luminaries and occult scholars For millions of people the spiritual journey is focused on a God in heaven But what if the answers we are seeking lie in the re enchantment of life In this illuminating work part memoir part meditation scholar and pagan practitioner Christopher McIntosh takes readers on the deeply personal quest that led him to paganism illustrating how forming stronger connections to the world around us awakens the magic that lives within us There was a time when McIntosh believed that a spiritual path should fulfill four centers the soul the mind the heart and the belly He later discovered however that there was a fifth component to this mystical equation the feet The land on which we stand and to which we feel a profound relatedness is the key to wholeness and inner peace These subtle but significant realizations about connection to the land and nature inspired McIntosh and ultimately led to his following of what he calls the Fivefold Path He also recounts pivotal meetings with pagan luminaries and important figures from esoteric scholarship the arts and the occult renaissance of the twentieth century including Colin Wilson Joscelyn Godwin Keith Critchlow and Nicholas Goodrick Clarke as well as offers an evolving portrait of the occult scene of the late twentieth century Woven throughout with examples of seasonal rites and rituals reflections on sacred gardening and the practice of energetic breath work as well as a deep dive into Stav a form of Nordic Tai Chi this book provides valuable insight into the pagan world as both a field of study and a system of practice

Between Chance and Choice Harald Atmanspacher, Robert Bishop, 2014-06-23 Are choice and free will possible in a world governed by deterministic fundamental equations What sense would determinism make if many events and processes in the world seemed to be governed by chance These and many other questions emphasize the fact that chance and choice are two leading actors on stage whenever issues of determinism are under discussion This volume collects essays by accomplished scientists and philosophers addressing numerous facets of the concept of determinism The contributions cover viewpoints from mathematics physics cognitive science and social science as well as various branches of philosophy They offer valuable reading for everyone interested in the interdisciplinary relations between determinism chance and free will The desire to foster an interdisciplinary dialogue on determinism chance and free will was the initial impetus leading to an international workshop on determinism taking place at Ringberg Castle near Lake Tegernsee south of Munich in June 2001 Representatives from mathematics physics cognitive and social science and various branches of philosophy convened to discuss numerous aspects of determinism from their disciplinary perspectives This volume is based on elaborated and refereed manuscripts of their lectures

The Whispering Pond Ervin Laszlo, 1999 Designing Ecological Settlements Margrit Kennedy, Declan Kennedy, 1997 *Active Astrology* , **The Creative Cosmos** Ervin Laszlo, 1993 Considered one of the world's foremost exponents of systems philosophy and general evolution theory the author aims to challenge our very understanding of reality itself

More Than Life Stéphane Symons, 2017-09-15 More Than Life Georg Simmel and Walter Benjamin on Art is the first book to trace the philosophical relation between Georg Simmel and his one time student Walter Benjamin two of the most influential German thinkers of the twentieth century Reading Simmel's

work particularly his essays on Michelangelo Rembrandt and Rodin alongside Benjamin's concept of *Unscheinbarkeit* inconspicuousness and his writings on Charlie Chaplin *More Than Life* demonstrates that both Simmel and Benjamin conceive of art as the creation of something entirely new rather than as a mimetic reproduction of a given. The two thinkers diverge in that Simmel emphasizes the presence of a continuous movement of life whereas Benjamin highlights the priority of discontinuous interruptive moments. With the aim of further elucidating Simmel and Benjamin's ideas on art Stéphane Symons presents a number of in-depth analyses of specific artworks that were not discussed by these authors. Through an insightful examination of both the conceptual affinities and the philosophical differences between Simmel and Benjamin Symons reconstructs a crucial episode in twentieth-century debates on art and aesthetics. **Truth in Serial Form** Malika

Maskarinec, 2023-04-27 This volume has its starting point in the veritable explosion of serialized formats in all of forms representation from painting to printing beginning in the mid-nineteenth century and the well-known fascination with series in biology mathematics music art or literature. The new media culture of the late nineteenth century very much shaped by these serialized formats sees itself confronted with questions of truthfulness in new and profound ways just as perhaps the accelerated rhythm anonymity and broadened accessibility of new media today have created new possibilities for the dissemination of misinformation and conversely give us cause to interrogate anew our notions of truthfulness. By examining both the formal operations of both aesthetic and scientific objects in a series form and the historical context of their publication or presentation the contributions in this volume examine the often strained but yet immensely productive relationship between the way in which a series negotiates questions of truthfulness both by reference to the rules established in its series form or by means of its serial format. This volume provides ten detailed cases of the series form from the history of science and journalism and the history of painting photography and literature as well. **Branded** Emmy

Hennings, 2022-02-04 When *Branded: A Diary* was published in Berlin in 1920 Emmy Hennings was called the most important woman writer of her day. Her autobiographical novel offers a sharp critique of patriarchy and the social injustices of the last decade of the German Empire infused with a mysticism that celebrates sexual love as a spiritual gift and assigns saintly status to beggars and sex workers. Drawing on the experimentation of Dadaists and Expressionists and inspired by modern technologies such as the camera and gramophone Hennings radically shatters novelistic conventions. Over a century after the novel's publication this translation finally introduces an important modernist voice to English language readers accompanied by an illuminating selection of contextual materials and an informative introduction. **Bailey-Fahrenkrüger's**

Hotel as Setting in Early Twentieth-century German and Austrian Literature Bettina Matthias, 2006 The employment of the hotel as a setting for literary works of the period and the cultural reasons behind it As the bourgeois concept of home became problematic after important changes in German speaking society during the 19th century many fiction writers chose the literary setting of the hotel to explore the status of the individual and the notions of public and private As social microcosms hotels are fitting experimental settings for literary inquiries into the tension between the individual's quest for a place in the world and the technocratic rationalism of modern life The book has two parts the first establishing the cultural and theoretical context and the second providing analyses of literary works set in hotels A brief history of commercial hospitality and a chapter establishing the theoretical framework of the hotel as a paradigmatic ambivalent semi public and stage like modern space lead to readings of texts by Schnitzler Zweig Werfel Kafka Thomas Mann Joseph Roth and Vicki Baum Bettina Matthias is Associate Professor of German at Middlebury College

Germaine de Staël in Germany Judith E. Martin, 2011-05-12 Germaine de Staël and German Women Gender and Literary Authority 1800 1850 investigates Staël's significance as an icon of female artistic genius and political engagement for two generations of German women including Caroline A Fischer Caroline Pichler Johanna Schopenhauer Bettina von Arnim Ida Hahn Hahn and Luise Mühlbach These authors drew a significant impetus from Staël's exemplary life and writings especially her influential novels of political and artistic heroines *Delphine* 1802 and *Corinne or Italy* 1807 referring to them in order to authorize their own discourses on art and politics and to buttress their identity as writers in a period when female authorship generated intense controversy Taking references to Staël and her texts as a starting point opens fresh perspectives on German women's novels while at the same time revealing their authors' participation in the broader European women's literary tradition Whereas several novels from the first decade of the century echo *Delphine* by uniting domestic fiction with political themes Staël's epoch making novel of female poetic genius *Corinne* left a more lasting literary legacy in a tradition of German female artist novels *Corinne* exemplified the creative woman's dilemma between fame and love and subsequent German novelists explore this conflict while several also emulate Staël's myth making in *Corinne* as a strategy for attributing transcendent genius to their heroines Reading for subtexts of female self expression and development brings to light counter narratives of female creative transcendence often evoked through allusions to mythological figures Martin suggests a revision of German literary history by uncovering a neglected tradition of artist novels positioned between the German *Künstlerroman* and Staël's newly inaugurated international dialogue on women's role in public culture
