This volume presents it in a new and accurate translation together with a detailed introduction *Poetry and the Fate of the Senses* Susan Stewart, 2002-01-20 What is the role of the senses in the creation and reception of poetry How does poetry carry on the long tradition of making experience and suffering understood by others With *Poetry and the Fate of the Senses* Susan Stewart traces the path of the aesthetic in search of an explanation for the role of poetry in culture Herself an acclaimed poet Stewart not only brings the intelligence of a critic to the question of poetry but the insight of a practitioner as well Her new study includes close discussions of poems by Stevens Hopkins Keats Hardy Bishop and Traherne of the sense of vertigo in Baroque and Romantic works and of the rich tradition of nocturnes in visual musical and verbal art Ultimately she argues that poetry can counter the denigration of the senses in contemporary life and can expand our imagination of the range of human expression *Poetry and the Fate of the Senses* won the 2004 Truman Capote Award for Literary Criticism in Memory of Newton Arvin administered for the Truman Capote Estate by the University of Iowa Writers Workshop It also won the Phi Beta Kappa Society's 2002 Christian Gauss Award for Literary Criticism *Time and Space* Maria do Rosário Monteiro, Mário S. Ming Kong, Maria João Pereira Neto, 2023-11-09 The texts presented in *Proportion Harmonies and Identities PHI Time and Space* were compiled to establish a multidisciplinary platform for presenting interacting and disseminating research It also aims to foster awareness and discussion on Time and Space focusing on different visions relevant to Architecture Arts and Humanities Design and Social Sciences and its importance and benefits for the sense of identity both individual and communal The idea of Time and Space has been a powerful motor for development since the Western Early Modern Age Its theoretical and practical foundations have become the working tools of scientists philosophers and artists who seek strategies and policies to accelerate the development process in different contexts *The Senses of Scripture* Yael Avrahami, 2012-06-15 *The Senses of Scripture* reveals the essence of biblical epistemology the ways in which ancient Israelites thought about and used their sensorium The theoretical introduction demonstrates that scholars need to liberate themselves from the Western bias that holds a pentasensory paradigm and prioritises the sense of sight The discussion of the biblical material demonstrates that biblical scholars should follow a similar path Through examination of associative and contextual patterns the author reaches a septasensory model including sight hearing speech kinaesthesia touch taste and smell It is further demonstrated that the senses according to the HB are a divinely created physical experience which symbolised human ability to act in a sovereign manner in the world Despite the lack of a biblical Hebrew term sense it seems that at times the merism sight and hearing serves that matter Finally the book discusses the longstanding dispute regarding the primacy of sight vs hearing and claims that although there is no strict sensory hierarchy evident in the text sight holds a central space in biblical epistemology **Seeing the Dead, Talking with Spirits** Alexandra Leclerc, 2005-09-20 Recounts one woman's discovery of her ability to heal through contact with spirits and reveals how others can awaken this same gift in their own lives Explains how reconnecting with our inner sense of joy is the first step

in healing Shows how to rid our life of the traumas from the past that hinder our spiritual development including unresolved traumas from past lives Provides a roadmap that others can use for rediscovering their own connections to the spirit world Like many others who have discovered that they have a healing vocation Alexandra Leclere began meeting with other healers and shamans to learn how to put her gift to use At one of these gatherings she was shocked to find that she was the only one who could see the spirit of a deceased woman that was being honored there a sign that marked the beginning of a remarkable adventure that taught her how to use her gift for healing herself and others Despite the extraordinary powers of clairsentience and clairvoyance revealed to her through her work with the spirit world Alexandra Leclere shows that the greatest gift she has received since her shamanic awakening is the ability to experience unconditional joy Often the pain caused by unresolved psychological traumas from the past including past lives is the key obstacle restricting access to the powers offered by the spirits The first step in healing requires reconnecting with the joy that resides within us Once this connection has been established we are all capable of restoring our connection to the spirit world Alexandra Leclere s story provides a roadmap for finding our way back

International Law as Social Construct Carlo Focarelli, 2012-05-24 The book distils and articulates international law as a social construct It does so by analysing its social foundations essence and roots in practical and socially workable as opposed to pure reason In addition to well known doctrines of jurisprudence and international law it draws upon psycho analytic insights into the origins and nature of law as well as philosophical social constructivism The work suggests that seeing law as a social construct is crucial to our understanding of international law and to the struggle to create better working rules The book re conceptualizes both past and new doctrines of international law as constructs namely as strategies of concomitantly de mythologizing and re mythologizing international law Key areas of international law including subjects sources hierarchy values and remedies are shown to be part of this process The social impact on international law of transnational actors and stakeholders normative fragmentation global justice legitimacy of both rules and players dynamics and hierarchization of norms compliance and implementation in municipal law is also extensively investigated Five basic values of the international community namely security humanity wealth environment and knowledge are explored by stressing their inter and intra tensions Finally the analysis is extended to the role that international courts play in the prosecution of heads of state and other transnational players who violate international law

Mindfulness for Life Willem Kuyken, 2024-08-29. Mindfulness is exceptionally easy to get started with and people often experience benefits almost immediately. Why then do many initial enthusiasts end up dropping the practice after a short while? According to Oxford professor and leading mindfulness expert Willem Kuyken, it's because traditional mindfulness training is too far removed from how we actually live. This next generation resource brings mindfulness home by teaching core skills in easy-to-integrate ways that touch directly on life's daily challenges. Dr. Kuyken provides stepping stones to help you build a personal practice that is sustainable, purposeful and richly rewarding now and for years to come. Interweaving ancient wisdom and modern scientific psychology, the book includes stories, quotations, reflection questions, tips for overcoming hurdles and compelling guided practices including audio tracks at the companion website. *The Works of President Edwards ...* Jonathan Edwards, 1808. Sonnenschein's Cyclopaedia of Education Alfred Ewen Fletcher, 1892. **Key Terms in Material Religion** S. Brent Plate, 2015-12-17. The entries cut across geographies, histories and traditions, offering a versatile and engaging text for the classroom. Key topics covered include Icon, ritual, magic, gender, race, Sacred spirit, technology, Space, belief, body, brain, Taste, touch, smell, sound, vision. Each entry demonstrates in clear and jargon-free prose how the key term figures prominently in understanding the materiality of religion. Written by leading international scholars, all entries are linked by the ways materiality stands at the forefront of the understanding of religion, whether that comes from humanistic

social scientific artistic curatorial or other perspectives Brent Plate brings his expertise and extensive teaching experience to the comprehensive introduction which introduces students to the themes and methods of the material cultural study of religion Key Terms in Material Religion provides a much needed resource for courses on theory and method in religious studies the anthropology of religion and the ever increasing number of courses focused on material religion **The Handbook of Multisensory Processes** Gemma Calvert, Charles Spence, Barry E. Stein, 2004 Research is suggesting that rather than our senses being independent perception is fundamentally a multisensory experience This handbook reviews the evidence and explores the theory of broad underlying principles that govern sensory interactions regardless of the specific senses involved **A Theory of Immediate Awareness** M. Estep, 2003-05-31 This book presents a realist multidisciplinary and interdisciplinary theory of immediate awareness showing it is the most primitive cognitive network underlying all our natural intelligence Including preattentive and attention processes as well as primitive relations of the senses imagination and memory immediate awareness is a kind of knowing deeply embedded and interwoven throughout our multiple kinds of natural intelligence It permits as well as drives our knowing how our bodily intelligence Against the Cartesian mind body split found in earlier and current theories the author shows how immediate awareness permits emergent properties of mind in multilayered primitive relations of touching and moving in bodily kinesthetic intelligence Contrary to existing theories she argues that sensation is not cognitively neutral nor does it require a representation in order to be accessible to cognitive processes Dr Estep presents empirical evidence and arguments that sensation of immediate awareness is itself cognitive and embedded within our sensory and somatosensory motor processes The author's aim is to turn to a more geometric approach to natural intelligence as opposed to the prevalent symbol based view In this approach she uses random Boolean networks as a way of obtaining law like properties of those primitive relations of immediate awareness in terms of dynamical systems theory This demonstrates the properties of self organization and adaptation of immediate awareness without committing one to a physicalist materialist theory It gives us a way of understanding core properties of our own inner conscious lives and of understanding the smooth and seamless sensitivity of primitive sensory and somatosensory motor awareness Dr Estep's theory of immediate awareness also shows that the computational view of mind is wrong Though our minds do classify classification is not all they do Our immediate awareness indexically selects sui generis objects that are unique and of no kind or class The influence of nominalism and narrow naturalist theories have resulted in extremely narrow concepts of the human knowing mind and intelligence leaving out immediate awareness altogether We slip into subtle nominalist fallacies when we take our language metaphors and language itself too far *Encyclopædia Americana* Francis Lieber, 1835 [Coming to Know](#) Paul Georg Meyer, 1997
