School Choice And Diversity:

School Choice and Diversity Janelle T. Scott, 2005-08-20 This collection of essays will help readers to disentangle the complex relationship between school choice and student diversity in the post Brown era Presenting the views of the most prominent researchers of school choice reforms in the U S this book argues that the contexts under which school choice plans are adopted are actually responsible for shaping student diversity within schools Using sociological economic and political analysis the authors present studies of controlled and voluntary choice plans charter schools private school selection and their interaction with race social class gender and student disability School Choice Tradeoffs R. Kenneth Godwin, Frank R. Kemerer, 2002-05-15 The author illuminates the tradeoffs inherent in America s education system analyzing the role of teaching liberty diversity citizenship reasoning and tolerance along with basic academic skills Education

School Diversity and the School Choice Ecosystem Sophia Seifert, 2022 In the United States students schooling experiences are shaped by racial and socioeconomic segregation which is a powerful predictor of educational inequity School choice has been touted as a remedy to school segregation and has been used widely in desegregation plans To understand whether and how America s expanding system of voluntary public school choice can support diversity this sequential explanatory mixed methods study explores how five public school choice programs inter district enrollment intra district enrollment magnet schools cyber charter schools and brick and mortar charter schools shape the composition of public schools in Pennsylvania The quantitative phase uses seven years of student level data from Pennsylvania to examine how school choice participation influences neighborhood and choice school diversity and how school characteristics including diversity choice type and specialty theme are related to families school enrollment decisions I find that school choice slightly exacerbates racial and socioeconomic segregation in urban communities while suburban schools of choice are much more diverse than neighborhood schools I also explore the transfer decisions of students in choice rich environments those with access to schools with a variety of demographic profiles choice types and specialty themes and so whose choices are less constrained by supply I find that that higher income families preferences for low poverty schools and divergent racial ethnic preferences among Black and White families put segregating pressure on school systems At the same time the broad appeal of zoned schools and high schools with specialty themes represent promising strategies to promote school diversity in the context of school choice The qualitative phase extends and explains quantitative findings with a comparative case study of two choice rich city school districts In Albertville City Schools choice appeared to be exacerbating segregation while in Bedford Public Schools neighborhood schools saw increasing diversity In these two communities school and district leaders felt competition from school choice and changed practices in response to that pressure Bedford competed with a robust neighborhood school recruitment program which likely produced increases in diversity because of their diverse local population While Bedford Public Schools had success attaining numeric diversity they relied on diversity ideology an

organizational philosophy that celebrates diversity while maintaining internal systems of oppression Diversity ideology prevented Bedford s leaders from overturning existing hierarchies and so internal opportunity and achievement gaps persisted In Albertville no robust recruitment program emerged in large part due to capacity and financial constraints So while choice participation leveled off in Bedford it continued to grow in Albertville which may have exposed Albertville zoned schools to increasing segregating pressure from school choice Though opportunities for numeric diversity were fewer in Albertville leaders tended to reject diversity ideology and instead recognize that school choice participation is driven by racialized and classed opportunity gaps Albertville school and district leaders sought to compete by closing these gaps and increasing equity Some schools located in Albertville competed by establishing homogeneous affirming schools and others pursued holistic integration though the scale of these efforts was limited These cases illustrate that while local school choice practices can shape school diversity leaders philosophies are critical determinants of whether or not numeric diversity provides a foundation for equitable integrated schools

How are School-choice Policies Related to Social Diversity in Schools? ,2019 Abstract In almost all school systems students are assigned to public schools based at least partly on their home address Through this policy students are typically assigned to the school closest to their home The main objective may be to avoid long and costly commutes to and from school However over the past few decades many countries have implemented reforms that provide more school options to families by loosening the link between home address and school How do these reforms affect the social composition of schools

Schools Mira Debs offers a richly detailed study of public Montessori schools which make up the largest group of progressive schools in the public sector As public Montessori schools expand rapidly as alternatives to traditional public schools the story of these schools Debs points out is a microcosm of the broader conflicts around public school choice Drawing on historical research interviews with public Montessori educators and ethnographic case studies Debs explores the forces that pull intentionally diverse progressive schools toward elitism At the heart of Debs s book is a thoughtful analysis of the notion of fit between parents and schools an idea that is central to school choice which is often marketed as an opportunity for parents to find the perfect fit for their kids By exploring parents varied motivations in choosing these schools and observing how families experience or fail to experience a good fit after having chosen a particular school Debs makes an original contribution to the literature on school choice and sheds light on the dilemmas entailed in maintaining diversity in progressive charter and magnet schools Exploring the School Choice Universe Kevin G. Welner,Patricia H.

Hinchey,William J. Mathis,Gary Miron,2013-02-01 Exploring the School Choice Universe Evidence and Recommendations gives readers a comprehensive complete picture of choice policies and issues In doing so it offers cross cutting insights that are obscured when one looks only at single issue or a single approach to choice The book examines choice in its various forms charter schools home schooling online schooling voucher plans that allow students to use taxpayer funds to attend private schools tuition tax credit plans that provide a public subsidy for private school tuition and magnet schools and other forms of public school intra and interdistrict choice It brings together some of the top researchers in the field presenting a comprehensive overview of the best current knowledge of these important policies The questions addressed in Exploring the School Choice Universe are of most importance to researchers and policy makers What do choice programs actually do What forms do they take Who participates and why What are the funding implications What are the results of different forms of school choice on outcomes that matter like student performance segregation and competition effects Do they affect teachers working conditions Do they drive innovation The contents of this book offer reason to believe that choice policies can further some educational goals But they also suggest many reasons for caution If choice policies are to be evidence based a re examination is in order The information insights and recommendations facilitate a more nuanced understanding of school choice and provide the basis for designing sensible school choice reforms that can pursue a range of desirable outcomes

Student Diversity, Choice, and School

Improvement Charles V. Willie, Ralph Edwards, Michael J. Alves, 2002-12-30 Diversified schools in which students of various racial ethnic and socioeconomic characteristics are balanced have a positive contextual effect on achievement for all groups compared to schools with homogeneous student bodies that tend to help affluent white students and harm poor students and students of color The authors advise school districts convicted for operating segregated schools on how to make all schools schools of choice that must compete for students who enroll in them And it discusses ways of being fair and just in the distribution of educational resources to affluent as well as poor students and to white students as well as students of color School systems that are reluctant to use racial fairness guidelines in the enrollment process are advised to use socioeconomic fairness guidelines because the absence of any enrollment fairness guidelines tends to result in the return to segregation and a dual school system helpful to a few but harmful to many students This book suggests ways of empowering parents and professional educators and it discusses how to achieve a good outcome for urban as well as rural school districts and for large as well as small school systems Among communities mentioned in this study are Cambridge Boston Brockton MA St Lucie County Lee County Hillsborough County including Tampa FL Santa Rosa County CA Seattle WA New Haven CT Rockford IL Milwaukee WI and Charleston County SC
