Nugent,2023-10-20 Through close examination of a set of educational works discovered among the Dunhuang manuscripts this book presents new insights into the literary training undertaken by the elite of medieval China In their contents and structures these works tell us what parts of the literary and cultural inheritance the elite were expected to learn and how they learned them The material aspects of these manuscripts

including handwriting copying errors and paratextual additions show how students in Dunhuang used and reproduced them What emerges is a picture of a literary education that is more diverse in its sources and also more haphazard than previously imagined   *The Journal of the European Society for Textual Scholarship.* Wim Van Mierlo,Alexandre Fachard,2013 This volume is the 10th issue of Variants In keeping with the mission of the European Society for Textual Scholarship the articles are richly interdisciplinary and transnational They bring to bear a wide range of topics and disciplines on the field of textual scholarship historical linguistics digital scholarly editing classical philology Dutch English Finnish and Swedish Literature publishing traditions in Japan book history cultural history and folklore The questions that are explored what texts are worth editing what is the nature of the relationship between text work document and book what is a critical digital edition all return to fundamental issues that have been at the heart of the editorial discipline for decades With refreshing insight they assess the increasingly hybrid nature of the theoretical considerations and practical methodologies employed by textual scholars while reasserting the relevance and need for producing scholarly editions whether in print or digital and continuing advanced research in bibliographical codes textual transmissions genetic dossiers the fluidity of texts and other such Subjects that connect textual scholarship with broader investigations into our nations literary culture and written heritage

Textual Scholarship and the Material Book Wim Van Mierlo,2007 In the last decades the emphasis in textual scholarship has moved onto creation production process collaboration onto the material manifestations of a work onto multiple rather than single versions onto reception and book history Textual scholarship now includes not only textual editing but any form of scholarship that looks at the materiality of text of writing of reading and of the book The essays in this collection explore many questions about methodology and theory arising from this widening scope of textual scholarship The range of texts discussed from Sanskrit epic via Medieval Latin commentary through English and Scottish Ballads to the plays of Samuel Beckett and the stories of Guimar es Rosa testifies to the vigour of the discipline The range of texts is matched by a range of approach from theoretical discussion of how text happens to analysis of issues of book design and censorship the

connections between literary and textual studies exploration of the links between reception and commodification in George Eliot and between information theory and paratext Through this diversity of subject and approach a common theme emerges the need to look further for common ground from which to continue the debate from a comparative perspective **Emily Dickinson's Open Folios** Emily Dickinson,Marta L. Werner,1995 Undertakes a radically new model of critical editing Becoming Marianne Moore Marianne Moore,2002 These notes in turn point readers to narrative accounts of Moore s associations with her early publishers that offer a range of historical contextual biographical and bibliographic information about the publication events of Moore s poems and explore her attempts to shape her literary career in concert with some of her most famous modernist peers Richard Aldington H D Harriet Monroe Ezra Pound and William Carlos Williams BOOK JACKET The Isle of Pines, 1668 John Scheckter,2016-03-09 A short fiction of shipwreck and discovery written by the politician Henry Neville 1620 1694 The Isle of Pines is only beginning to draw critical attention and until now no scholarly edition of the work has appeared In the first full length study of The Isle of Pines supported by the first fully critical edition John Scheckter discloses how Neville s work offers a critique of scientific discourse enacts complicated engagements of race and gender and interrogates the methods and consequences of European exploration The volume offers a new critical model for applying post colonial and postmodern examination strategies to an early modern work Scheckter argues that the structure and publication history of the fiction with its separate unreliable narrators along with its several topics shipwreck survival the founding of a new society the initial phases of European colonization are imbued with the sense of uncertainty that permeated the era Shakespeare and the Imprints of Performance J. Gavin Paul,2014-09-04 Within the study of drama the question of how to relate text and performance and what interpretive tools are best suited to analyzing them is a longstanding and contentious one Most scholars agree that reading a printed play is a means of dramatic realization absolutely unlike live performance but everything else beyond this premise is contestable how much authority to assign to playwrights the extent to which texts and readings determine performance and the capability of printed plays to communicate the possibilities of performance Without denying that printed plays distort and fragment performance practice this book negotiates an intractable debate by shifting attention to the ways in which these inevitable distortions can nevertheless enrich a reader s awareness of a play s performance potentialities As author J Gavin Paul demonstrates printed plays can be more meaningfully engaged with actual performance than is typically assumed via specific editorial principles andstrategies Focusing on the long history of Shakespearean editing he develops the concept of the performancescape a textual representation of performance potential that gives relative shape and stability to what is dynamic and multifarious
