S. Nijenhuis, Kathy Steele, 2006-11-17 Life is an ongoing struggle for patients who have been chronically traumatized They typically have a wide array of symptoms often classified under different combinations of comorbidity which can make assessment and treatment complicated and confusing for the therapist Many patients have substantial problems with daily living and relationships including serious intrapsychic conflicts and maladaptive coping strategies Their suffering essentially relates to a terrifying and painful past that haunts them Even when survivors attempt to hide their distress beneath a facade of normality a common strategy therapists often feel besieged by their many symptoms and serious pain Small wonder that many survivors of chronic traumatization have seen several therapists with little if any gains and that quite a few have been labeled as untreatable or resistant In this book three leading researchers and clinicians share what they have learned from treating and studying chronically traumatized individuals across more than 65 years of collective experience Based on the theory of structural dissociation of the personality in combination with a Janetian psychology of action the authors have developed a model of phase oriented treatment that focuses on the identification and treatment of structural dissociation and related maladaptive mental and behavioral actions The foundation of this approach is to support patients in learning more effective mental and behavioral actions that will enable them to become more adaptive in life and to resolve their structural dissociation This principle implies an overall therapeutic goal of raising the integrative capacity in order to cope with the demands of daily life and deal with the haunting remnants of the past with the unfinished business of traumatic memories Of interest to clinicians students of clinical psychology and psychiatry as well as to researchers all those interested in adult survivors of chronic child abuse and neglect will find helpful insights and tools that may make the treatment more effective and efficient and more tolerable for the suffering patient Psychosis, Trauma and Dissociation Andrew Moskowitz, Martin J. Dorahy, Ingo Schäfer, 2019-01-29 An invaluable sourcebook on the complex relationship between psychosis trauma and dissociation thoroughly revised and updated This revised and updated second edition of *Psychosis Trauma and Dissociation* offers an important resource that takes a wide ranging and in depth look at the multifaceted relationship between trauma dissociation and psychosis The editors leaders in their field have drawn together more than fifty noted experts from around the world to canvas the relevant literature from historical conceptual empirical and clinical perspectives The result documents the impressive gains made over the past ten years in understanding multiple aspects of the interface between trauma dissociation and psychosis The historical conceptual section clarifies the meaning of the terms dissociation trauma and psychosis proposes dissociation as central to the historical concepts of schizophrenia and borderline personality disorder and considers unique development perspectives on delusions and the onset of schizophrenia The empirical section of the text compares and contrasts psychotic

and dissociative disorders from a wide range of perspectives including phenomenology childhood trauma and memory and cognitive disturbances whilst the clinical section focuses on the assessment differential diagnosis and treatment of these disorders along with proposals for new and novel hybrid disorders This important resource Offers extensive updated coverage of the field from all relevant perspectives Brings together in one text contributions from scholars and clinicians working in diverse geographical and theoretical areas Helps define and bring cohesion to this new and important field Features nine new chapters on conceptions of trauma dissociation and psychosis PTSD with psychotic features delusions and memory trauma treatment of psychotic symptoms and differences between the diagnostic groups on hypnotizability memory disturbances brain imaging auditory verbal hallucinations and psychological testing Written for clinicians researchers and academics in the areas of trauma child abuse dissociation and psychosis but relevant for psychiatrists psychologists and psychotherapists working in any area the revised second edition of Psychosis Trauma and Dissociation makes an invaluable contribution to this important evolving field

Models of Madness Dr John Read, Professor Richard Bentall, Loren Mosher, John Read, Jacqui Dillon, 2013-06-19 Are hallucinations and delusions really symptoms of an illness called schizophrenia Are mental health problems really caused by chemical imbalances and genetic predispositions Are psychiatric drugs as effective and safe as the drug companies claim Is madness preventable This second edition of *Models of Madness* challenges those who hold to simplistic pessimistic and often damaging theories and treatments of madness In particular it challenges beliefs that madness can be explained without reference to social causes and challenges the excessive preoccupation with chemical imbalances and genetic predispositions as causes of human misery including the conditions that are given the name schizophrenia This edition updates the now extensive body of research showing that hallucinations delusions etc are best understood as reactions to adverse life events and that psychological and social approaches to helping are more effective and far safer than psychiatric drugs and electroshock treatment A new final chapter discusses why such a damaging ideology has come to dominate mental health and most importantly how to change that *Models of Madness* is divided into three sections Section One provides a history of madness including examples of violence against the mentally ill before critiquing the theories and treatments of contemporary biological psychiatry and documenting the corrupting influence of drug companies Section Two summarises the research showing that hallucinations delusions etc are primarily caused by adverse life events eg parental loss bullying abuse and neglect in childhood poverty etc and can be understood using psychological models ranging from

cognitive to psychodynamic Section Three presents the evidence for a range of effective psychological and social approaches to treatment from cognitive and family therapy to primary prevention This book brings together thirty seven contributors from ten countries and a wide range of scientific disciplines It provides an evidence based optimistic antidote to the pessimism of biological psychiatry Models of Madness will be essential reading for all involved in mental health including service users family members service managers policy makers nurses clinical psychologists psychiatrists psychotherapists counsellors psychoanalysts social workers occupational therapists art therapists

Psychosis as a Personal Crisis Marius Romme, Sandra Escher, 2013-03-01 Psychosis as a Personal Crisis seeks to challenge the way people who hear voices are both viewed and treated This book emphasises the individual variation between people who suffer from psychosis and puts forward the idea that hearing voices is not in itself a sign of mental illness In this book the editors bring together an international range of expert contributors who in their daily work their research or their personal acquaintance focus on the personal experience of psychosis Further topics of discussion include accepting and making sense of hearing voices the relation between trauma and paranoia the limitations of contemporary psychiatry the process of recovery This book will be essential reading for all mental health professionals in particular those wanting to learn more about the development of the hearing voices movement and applying these ideas to better understanding those in the voice hearing community

Life Writing and Schizophrenia Mary Elene Wood, 2013-09-05 How do you write your life story when readers expect you not to make sense How do you write a case history that makes sense when face to face with schizophrenia your ability to tell a diagnostic story begins to fall apart This book examines work in several genres of life writing autobiography memoir case history autobiographical fiction focused either on what it means to live with schizophrenia or what it means to understand and treat people who have received that diagnosis Challenging the romanticized connection between literature and madness Life Writing and Schizophrenia explores how writers who hear voices and experience delusions write their identities into narrative despite popular and medical representations of schizophrenia as chaos violence and incoherence The study juxtaposes these narratives to case histories by clinicians writing their encounters with those diagnosed with schizophrenia encounters that call their own narrative authority and coherence into question Mary Wood is the author of The Writing on the Wall Women's Autobiography and the Asylum University of Illinois Press 1994 and has published articles on autobiography case history literature and psychiatry and narrative ethics in Narrative British Journal of Medical Ethics Journal of Trauma and Dissociation and American Literary Realism She teaches in the English Department at the University of Oregon

Psychosis and The Traumatized Self John Rhodes, 2022-03-28 Psychosis and the Traumatized Self explores what it is like to experience psychosis for individuals with histories of childhood physical and sexual abuse The book additionally explores how meaning expressed in psychosis might originate from the effects of abuse but also long term life difficulties motivations memories social history and struggles to narrate and understand One chapter focuses on refugees

who suffered trauma as adults and later became psychotic Another chapter examines how trauma leads to the destruction of certainty and trust thereby opening a pathway to persecutory ideas Drawing on a developmental model of trauma it is proposed that dissociated parts of the self that developed during childhood contribute to psychosis in adults when undergoing difficulties and stress Presented with case illustrations the book will be useful for those who work in the area of psychosis and abuse to understand the experiences of individuals and how we might develop appropriate therapy and care
