Sexual Abuse of Young Children Kee MacFarlane,Jill Waterman,1986 Child Sexual Abuse: Whose Problem? Sue Richardson,Heather Bacon,2018-09-26 In Cleveland in 1987 a medical diagnosis of child sexual abuse was made in 127 children resulting in their removal from home The consequent intense scrutiny and public criticism around the case together with the subsequent Butler Sloss inquiry resulted in the medical evidence being discredited giving rise to a system which relies on children to speak out about their abuse This book argues that this 1987 crisis continues to shape child protection today resulting in opportunities to protect children being missed Now re issued with a substantial new introduction and concluding reflections this book provides the only account by key professionals directly involved in the Cleveland cases allowing readers to understand what really took place in Cleveland and why it continues to matter today It analyses the many failures to address the plight of sexually abused children and makes constructive suggestions for the way forward to provide more effective interventions for children at risk

Ammerman, Michel Hersen, 2013-06-29 The past 20 years have seen the emergence of family violence as one of the most critical problems facing society The alarming incidence figures of abuse and neglect directed toward family members justify this attention For example over 1 million children are thought to be abused and neglected each year Similarly almost 2 million women are victims of wife battering each year Annual rates of elderly mistreatment are thought to be as high as 32 per 1000 population Accurate epidemiological data only now are being compiled on more recently recognized forms of mistreatment such as psychological abuse ritualistic abuse of children and child witnessing of adult violence The pervasiveness of domestic mistreatment makes it a priority for clinicians and researchers alike For clinicians intrafamilial violence represents a formidable challenge with respect to assessment and treatment The etiology of abuse and neglect is multidetermined There are numerous pathways in the development of family violence and these interact and converge in a nonlinear fashion The consequences of family violence are equally complex and divergent Victims of mistreatment can

display a variety of physical injuries and psychological disturbances No single psychiatric syndrome or symptom constellation has been consistently implicated in any form of family mistreatment The perpetrators of family violence are equally heterogeneous in their clinical presentations Illustrative dys functions in perpetrators include skill deficits substance abuse mental illness and impulse control disorders

Complex Issues in Child Custody Evaluations Philip M. Stahl, 1999-05-21 This text is excellent and very timely Philip Michael Stahl's second volume is the perfect supplement to his *Conducting Child Custody Evaluations* because it deals with specific issues of great concern to evaluators parental alienation allegations of sexual abuse domestic violence move away situations and high conflict families The chapter dealing with child considerations is also very well done His discussion of developmental considerations is clear and supported by the latest research in the field I also liked his treatment of children's reaction to parental conflict weighing the needs of the individual child with the needs of the sibling group and giving the child a voice while protecting their privacy I also appreciated his discussion of components of the evaluator's recommendation use of psychological testing Rosemary Vasquez's discussion of cultural issues tackling the terror of testifying and ethical issues Phil Stahl has written a very important text It is timely well written and comprehensive Nice work Hugh McIsaac Oregon Family Institute When performing a custody evaluation how do professionals deal with the issue of domestic violence What impact does one parent's moving away have on the evaluation How should an evaluator handle high conflict divorces Over the past five to ten years there has been a significant increase in the use of child custody evaluations by the courts At the same time the issues have become more complex and difficult In this book the author provides a theoretical and practical understanding of many of the factors that make custody evaluations complex A key component is the integration of disparate research findings into a comprehensive resource that will enable the evaluator and the court to understand these complex issues A second component is to provide a thorough understanding of the fact that divorce brings with it a set of complex needs and evaluators and the courts must develop a paradigm for weighing these needs in a comprehensive manner This book provides that paradigm
