Ortleb, Richard Cadice, Nancy McRee, 1988-09-01 Developed by leading science educator and former president of the National Science Teacher's Association Ed Ortleb Heat Light and Sound offers curriculum oriented worksheets that provide a focused unit of information on each subject No teacher preparation is required to use the pages Activities include coloring cutting pasting sequencing matching drawing games and puzzles Extension activities and background information included in teacher guide *Visual Cultures of Science* Luc Pauwels, 2006 A new collection explores the complex role of visual representation in science **Shadows of the Heart** Larsen Bowker, 2019-06-26 These poems sing the body's fierce desire to live forever and the mind's almost sacred wonder that it was ever here at all But free of what Whitman called the fear of knowing they can hear the hum of time's seamless disappearance riding the spinning tendrils of the mystery of silence that like brief flowering seasons on high mountain meadows try to make less seem more for surely there are men who've made their art out of no tragic war lovers of life impulsive men who look for happiness and sing when they've found it They search for covenants of faith without borders gods without omniscience and unbloody sacraments that seek protection from nature's deadly indifference Perceptual Ephemera Thomas Crowther, Clare Mac Cumhaill, 2018-05-31 Most research on perception has focused on the perceptual experience of three dimensional solid bounded and coherent material objects items like tables and tomatoes But as well as having perceptual experience of such objects we also experience such aspects of the world as for instance rainbows and surfaces shadows and absences things that are ephemeral by contrast with material objects This book presents fifteen new essays on the perceptual experience of such ephemera The editors introduction provides a detailed guide to the topic as a

whole setting out the thematic background to this emerging area of research in contemporary philosophy of perception The volume winds a path through the ephemeral considering such topics as sounds smells transparency reflection camouflage solidity and ambient vision A general aim of the volume is to make a case that the broad range of ephemera it catalogues is far from marginal or insubstantial with respect to their philosophical interest and value Philosophical attention to perceptual ephemera may well suggest novel routes to arriving at a more developed understanding of perceptual experience at large and its characteristic features
