in education and in policy decision making The book concludes with an extensive bibliography including numerous important German works not found in other English language studies This book supplements the earlier basic theory and models propounded in Dror's Public Policymaking Reexamined by dealing with current trends As a guide to public policy literature and related works it will be invaluable to students and practitioners      *Public Administration in the Third World* V. Subramaniam,1990-06-26 This multiauthor reference handbook gives a detailed objective picture of the evolution structure and processes of public administration in representative Third World countries Written by an international group of specialists with first hand knowledge of the subject it presents empirical studies of developing nations in Asia the Middle East North and Sub Saharan Africa the West Indies and Latin America The resulting data are shaped by the editor into a theoretical framework delineating the complex relationships of state bureaucracy and class in the Third World Subramaniam's introduction provides a critical overview of development literature in the field Each case study begins with an historical introduction and discusses the political executive and the administrative structures and processes Among the specific topics covered are public

enterprises administrative departments personnel financial administration and regional and local administrative units The majority of the systems studied are affected by the unregulated power of public enterprises the persistence of colonial legacies and the elitism of the bureaucracy The concluding section relates these common elements to the sociohistorical characteristics of the middle class groups that dominate both politics and public administration Offering new research findings and a useful theoretical synthesis this study will promote a clearer understanding of the internal political processes of Third World nations and be of compelling interest to specialists and students concerned with Third World political economy comparative government and international political economy      **The Paradox of Plenty** Terry Lynn

Karl, 1997-10-10 The Paradox of Plenty explains why in the midst of two massive oil booms in the 1970s oil exporting governments as different as Venezuela Iran Nigeria Algeria and Indonesia chose common development paths and suffered similarly disappointing outcomes Meticulously documented and theoretically innovative this book illuminates the manifold factors economic political and social that determine the nature of the oil state from the coherence of public bureaucracies to the degree of centralization to patterns of policy making Karl contends that oil countries while seemingly disparate are characterized by similar social classes and patterns of collective action In these countries dependence on petroleum leads to disproportionate fiscal reliance on petrodollars and public spending at the expense of statecraft Oil booms which create the illusion of prosperity and development actually destabilize regimes by reinforcing oil based interests and further weakening state capacity Karl's incisive investigation unites structural and choice based approaches by illuminating how decisions of policymakers are embedded in institutions interacting with domestic and international markets This approach which Karl dubs structured contingency uses a state's leading sector as the starting point for identifying a range of decision making choices and ends by examining the dynamics of the state itself      *The Cambridge History of Africa* J. D. Fage, Roland

Anthony Oliver, Michael Crowder, 1975 The eighth and final volume of The Cambridge History of Africa covers the period 1940-75 It begins with a discussion of the role of the Second World War in the political decolonisation of Africa Its terminal date of 1975 coincides with the retreat of Portugal the last European colonial power in Africa from its possessions and their accession to independence The fifteen chapters which make up this volume examine on both a continental and regional scale the extent to which formal transfer of political power by the European colonial rulers also involved economic social and cultural decolonisation A major theme of the volume is the way the African successors to the colonial rulers dealt with their inheritance and how far they benefited particular economic groups and disadvantaged others The contributors to this volume represent different disciplinary traditions and do not share a single theoretical perspective on the recent history of the continent a subject that is still the occasion for passionate debate
