What a Bee

Knows Stephen L. Buchmann, 2023-03-07 For many of us the buzzing of a bee elicits panic But the next time you hear that low droning sound look closer the bee has navigated to this particular spot for a reason using a fascinating set of tools She may be using her sensitive olfactory organs which provide a 3D scent map of her surroundings She may be following visual landmarks or instructions relayed by a hive mate She may even be tracking electrostatic traces left on flowers by other bees What a Bee Knows Exploring the Thoughts Memories and Personalities of Bees invites us to follow bees mysterious paths and experience their alien world Although their brains are incredibly small just one million neurons compared to humans 100 billion bees have remarkable abilities to navigate learn communicate and remember In What a Bee Knows entomologist Stephen Buchmann explores a bee s way of seeing the world and introduces the scientists who make the journey possible We travel into the field and to the laboratories of noted bee biologists who have spent their careers digging into the questions

most of us never thought to ask for example Do bees dream And if so why With each discovery Buchmann s insatiable curiosity and sense of wonder is infectious What a Bee Knows will challenge your idea of a bee s place in the world and perhaps our own This lively journey into a bee s mind reminds us that the world is more complex than our senses can tell us
