SEXISM AND SCIENCE

"Examines the prejudice [Reed] finds in investigative methods used by the life and social sciences, and attacks the concepts of male supremacy and innate aggression."

—BOOKLIST

Are human beings innately aggressive? Are they governed by irrepressible, unmodified, inherited instincts?

Is human society nothing but an extension of animal and insect "societies," as sociobiologists argue?

Does biology determine women's destiny as the "second sex"?

In *Sexism and Science* Evelyn Reed takes up these and other prejudices cloaked as the findings of science.

Science is supposedly objective and free of bias. But Reed explains that this is the ideal, not the reality. The sciences closest to human life—anthropology, biology, and sociology—are permeated with antiwoman prejudices that reflect the established social system and warp their conclusions.
