Scholars And Statesmen Higher Education And Government Policy:

Scholars and Statesmen Kenneth H. Ashworth, 1972 The True Genius of America at Risk Katherine C.

Lyall, Kathleen R. Sell, 2005-12-30 Lyall and Sell have opened a candid public policy discussion about the future of public universities This is the only book length treatment of public higher education finance at the beginning of the 21st century that looks comprehensively at state experiments and dilemmas and attempts to envision possible future paths Lyall and Sell describe market forces that are eroding the traditional partnership between states and public universities By outlining how the search for new revenue sources is refocusing the basic goals of public universities the authors clarify what has gone wrong and what can be done to save these valuable American institutions A perfect storm of fiscal and political trends is rapidly forcing the privatization of America's public universities Unless those who care about preserving these valuable public assets redefine the core purposes of public higher education college will quickly become a very difficult goal for lower income citizens to achieve and the economic future of America will suffer as a consequence To help avoid this crisis Lyall and Sell have opened a candid public policy discussion about the future of public universities This is the only book length treatment of public higher education finance at the beginning of the twenty first century that looks comprehensively at state experiments and dilemmas and attempts to envision possible future paths Lyall and Sell describe market forces that are eroding the traditional partnership between states and public universities and explain how the search for new revenue sources is refocusing the basic goals of public universities Through their focus on the past and the future of public higher education the authors manage to clarify what has gone wrong and what can be done to save these valuable American institutions A number of new state experiments in restructuring higher education governance and organization are summarized and used as models in the work Both economic and political evidence is also summarized for the reader's benefit The authors demonstrate how the interaction between recent trends has driven unintended consequences Chapters in the book stand on their own and can be used selectively in courses and appendix pages provide thumbnail summaries of individual issues Higher education leaders governors and legislators with education and economic development agendas and statewide education governing boards should all find this book to be of strong interest *Lobbying for Higher Education* Constance Ewing Cook, 1998 Historically many faculty and administrators in higher education have regarded themselves as above the fray part of the national interest not a special interest and considered lobbying a dirty business unworthy of their lofty enterprise Now that academia no longer enjoys all the respect and good will that federal policy makers once afforded it that attitude has changed The Republican sweep of the 1994 Congressional elections served as a wake up call for the higher education community In response it made a spirited effort to gain attention for its own policy preferences Lobbying for Higher Education is about how the major higher education associations and the constituent American colleges and universities try to influence federal policy especially congressional policy In clear prose Cook explains how the higher

education community organizes itself in Washington how it lobbies and how its major interest groups are perceived both by their own members and by public officials The book focuses on the crucial development in 1995 1996 of a new lobbying paradigm which included the greater use of campus based resources and ad hoc coalitions The most engrossing part of its story is higher education s creative response to the policy turmoil and disruption of the status quo that resulted from the shift in congressional party control The author Constance Cook uses sources unique to this project over 1 500 survey responses from college and university presidents a 62% return rate and nearly 150 interviews with institutional and association leaders Fortuitously the 1994 electoral upheaval provided her with an opportunity to capture analyze and interpret the responses of her subjects in a period of unusually sweeping change Lobbying for Higher Education is a timely book with an interesting and important story at its core

Shaw, 2004 This volume examines academic careers and career making endeavors in contemporary society It serves as a critical forum for theoretical reflection and generalization a thought provoking reference for institutional innovation and reform and a down to earth guide for individual learning and practice
