Theory in Social and Cultural Anthropology R. Jon McGee, Richard L. Warms, 2013-08-28 Social and cultural anthropology and archaeology are rich subjects with deep connections in the social and physical sciences Over the past 150 years the subject matter and different theoretical perspectives have expanded so greatly that no single individual can command all of it Consequently both advanced students and professionals may be confronted with theoretical positions and names of theorists with whom they are only partially familiar if they have heard of them at all Students in particular are likely to turn to the web to find quick background information on theorists and theories However most web based information is inaccurate and or lacks depth Students and professionals need a source to provide a quick overview of a particular theory and theorist with just the basics the who what where how and why if you will In response SAGE Reference plans to publish the two volume Theory in Social and Cultural Anthropology An Encyclopedia Features Benefits Two volumes containing approximately 335 signed entries provide users with the most authoritative and thorough reference resource available on anthropology theory both in terms of breadth and depth of coverage To ease navigation between and among related entries a Reader s Guide groups entries thematically and each entry is followed by Cross References In the electronic version the Reader s Guide combines with the Cross References and a detailed Index to provide robust search and browse capabilities An appendix with a Chronology of Anthropology Theory allows students to easily chart directions and trends in thought and theory from early times to the present Suggestions for Further Reading at the end of each entry and a Master Bibliography at the end guide readers to sources for more detailed research and discussion

Dillon,2025-04-15 Cultural Ecologies of the Land is a radical and challenging reassessment of the way we relate to the land and to infrastructure There was a time when the land defined us Now with each passing year we are increasingly detached from it It was once the centre stage of humanity now it is the setting for a technological drama What has happened and why does it matter This book is a multi layered account of people and environment shaping each other through cumulative moment to moment day to day change and a template for thinking about place locality belonging and identity Cultural Ecologies of the Land presents the existential crisis that many believe we now face as a systemic problem arising from social institutions and forms of behaviour that have been marginalised with our dependency on modern infrastructure It explains the part people have played in contributing to the crisis and how regenerating relationships with the land offers a route towards alleviating it This is not

only about acknowledging our impact on Earth but also about understanding ourselves in relation to it how we engage with our surroundings make sense of them live and work in them and create narratives that connect and sustain us
