Treasure of the Spanish Civil War Serge Pey, 2020-03-03 An intimate portrait of childhood during Spain's violent fascist regime rendered in a surreal kaleidoscope of linked stories Serge Pey's stories are lyrical vivid vignettes of life during and directly following Spain's violent fascist regime of the thirties and forties The collection is a defiant ode to the resilience of the human spirit each story depicting a small act of human resistance a man plants a fruit tree for each of his assassinated comrades a professor hides a secret library of banned books in plain sight Many of the stories are surreal fable like impressions from the perspective of children caught in the midst of the political violence Pey's understated yet unusual prose renders a brutal landscape with childlike wonder The *Treasure of the Spanish Civil War and Other Tales* is a strikingly original meditation on courage survival and hope in the face of oppression **General Problems of Shades and Shadows,**

work of the Catalan woman poet Maria Merc Mar al It analyses the interaction between body and language in her first five books of poetry Drawing on the Italian feminist thought of il pensiero della differenza sessuale it examines the ways in which Mar al s poetic images display her Catalan feminine subjectivity including the function of the poet the space of poetry and the representation of love It also explores the potentiality of the space of poetry to reconstruct female identity and reconfigure reality In addition it unravels the way in which the poet uses poetry to express the love for the other whilst also extending the boundaries of the self The central concern is to bridge the fissure between female experience and universal precepts on the art of poetry through the predominance of an embodied and natural iconography This study presents Mar al s poetic compositions within the international panorama of poetry and feminist studies and aims to open up new terrains of discussion in the field of language body and writing

Original Illustrations of William Blake) William Blake,2013-08-20 This carefully crafted ebook Jerusalem Illuminated Manuscript with the Original Illustrations of William Blake is formatted for your eReader with a functional and detailed table of contents The poem was inspired by the apocryphal story that a young Jesus accompanied by his uncle Joseph of Arimathea a tin merchant travelled to what is now England and visited Glastonbury during the unknown years of Jesus The legend is linked to an idea in the Book of Revelation describing a Second Coming wherein Jesus establishes a new Jerusalem The Christian Church in general and the English Church in particular has long used Jerusalem as a metaphor for Heaven a place of universal love and peace In the most common interpretation of the poem Blake implies that a visit by Jesus would briefly create heaven in England in contrast to the dark Satanic Mills of the Industrial Revolution Blake s poem asks questions rather than asserting the historical truth of Christ s visit Thus the poem merely implies that there may or may not have been a divine visit when there was briefly heaven in England William Blake 1757 1827 was a British poet painter visionary mystic and engraver who illustrated and printed his own books Blake proclaimed the supremacy of the imagination over the rationalism and materialism of the 18th century Largely unrecognised during his lifetime Blake is now considered a seminal figure in the history of both the poetry and visual arts of the Romantic Age *Nanogap Electrodes* Tao Li,2021-08-16

Unique in its scope this book comprehensively combines various synthesis strategies with applications for nanogap electrodes Clearly divided into four parts the monograph begins with an introduction to molecular electronics and electron transport in molecular junctions before moving on to a whole section devoted to synthesis and characterization The third part looks at applications with single molecules or self assembled monolayers and the whole is rounded off with a section on interesting phenomena observed using molecular based devices *Dalmatia, the Quarnero and Istria, with Cettigne in*
