Our Humble Helpers - Familiar Talks On The Domestic Animals Jean-Henri Fabre,2013-01-04 A

wonderful introduction to common farm animals and life in the countryside for young readers Written as a grandfather talking to his family this book is full of beautiful imagery and information Many of the earliest books particularly those dating back to the 1900s and before are now extremely scarce and increasingly expensive We are republishing these classic works in affordable high quality modern editions using the original text and artwork **Animals Talking in All Caps** Justin Valmassoi, 2013-08-06 A goat who wants to sell you some meth A giraffe who might be violating his restraining order An alpaca with a very dirty secret A cat who's really mad at you for cancelling Netflix instant These are just a few of the hilariously human animals you'll meet in *Animals Talking in All Caps* Inspired by the wildly popular blog of the same name and including some of the site's best loved entries as well as gobs of never before seen material these pages provide a brilliantly unhinged glimpse into the animal mind *The Secret Perfume of Birds* Danielle J. Whittaker, 2022-03-01 The untold story of a stunning discovery not only can birds smell but their scents may be the secret to understanding their world Winner of the PROSE Award for Best Book in Popular Science and Mathematics The puzzling lack of evidence for the peculiar but widespread belief that birds have no sense of smell irked evolutionary biologist Danielle Whittaker Exploring the science behind the myth led her on an unexpected quest investigating mysteries from how juncos win a fight to why cowbirds smell like cookies In *The Secret Perfume of Birds* part science part intellectual history and part memoir Whittaker blends humor clear writing and a compelling narrative to describe how scent is important not just for birds but for all animals including humans Whittaker engagingly describes how emerging research has uncovered birds' ability to produce complex chemical signals that influence their behavior including where they build nests when they pick a fight and why they fly away Mate choice or sexual selection a still enigmatic aspect of many animals' lives appears to be particularly influenced by smell Whittaker's pioneering studies suggest that birds' sexy and scary signals are produced by symbiotic bacteria that manufacture scents in the oil that birds stroke on their feathers when preening From tangerine scented auklets to her beloved juncos redolent of moss birds from across the world feature in Whittaker's stories but she also examines the smelly chemicals of all kinds of creatures from iguanas and bees to monkeys and humans Readers will enjoy a rare opportunity to witness the twisting roads scientific research can take especially the challenging hilarious and occasionally dangerous realities of ornithology in the wild *The Secret Perfume of Birds* will interest anyone looking to learn more about birds about how animals and humans use our senses and about why it can sometimes take a rebel scientist to change what we think we know for sure about the world and ourselves **Living with Animals** Natalie Porter, Ilana M. Gershon, 2018-09-15 *Living with Animals* is a collection of imagined animal guides a playful and accessible look at different human-animal relationships around the world Anthropologists and their co-authors have written accounts of how humans and animals interact in labs in farms in zoos and in African forests among other places Modeled after the classic *A World of Babies* an edited collection of imagined Dr Spock manuals from around the world *With Animals* focuses on human-animal relationships in their myriad

forms This is ethnographic fiction for those curious about how animals are used for a variety of different tasks around the world To be sure animal guides are not a universal genre so Living with Animals offers an imaginative solution doing justice to the ways details about animals are conveyed in culturally specific ways by adopting a range of voices and perspectives How we capitalize on animals how we live with them and how humans attempt to control the untamable nature around them are all considered by the authors of this wild read If you have ever experienced a moment of what if curiosity what is it like to be a gorilla in a zoo to work in a pig factory farm to breed cows and horses this book is for you A light handed and light hearted approach to a fascinating and nuanced subject Living with Animals suggests many ways in which we can and do coexist with our non human partners on Earth
