[The Digital Citizenship Handbook for School Leaders](#) Mike Ribble,Marty Park,2022-08-24 Learn how to develop a meaningful approach to embedding digital citizenship into an established program helping your students succeed in a digital world In today s schools and districts just saying no to bad technology practices is not enough This leadership posture can take the form of extreme blocking and filtering of websites providing little access to devices and declining to integrate digital tools and resources into learning out of fear of what else a student might do Such a mindset can also lead to adults choosing not to engage or being unable to engage in conversations when students share stories about what a peer did online or through the latest app Digital citizenship curriculum needs to be taught at two levels at once horizontal the world immediately around students and vertical connecting to the rest of the world

This book provides education leaders a strategic road map that demonstrates how to incorporate these concepts into the curriculum so that digital citizenship isn't just one more thing but is threaded into the DNA of how educators teach and work. The book Provides a five year plan for developing a digital citizenship program in your school. Covers such topics as digital ethics and leveled approaches to digital citizenship. Walks through the digital citizenship responsibilities and opportunities inherent in various roles including library media specialists classroom educators and special ed teachers. Offers strategies for spreading digital citizenship internationally and explores the future of digital citizenship. The book offers school and district leaders a path toward a shared and collective understanding so that digital citizenship is embedded in the way students and educators interact with technology and each other.
