Text-book of Ophthalmology Ernst Fuchs,1911 **The Visual World of Shadows** Roberto Casati,Patrick Cavanagh,2019-05-28 How the perception of shadows studied by vision scientists and visual artists reveals the inner workings of the visual system In The Visual World of Shadows Roberto Casati and Patrick Cavanagh examine how the

perception of shadows as studied by vision scientists and visual artists reveals the inner workings of the visual system. Shadows are at once a massive problem for vision which must distinguish them from objects or material features of objects and a resource signaling the presence, location, shape and size of objects. Casati and Cavanagh draw up an inventory of information retrievable from shadows showing their amazing variety. They present an overview of the visual system distinguishing between measurement and inference. They discuss the shadow mission, the work done by the visual brain to parse and perhaps discard the information from shadows, shadow ownership, the association of a shadow with the object that casts it, shadow labeling, the visual system's ability to tell shadows from nonshadows and the shadow concept, our knowledge about shadows as a category. Casati and Cavanagh then apply the theoretical apparatus they have developed for shadows to other phenomena: illumination, reflection and transparency. Finally, they examine the art of the shadow, paying tribute to artists' exploration of shadow by analyzing a series of artworks reproduced in color from a rich and fascinating art historical corpus.

Heart of the Bison Glen R. Stott, 2002-08-13 As the lambent light from the slumbering fire dances across the roof of the cave, a young girl wakes from a dream. Kec's dream tells her that her clan is in jeopardy and that Mother Earth expects her to do something to save her people. A magic child will be sent to help her. Far away, Strong Branch, a powerful Shaman of his people, has his own dream. The Great Spirit sends him a warning about a future of conflict and killing. Kec's people are very simple but they are strong and powerful enough to have survived the ice ages of Pleistocene Europe by force for over one hundred thousand years. Strong Branch's people are late comers from an alien world far to the South. They bring an advanced technology that allows them to utilize the environment in ways Kec's people never could. As the population of the aliens has grown over a period of more than twenty thousand years, the stress on the environment has become critical. Kec and Strong Branch must play their parts in a microcosm of the greater struggle for survival. The conclusion of their struggle will establish a new story and a new history for each of their peoples.
