School Desegregation Research New Directions In Situational Analysis:

School Desegregation Research Jeffrey Prager, Douglas Longshore, Melvin Seeman, 2012-12-06 The desegregation situation is the keynote theme of the following chapters I Each of them touches on a different dimension of the situation the historical the temporal the spatial But the reader perusing the essays with the situation in mind should remember that the desegregation situation should not be interpreted literally Authorities and adults certainly school age children probably are influenced by their awareness of a sequence of past and future situations Some may even operate with William James's 1890 p 608 notion of the specious present that has melted in our grasp fled ere we could touch it gone in the instant of becoming thus reducing the potency of the present situation Others may be dancing to a slower tempo of change thus becoming more responsive to the present situation Whatever the perceived tempo many must share the view that the future may reverse the direction of the past Some may see that new future direction as unswerving unending or long lasting others may see it as short lived And it is through attention to the phenomenological description of desegregation that these issues can be explored a theme that is considered in several of the following chapters

Stubborn Roots Prudence L. Carter, 2012-05-01 What are the features of the school environment that make students of color incorporation greater at some schools than at others Prudence L Carter seeks to answer this basic but bedeviling question through a rich comparative analysis of the organizational and group dynamics in eight schools located within four cities in the United States and South Africa two nations rebounding from centuries of overt practices of racial and social inequality Stubborn Roots provides insight into how school communities can better incorporate previously disadvantaged groups and engender equity by addressing socio cultural contexts and promoting cultural flexibility It also raises important and timely questions about the social political and philosophical purposes of multiracial schooling that have been greatly ignored by many and cautions against narrow approaches to education that merely focus on test scores and resources There are simply not enough texts that look comparatively at the two foremost experiments with questions of race culture and class in the English speaking world the United States and South Africa Prudence Carter's work is simultaneously scholarly and compassionate It helps us see in these two benighted but globally important societies how easily things break but also how well when structures are in place and when human agency takes flight individuals and the groups to which they belong flourish and grow Crain Soudien Professor of Education University of Cape Town In this ambitious mixed method study Carter analyzes the social and symbolic boundaries that account for disparate educational experiences by race in the United States and South Africa Resources are only part of the answer equally important she argues are the cultural and institutional conditions that make students feel they are valued contributors of the community Thus school policies about hairstyle dress codes tracking extracurricular activities and language use are among the important dimensions that enable or discourage engagement in students Educators policymakers and scholars alike have much to learn from this agenda setting work Michele Lamont

The Social Psychology of Procedural Justice E. Allan Lind, Tom R. Tyler, 2013-06-29 We dedicate this book to John Thibaut He was mentor and personal friend to one of us and his work had a profound intellectual influence on both of us We were both strongly influenced by Thibaut's insightful articulation of the importance to psychology of the concept of procedural justice and by his empirical work with Laurens

Walker in reactions to legal institutions demonstrating the role of procedural justice The great importance we accord the Thibaut and Walker work is evident throughout this volume If anyone person can be said to have created an entire field of inquiry John Thibaut created the psychological study of procedural justice To honor Thibaut thus in no sense reduces our recognition of the contributions of his co worker Laurens Walker in the creation of the field We are as certain that Walker would endorse our statement as we are that Thibaut with characteristic modesty would demur from it Even to praise Thibaut in this fashion falls short of recognizing all of his contributions to procedural justice Not only did he initiate the psychological study of the topic he also built much of the intellectual foundation upon which the study of procedural justice rests Thibaut's work with Harold Kelley 1959 Kelley Thibaut 1978 created a social psychological theory of interdependence that among many other applications serves as the basis for one of the major models of the psychology of procedural justice

Justice in Social Relations Hans Werner Bierhoff, Ronald L. Cohen, Jerald Greenberg, 2013-11-11 From July 16 through July 21 1984 a group of American and West German scholars met in Marburg West Germany to discuss their common work on the topic of justice in social relations For over 30 hours they presented papers raised questions about each other's work and in so doing plotted a course for future research and theory building on this topic The participants were asked to present work that represented their most recent state of the science contributions in the area The contributions to this volume represent refined versions of those presentations papers that have been improved by the authors consideration of the comments and reactions of their colleagues The result we believe is a work that represents the cutting edge of scholarly inquiry into the important matter of justice in social relations To give the participants the freedom to present their ideas in the most appropriate way we the conference organizers and the editors of this volume gave them complete control over the form and substance of their presentations The resulting diversity is reflected in this book where the reader will find critical integrative reviews of the literature reports of research investigations and statements of theoretical positions The chapters are organized with respect to the common themes that emerged in the way the authors addressed the issues of justice in social relations Each of these themes conflict and power theoretical perspectives norms and applications is represented by a part of this book

Justice Ronald L. Cohen, 2013-11-11 Ronald L. Cohen Justice is a central moral standard in social life It is invoked in judging individual persons and in judging the basic structure of societies It has been described as akin to a human hunger or thirst Pascal Pensees cited in Hirschman 1982 p 91 more powerful than any physical hunger and endlessly resilient Pitkin 1981 p 349 The most prominent contemporary theory of justice proceeds from the claim that justice is the first virtue of social institutions as truth is systems of thought Rawls 1971 p 3 However as the following chapters demonstrate justice has a complex and controversial history If as has been claimed justice is a central category of human thought and a central aspect of human motivation can it also be the case that to invoke justice is no more than banging on the table an emotional expression which turns one's demand into an absolute postulate Ross 1959 p 274 If justice is the first

virtue of social institutions can the concept of social or economic justice at the same time be entirely empty and meaningless so that any attempt to employ it is either thoughtless or fraudulent Hayek 1976 pp xi xii In a formal sense justice concerns ensuring that each person receives what she or he is due *Mitigating Learner Disadvantages in Teaching and Learning* Hai-Jew, Shalin, 2025-03-07 Education serves as a powerful tool for advancing individuals and society but learners enter formal education with vastly different opportunities backgrounds and challenges Addressing these disparities requires a commitment to equitable access personalized support and inclusive learning environments that recognize diverse needs By fostering a growth mindset and providing the right incentives education can empower all learners to reach their full potential without reinforcing systemic inequities Achieving social justice in education means creating pathways for every student to succeed regardless of their starting point through policies and practices that acknowledge and address these differences A holistic approach to education ensures that the needs of the whole learner are met making learning more meaningful accessible and transformative for all *Mitigating Learner Disadvantages in Teaching and Learning* explores how to ensure that all learners have full access to learning and to the potential of their best selves Furthermore it discusses how social justice in education can be achieved Covering topics such as incarcerated students mentorship programs and first generation learners this book is an excellent resource for teachers school administrators policymakers social justice advocates professionals researchers scholars academicians and more *Resources in Education* ,1992-10 **Readings on Equal Education** ,1997
