Do what Works Tom Luce, 2005 [The Global Debt Crisis](#) Paul E. Peterson, 2014-01-22 Debt crises have placed strains not only on the European Union's nascent federal system but also on the federal system in the United States Old confrontations over fiscal responsibility are being renewed often in a more virulent form in places as far flung as Detroit Michigan and Valencia Spain to say nothing of Greece and Cyprus Increasing the complexity of the issue has been public sector collective bargaining now a component of most federal systems The attendant political controversies have become the debate of a generation Paul Peterson and Daniel Nadler have assembled experts from both sides of the Atlantic to break down the structural flaws in federal systems of government that have led to economic and political turmoil Proposed solutions offer ways to preserve and restore vibrant federal systems that meet the needs of communities struggling for survival in an increasingly unified global economy Contributors Andrew G Biggs American Enterprise Institute Cesar Colino National Distance Education University Madrid Elo sa del Pino Instituto de Politicas y Bienes Publicos Madrid Henrik Enderlein Hertie School of Governance Berlin Cory Koedel University of Missouri Carlos Xabel Lastra Andan Harvard University Daniel Nadler Harvard University Shawn Ni University of Missouri Amy Nugent Government of Ontario Canada James Pearce Mowat Centre University of Toronto Canada Paul E Peterson Harvard University Michael Podgursky University of Missouri Jason Richwine Washington D C Jonathan Rodden Stanford University Daniel Shoag Harvard University Richard Simeon University of Toronto Canada Camillo von Mller University of St Gallen Switzerland and Leuphana University Germany Daniel Ziblatt Harvard University

Liberty & Learning Robert C. Enlow, Lenore T. Ealy, 2009-09-25 Fifty years ago Milton Friedman had the ground breaking idea to improve public education with school vouchers By separating government financing of education from government administration of schools Friedman argued parents at all income levels would have the freedom to choose the schools their children attend Liberty Learning is a collection of essays from the nation's top education experts evaluating the progress of Friedman's innovative idea and

reflecting on its merits in the 21st century The book also contains a special prologue and epilogue by Milton Friedman himself The contributors to this volume take a variety of approaches to Friedman s voucher idea All of them assess the merit of Friedman s plan through an energetic contemporary perspective though some authors take a theoretical position while others employ a very pragmatic approach

Sick Schools David V. Anderson,2020-01-10 Who s afraid of for profit education Those who work in non profit or government owned and operated schools Many parents and other stakeholders have been made fearful by this education establishment What s more important to humans nutrition or education Nutrition is more important because it is the prerequisite for other human activities including education What organizations provide food and who pays for the food Food is provided by for profit farmers for profit processors for profit wholesalers and for profit retailers Most food is purchased with the consumers own money but a significant amount is purchased by low income individuals using food stamps Why can t education be provided similarly using education stamps We trust for profit enterprises to provide our food Why can t we trust for profit enterprises to provide K 12 education Fearmongers have frightened us and made us into gullible compliant socialists who despise commercial activities in education Go to the supermarket and ponder its marvelous array of foods and then contemplate how a for profit K 12 education sector would please and amaze its customers

Saving Schools Paul E. Peterson,2011-11-30 Saving Schools traces the story of the rise decline and potential resurrection of American public schools through the lives and ideas of six mission driven reformers Horace Mann John Dewey Martin Luther King Jr Albert Shanker William Bennett and James Coleman Yet schools did not become the efficient egalitarian and high quality educational institutions these reformers envisioned Indeed the unintended consequences of their legacies shaped today s flawed educational system in which political control of stagnant American schools has shifted away from families and communities to larger more centralized entities initially to bigger districts and eventually to control by states courts and the federal government Peterson s tales help to explain how nation building progressive education the civil rights movement unionization legalization special education bilingual teaching accountability vouchers charters and homeschooling have each in a different way set the stage for a new era in American education Now under the impact of rising cost coupled with the possibilities unleashed by technological innovation schooling may be transformed through virtual learning The result could be a personalized customized system of education in which families have greater choice and control over their children s education than at any time since our nation was founded

School Figures Hanna Skandera,Richard Sousa,2003 School Figuresapresents statistics along with historical trends and cross sectional comparisons to provide a clear factual picture of today s K 12 education landscape including information on school demographics cost and finance testing and achievement public school reform and other key areas

Alternatives to Privatizing Public Education and Curriculum Daniel Ness,Stephen J. Farenga,2017-03-16 Through conversations in honor

of Dale D Johnson this book takes a critical view of the monoculture in curriculum and policy that has developed in education with the increase of federal funding and privatization of services for public education and examines the shift from public interest and control to private and corporate shareholder hegemony Most states educational responsibilities assessment of constituents curriculum development and instructional protocols are increasingly being outsourced to private enterprises in an effort to reduce state budgets These enterprises have been given wide access to state resources such as public data from state sanctioned testing results field testing rights to public schools and financial assistance Chapter authors challenge this paradigm as well as the model that has set growing premiums on accountability and performance measures Connecting common impact between the standards movement and the privatization of education this book lays bare the repercussions of high stakes accountability coupled with increasing privatization Winner of The Society of Professors of Education Book Award 2018 **Renewing Democracy in Young America** Daniel Hart,James Youniss,2018 With a government plagued by systemic ills and deep ideological divides democracy as we know it is in jeopardy Yet ironically voter apathy remains prevalent and evidence suggests standard civic education has done little to instill a sense of civic duty in the American public While some are waiting for change to come from within trying to influence already polarized voters or counting down the days until the next election leading child and adolescent development experts Daniel Hart and James Youniss are looking to another solution America s youth In *Renewing Democracy in Young America* Hart and Youniss examine the widening generation gap the concentration of wealth in pockets of the US and the polarized political climate and they arrive at a compelling solution to some of the most hotly contested issues of our time The future of democracy depends on the American people seeing citizenship as a long term psychological identity and thus it is critical that youth have the opportunity to act as citizens during the time of their identity formation Proposing that 16 and 17 year olds be able to vote in municipal elections and suggesting that schools create science based community oriented environmental engagement programs the authors expound that by engaging youth through direct citizen participatory experiences we can successfully create active and committed citizens Political scientists media commentators and citizens alike agree that democratic processes are broken across the nation but we cannot stop at simply showing that our political system is dysfunctional Refreshingly lucid and unabashedly hopeful *Renewing Democracy in Young America* is an impeccably timed call to action **Hoover Digest** ,2004

The New Republic Herbert David Croly,2003 *Military Self-Interest in Accountability for Core International Crimes* Morten Bergsmo,Arne Willy Dahl,Richard Sousa,2013-07-17 **The Data Game** Mark Maier,Jennifer Imazeki,2014-12-18 This book introduces students to the collection uses and interpretation of statistical data in the social sciences It would suit all social science introductory statistics and research methods courses Separate chapters are devoted to data in the fields of demography housing health education crime the economy wealth income poverty labor business statistics and public opinion polling with a concluding chapter devoted to the common problem of ambiguity Each chapter includes multiple case studies

illustrating the controversies overview of data sources including web sites chapter summary and a set of case study questions designed to stimulate further thought

Social Theory and Practice, 2020 *Learning Beyond the School* Julian Sefton-Green, Ola Erstad, 2018-08-06 Whilst learning is central to most understandings of what it is to be human we now live in a knowledge society where being educated defines life chances more than ever before *Learning Beyond the School* brings together accounts of learning from around the world in organisations spaces and places that are schooled but not school Exploring examples of learning organisation pedagogisation informal learning and social education the book shows not only how understandings of education are framed in terms of local versions of schooling but what being educated could and should mean in very different social and political contexts With contributions from scholars based in Australia Europe the USA Latin America and Asia the book brings together accounts of learning outside of school Chapters contain rich and detailed case studies of innovative projects new kinds of learning institutions youth peer driven and community based activities and public pedagogies as well as engaging with the dimensions of an argument about the place and nature of learning outside of the school It challenges dominant versions of school around the world whilst also critically discussing the value and place of non institutionalised learning *Learning Beyond the School* should be of interest to academics researchers postgraduate scholars engaged in the study of comparative education youth work education systems digital culture sociology of education and youth development It should also be essential reading for practitioners and policymakers who are interested in youth and education system reform

Resources in Education, 2000 *Equity and Excellence in American Higher Education* William G. Bowen, Martin A. Kurzweil, Eugene M. Tobin, Susanne C. Pichler, 200? Thomas Jefferson once stated that the foremost goal of American education must be to nurture the natural aristocracy of talent and virtue Although in many ways American higher education has fulfilled Jefferson s vision by achieving a widespread level of excellence it has not achieved the objective of equity implicit in Jefferson s statement In *Equity and Excellence in American Higher Education* William G Bowen Martin A Kurzweil and Eugene M Tobin explore the cause for this divide Employing historical research examination of the most recent social science and public policy scholarship international comparisons and detailed empirical analysis of rich new data the authors study the intersection between excellence and equity objectives Beginning with a time line tracing efforts to achieve equity and excellence in higher education from the American Revolution to the early Cold War years this narrative reveals the halting episodic progress in broadening access across the dividing lines of gender race religion ethnicity and socioeconomic status The authors argue that despite our rhetoric of inclusiveness a significant number of youth from poor families do not share equal access to America s elite colleges and universities While America has achieved the highest level of educational attainment of any country it runs the risk of losing this position unless it can markedly improve the precollegiate preparation of students from racial minorities and lower income families After identifying the equity problem at the national level and studying nineteen selective colleges and universities the authors propose a set of

potential actions to be taken at federal state local and institutional levels With recommendations ranging from reform of the admissions process to restructuring of federal financial aid and state support of public universities to addressing the various precollegiate obstacles that disadvantaged students face at home and in school the authors urge all selective colleges and universities to continue race sensitive admissions policies while urging the most selective and privileged institutions to enroll more well qualified students from families with low socioeconomic status **Interpreting Assessment Data** Edwin P.

Christmann, John L. Badgett, 2009 Interpreting Assessment Data provides a practical approach which helps teachers understand how to interpret student assessments statistically and how to measure and explain the validity and reliability of those assessments This framework for measuring and interpreting assessment results is a must have for your professional development library *Identification Problems in the Social Sciences* Charles F. Manski, 1995 The author draws on examples from a range of disciplines to provide social and behavioural scientists with a toolkit for finding bounds when predicting behaviours based upon nonexperimental and experimental data
