**Shadows of Hiroshima** Wilfred Burchett, 2025-08-05 An Australian journalist the first westerner to enter Hiroshima after the nuclear bomb was dropped recounts his impressions of the decimated city and the treatment of the survivors I Write This As A Warning To The World This headline in the London Daily Express on 5 September 1945 was the first cry of alarm that the age of threatening nuclear catastrophe had dawned Wilfred Burchett who became the most famous radical journalist of his generation wrote It and the accompanying story in the ruins of Hiroshima He was the first Westerner of any kind to enter the city after the atomic blast The story of his efforts to reach Hiroshima is retold in this dramatic book It shows how the politics of nuclear confusion was inaugurated before the ashes of the city had cooled Burchett details the attempts by the US government to deny the effects of radiation sickness described in his reports He reveals the pressure to silence him through deportation from Japan and in a telling analysis he uncovers once more the political calculations that led Truman to drop the bomb The other major character in this book Is the population of Hiroshima itself The survivors of the attack and their children have lived with the legacy of nuclear war for two generations The author a regular visitor to the city recounts their experience of callous treatment medical neglect social isolation and eventual reinvigoration through the Japanese peace movement

Shadows of Nagasaki Chad R. Diehl, 2024-01-02 A critical introduction to how the Nagasaki atomic bombing has been remembered especially in contrast to that of Hiroshima In the decades following the atomic bombing of Nagasaki on August 9 1945 the city's residents processed their trauma and formed narratives of the destruction and reconstruction in ways that reflected their regional history and social makeup In doing so they created a multi layered urban identity as an atomic bombed city that differed markedly from Hiroshima's image Shadows of Nagasaki traces how Nagasaki's trauma history and memory of the bombing manifested through some of the city's many post atomic memoryscapes such as literature religious discourse art historical landmarks commemorative spaces and architecture In addition the book pays particular attention to how the city's history of international culture exemplified best perhaps by the region's Christian especially Catholic past informed its response to the atomic trauma and shaped its postwar urban identity Key historical actors in the volume's chapters include writers Japanese Catholic leaders atomic bombing survivors known as hibakusha municipal officials American occupation personnel peace activists artists and architects The story of how these diverse groups of people processed and participated in the discourse surrounding the legacies of Nagasaki's bombing shows how regional history

culture and politics rather than national ones become the most influential factors shaping narratives of destruction and reconstruction after mass trauma In turn and especially in the case of urban destruction new identities emerge and old ones are rekindled not to serve national politics or social interests but to bolster narratives that reflect local circumstances

**Genius in the Shadows** William Lanouette, 2013-09-01 Well known names such as Albert Einstein Enrico Fermi J Robert Oppenheimer and Edward Teller are usually those that surround the creation of the atom bomb One name that is rarely mentioned is Leo Szilard known in scientific circles as father of the atom bomb The man who first developed the idea of harnessing energy from nuclear chain reactions he is curiously buried with barely a trace in the history of this well known and controversial topic Born in Hungary and educated in Berlin he escaped Hitler s Germany in 1933 and that first year developed his concept of nuclear chain reactions In order to prevent Nazi scientists from stealing his ideas he kept his theories secret until he and Albert Einstein pressed the US government to research atomic reactions and designed the first nuclear reactor Though he started his career out lobbying for civilian control of atomic energy he concluded it with founding in 1962 the first political action committee for arms control the Council for a Livable World Besides his career in atomic energy he also studied biology and sparked ideas that won others the Nobel Prize The Salk Institute for Biological Studies in La Jolla California where Szilard spent his final days was developed from his concepts to blend science and social issues

Nayar, 2022-12-23 Nuclear Cultures Irradiated Subjects Aesthetics and Planetary Precarity aims to develop the field of nuclear humanities and the powerful ability of literary and cultural representations of science and catastrophe to shape the meaning of historic events Examining multiple discourses and textual materials including fiction poetry biographies comics paintings documentary and photography this volume will illuminate the cultural ecological and

social impact of nuclearization narratives Furthermore this text explores themes such as the cultures of atomic scientists the making of the bomb nuclear bombings and disasters nuclear aesthetics and art and the global mobilization against nuclearization Nuclear Cultures breaks new ground in the debates on the nuclear to foster the development of nuclear humanities its vocabulary and methodology [The Forbidden Archives](#) Shade Raven,2025-03-18 What If Everything You Knew About History Was a Lie Beneath the surface of the history you were taught lies a world of secrets shocking chilling and deliberately erased from the pages of time The Forbidden Archives unlocks the hidden corridors of history exposing the darkest cover ups the most mind blowing conspiracies and the forbidden truths buried by those in power Inside this book you ll discover The horrific war crimes and massacres the world was meant to forget Lost civilizations and ancient technologies that defy logic Shocking government experiments assassinations and mind control programs The hidden power of secret societies and their influence on world events Censored history so controversial it was wiped from textbooks This is not your typical history book this is the raw unfiltered truth that historians fear to publish Every page will challenge what you believe make you question reality and leave you hungry for more Are you ready to uncover what they never wanted you to know Read The Forbidden Archives now before it disappears **The Instant and Its Shadow** Jean-Christophe Bailly,2020-04-07 A compelling and innovative reflection on the way photography captures and condenses time Two photographs connected by a ladder separated by a century First William Henry Fox Talbot photographed a faithfully realistic image of a ladder against a haystack in the English countryside One hundred years later an anonymous photographer captured another ladder photographed alongside an incinerated man by the blinding light of the atomic bomb These two images underpin a poetic and theoretical reflection on the origins of photographic technique the imaginative power of montage and the relation of photography to time itself in Jean Christophe Bailly s The Instant and Its Shadow translated into English for the very first time A rare find of intellectual caliber and theoretical rigor The Instant and Its Shadow pursues a unique and powerful reflection on the first hundred years of photography s history and on the essence of the photographic art in general Inspired by the unexpected coming together of these two iconic images the book begins by retracing Talbot s invention of the photographic calotype in the early nineteenthcentury highlighting the paradox that saw Talbot wishing to imitate the representative arts of painting and drawing while simultaneously liberating the image from any imitative paradigm This analysis leads Bailly to elucidate photography s relation to material and visual reality A meditation on photography s seeming ability to stop time follows concluding with the photographs of Hiroshima and the photographic nature of the atomic bomb Building on an inspired juxtaposition of The Haystack with the Hiroshima photographs the book becomes a testament to the potency of photomontage arguing that the more singular an image the greater its connective power Bailly s book is at once a lyrical homage to some of the founding texts of photographic theory and a startling reminder of the uncanny power of photography itself Part theoretical reflection part lyrical reverie The Instant and Its Shadow is packed with profound and

stellar insights about the medium      **The Palgrave Handbook of Cold War Literature** Andrew Hammond, 2020-09-04

This book offers a comprehensive guide to global literary engagement with the Cold War. Eschewing the common focus on national cultures, the collection defines Cold War literature as an international current focused on the military and ideological conflicts of the age and characterised by styles and approaches that transcended national borders. Drawing on specialists from across the world, the volume analyses the period's fiction, poetry, drama, and autobiographical writings in three sections: dominant concerns (socialism, decolonisation, nuclearism, propaganda, censorship, espionage, common genres, postmodernism, socialism, realism, dystopianism, migrant poetry, science fiction, testimonial writing, and regional cultures), Asia, Africa, Oceania, Europe, and the Americas. In doing so, the volume forms a landmark contribution to Cold War literary studies which will appeal to all those working on literature of the 1945-1989 period, including specialists in comparative literature, postcolonial literature, contemporary literature, and regional literature.

Shadows Roberto Casati, 2007-12-18 In this original, wide-ranging and endlessly thought-provoking work of popular nonfiction, a leading science writer uncovers the pervasive presence of shadows in our world. For Plato, shadows were the symbol of our limitations. For Galileo, they knocked the Earth from the center of the cosmos. They are a source of fear and a symbol of ignorance, and they loom large in art and design, mythology and folklore, physics and metaphysics, and architecture and urban planning. From shadows, puppets, and the psychology of shadows to the role of shadows in astronomy and the influence of shadows on the architectural profiles of our cities, Roberto Casati awakens our fascination in this tour de force of investigation and imagination.

**Revolutions Aesthetic** Max Weiss, 2022-06-28 The November 1970 coup that brought Hafiz al Asad to power fundamentally transformed cultural production in Syria. A comprehensive intellectual, ideological, and political project, a Ba'athist cultural revolution sought to align artistic endeavors with the ideological interests of the regime. The ensuing agonistic struggle pitted official aesthetics of power against alternative modes of creative expression that could evade or ignore the effects of the state. With this book, Max Weiss offers the first cultural and intellectual history of Ba'athist Syria from the coming to power of Hafiz al Asad through the transitional period under Bashar al Asad and continuing up through the Syria War. *Revolutions Aesthetic* reconceptualizes contemporary Syrian politics, authoritarianism, and cultural life. Engaging rich original sources—novels, films, and cultural periodicals—Weiss highlights themes crucial to the making of contemporary Syria: heroism and leadership, gender and power, comedy and ideology, surveillance and the senses, witnessing and temporality, and death and the imagination. *Revolutions Aesthetic* places front and center the struggle around aesthetic ideology that has been key to the constitution of state, society, and culture in Syria over the course of the past fifty years.
