School Experience Explorations In The Sociology Of Education:

School Experience Peter Woods, Martyn Hammersley, 2017-04-28 First published in 1977 this volume brings together a range of viewpoints informed by reports of empirical research which bear on the experience of school. Each chapter demonstrates the application of the new sociology of education in its various guises to the world of teachers and pupils. In doing so they exemplify the fields of investigation opened up by these theoretical developments and also suggest directions ahead. The tensions in the articles reflect the tensions that existed in the sociology of education. By bringing them together the aim of this volume is to contribute to a more soundly based sociology of education. School Experience Peter Woods, 1977

The International Handbook on the Sociology of Education Carlos Alberto Torres, Ari Antikainen, 2003 This handbook discusses the social context of education outlining the challenges as well as the advances in public and private education systems at the start of the new millennium. It presents an integrated account of social theory and methodologies along with applied perspectives.

Perspectives on the Sociology of Education Philip Robinson, 2017-05-08 First published in 1981 this book provides a basic introduction to the sociology of education. It brings together many of the principal arguments in order to help the student reach an understanding of the multitude of conflicting opinions, theoretical positions and biases within the field. The work considers the structures within which the child, the family and the classroom are located, focusing on the theory and the ways in which they can be used to explain the workings of the educational system. It introduces not only the work of classical educational sociologists such as Durkheim, Weber and Marx but also more recent scholars such as Halsey Becker and Althusser. With a global coverage the book emphasizes the implications of the developments of the sociology of education for educational policy.

Sociology of Education: Theories and methods Stephen J. Ball, 2000 *Routledge Library Editions: Education Mini-Set L Sociology of Education* Various, 2021-06-23 Mini set L Sociology of Education re issues 48 volumes originally published between 1928 and 1990. The books in this mini set discuss Teaching and social change, research processes in education, class, race, culture and education, marxist perspectives in the sociology of education, the family and education, the sociology of the classroom and school organization.

The Occupational Experience of Residential Child and Youth Care Workers Jerome Beker, Mordecai Arieli, 2013-04-03 From open and straightforward accounts of residential care workers, *The Occupational Experience of Residential Child and Youth Care Workers* shows you how care is handled, not how it should be handled. This book introduces you to a social reality, a sometimes very difficult and challenging social reality as it is viewed by its participants. If you want to know more about what is actually going on in residential care and the discontent that workers frequently experience, this is the book that lays out the facts, the problems and the nature of residential youth centers. *The Occupational Experience of Residential Child and Youth Care Workers* broaches the problem of tension between workers and residents and hopes that bringing the problem out into the open will be a first step toward a solution. You learn that the very arrangement of residential care automatically sets up

antagonism between the sole group care worker and his her wards residents tend to resist the inherently coercive efforts of the worker who tries to bring them through processes of change and socialization The Occupational Experience of Residential Child and Youth Care Workers will make you think about residential care and conflicts group interaction career satisfaction and dissatisfaction interpretive sociology of education and its methodology social control Interviews with Israeli residential care workers are presented to help you understand the circumstances under which residential care providers experience discontent or job dissatisfaction You learn which workers are most likely to feel discontented and how staff members cope with the stress and discontent they experience Youth care workers policymakers child care staff recruiters supervisors and trainers will find this book sheds much light on the problem of discontent and the need to make child and youth care facilities more humane for residents and staff alike It will also help social work educators and researchers in sociology social work and the social psychology of education get in touch with what goes on inside the walls of residential care centers *Schooling, Ideology and the Curriculum (RLE Edu L)* Len Barton,Roland Meighan,Stephen

Peter Woods,2020-07-16 This book addressed to learning aspects emphasizes on reality as a social production on the individual s construction of meanings on a rational basis on the emergent and negotiated character of interaction and on how understandings are based on symbols such as mood and laughter **Dilemmas of Schooling (RLE Edu L)** Ann

Berlak,Harold Berlak,2012-04-27 This study illuminates how the everyday activity of teachers raises profound economic cultural ethical political and research issues and provides a new and fruitful way of examining the practice of teaching The

first part of the book offers a detailed description of sensitively recorded school situations arising from work carried out in a number of British primary schools From the analysis of their research the authors constructed a theoretical perspective for looking at schooling in the form of sixteen dilemmas the second half of the book is concerned with this perspective and shows how the dilemmas constitute a language for looking at everyday schooling and relating it to more general political social and cultural issues The book thus spans the gap in educational thinking between work with a firm empirical base and specifically theoretical studies Teaching Science Ralph Levinson,2005-08-05 Science education has undergone far reaching changes in the last fifty years The articles collected together in this reader examine how we have reached our present consensus and what theories we now use to explain how children learn science The central sections of the reader examine how all this can be translated into effective and stimulating teaching how learning can be most accurately and fairly assessed and how the impact of gender ethnicity and other factors on children s performance can be addressed in methods of teaching which make science accessible to all The articles in the final section of the book are a reminder that the debate is not finished yet and raise some challenging questions about what science education is and what it is for *New Teacher Education for the Future* Yin Cheong Cheng,King Wai Chow,Kwok Tung Tsui,2001-06-30 Serves to provide readers with an international understanding of how researchers and practitioners in different countries address some essential issues and initiatives in teacher education and development what they have found from their known and applied research and what the implications are of which are crucial to coping with challenges from the ongoing developments in teacher education **Histories of Everyday Life** Laura Carter,2021 This book is a social history of popular history in Britain between the end of the First World War and the 1970s It considers how ordinary people were taught history through books in school and museums and on BBC radio **Experiencing Comprehensive Education** Robert G. Burgess,2023-07-07 In this study first published in 1983 Robert Burgess discusses the definitions redefinitions strategies and bargains used in and out of classrooms by teachers and pupils in a co educational Roman Catholic school where he spent some time as a researcher and part time teacher He also looks at the role of the school s headmaster and his conception of the school and at the house and departmental staff This absorbing study will be of interest to teachers and students of sociology and education practicing and prospective school teachers researchers administrators policy makers and others who are concerned with schools and schooling Law in Action Max Travers,John F. Manzo,2016-12-05 Ethnomethodologists and Conversation Analysts have always been interested in the study of law and legal institutions and there is now a large body of empirical studies representing a range of analytic traditions in each field This collection introduces this literature and the research questions pursued by ethnomethodologists and conversation analysts in an accessible form to a general audience in the inter disciplinary field of law and society studies

Doing Fieldwork at Home Loukia K. Sarroub,Claire Nicholas,2021-03-24 This book engages readers via the international contributions from home field sites around the world and international authors Importantly the various chapters

address a wide spectrum of educational contexts ranging from higher education to K 12 public and private schools to prison schools The realistic accounts portrayed in each of the chapters address how local collaborations are instantiated through the research process from access and data collection to the write up phases The major themes that emerge across the chapters highlight 1 positionality and negotiation of multiple roles i e researcher educator colleague friend community member 2 reconciling multiple hybrid and intersectional identities with varying insider outsider statuses vis vis research participants 3 resulting power dynamics in connection to relational identities sometimes conflicting consolidating equalizing and or elevating 4 innovative methodological responses to these dilemmas and 5 integrated research designs and research ethics offering possibilities for participation and insights on the social impact of research findings The book s chapters thus individually and collectively treat and resolve local ways of doing home field work and highlight the creation and sharing of knowledge among researchers and research participants

Improving Subject Teaching Robin Millar, John Leach, Jonathan Osborne, Mary Ratcliffe, 2006-09-27 In many countries questions are being raised about the quality and value of educational research This book explores the relationship between research and practice in education It looks at the extent to which current practice could be said to be informed by knowledge or ideas generated by research and at the extent to which the use of current practices or the adoption of new ones are or could be supported by research evidence Science education is used as a case study but the issues considered apply to the teaching and learning of any curriculum subject The book draws on the findings of four inter related research studies and considers how research might be used to establish greater consensus about curriculum how research can inform the design of assessment tools and teaching interventions teachers and other science educators perceptions of the influence of research on their teaching practices and their students learning the extent to which evidence can show that an educational practice works

Doing Science (RLE Edu O) Robin Millar, 2012-05-31 Doing Science is unique in seeking to make explicit the links between science education and science studies These fields of study and their respective academic communities whilst appearing to have many potential points of contact remain surprisingly separate with little apparent recognition of the relevance to the interests of each of the work done within the other tradition Presenting detailed accounts of current research the book highlights the significance of modern science studies for classroom practice and conversely the importance of the classroom and teaching laboratory as a context for science studies The thread which runs through the collection as a whole is children s experience of doing science and the image of science which learners pick up along with the science knowledge understanding and skills they require

The New Math Christopher J. Phillips, 2014-12-04 An era of sweeping cultural change in America the postwar years saw the rise of beatniks and hippies the birth of feminism and the release of the first video game It was also the era of new math Introduced to US schools in the late 1950s and 1960s the new math was a curricular answer to Cold War fears of American intellectual inadequacy In the age of Sputnik and increasingly sophisticated technological systems and machines math class

came to be viewed as a crucial component of the education of intelligent virtuous citizens who would be able to compete on a global scale In this history Christopher J Phillips examines the rise and fall of the new math as a marker of the period s political and social ferment Neither the new math curriculum designers nor its diverse legions of supporters concentrated on whether the new math would improve students calculation ability Rather they felt the new math would train children to think in the right way instilling in students a set of mental habits that might better prepare them to be citizens of modern society a world of complex challenges rapid technological change and unforeseeable futures While Phillips grounds his argument in shifting perceptions of intellectual discipline and the underlying nature of mathematical knowledge he also touches on long standing debates over the place and relevance of mathematics in liberal education And in so doing he explores the essence of what it means to be an intelligent American by the numbers
