Dissonances of the Mind Stanislav Tregub, 2020-08-08 In psychotherapy and psychiatry mental illness diagnostics is limited to the description of symptoms and has nothing to do with assessing the state of the organ that performs the mental functions In other branches of medicine any diagnosis aims to answer the question about the physical disturbance of the internal technology of the body But the Mind remains outside of this correct approach As a result all systemic mental pathologies are currently incurable This absurd situation is due to the lack of a physically grounded theoretical model of the Mind Without it practical treatment of the disorders remains wandering in the dark How can we fix something if there is no understanding of what it is and how it works Within the Teleological Transduction Theory developed in the previous volumes of the series harmony of the Mind is a physical concept of normal functioning Respectively when the pathologies are described as dissonances it is not a metaphor but a reference to the physical malfunction leading to the disintegration of the Mind The book proposes a new approach to the diagnosis and classification of mental pathologies based on an assessment of the state of the physical mechanism of the Mind and violations of the technological algorithm of the brain The goal is to create the concept as a universal tool that can be used in various pathologies The book offers a model of systemic pathologies such as autism and schizophrenia which reveals the essence of the physical problem that causes the observed symptoms This could be the beginning of a project that will overcome the current chaotic state of the field of psychopathology and harmonize our diagnosis and treatment of mental illness as disorders of the brain

Psychosis in the Family Janet C. Love, 2018-03-29 This is a book written not just by a professional transpersonal psychotherapist but by someone who has walked the heart rending path and experienced the psychological trauma of loving someone in psychosis psychosis which still remains the greatest taboo in society today together with its implicit diagnosis of a lifelong sentence of medication and no cure It is in the main a personal and moving narrative of a mother looking to help her son avoid such a lifelong sentence of medication whilst trying to research holistic resources and alternative approaches for treatment at the same time as negotiating the vagaries of the current mental health system It is often a tale of despair and frustration yet also gives a compassionate voice Transpersonal and transgenerational psychotherapeutic insights back up the personal narrative It includes an accessible inquiry into how unconscious forces influence our mind our bodies and the entire family system Its hypothesis is that if we cannot understand our own unconscious responses how can we understand those of our loved ones in psychotic episodes
