Introducing the Mythological Crescent Harald Haarmann, Joan Marler, 2008 There is a broad

cultural region with related traditions of mythical beliefs interconnected by long term contacts during prehistoric times This area called here the Mythological Crescent is a zone of cultural convergence that extends from the ancient Middle East via Anatolia to southeastern Europe opening into the wide cultural landscape of Eurasia The very old interconnections between Eurasia and Anatolia are explored in this study for the first time In a comparative view striking similarities can be reconstructed for the ancient belief systems and the imagery of both regions which suggest convergent cosmological conceptualizations of high age The beliefs and ritual practices of the indigenous peoples of Eurasia are rooted in the shamanism of the oldest cultural layers of the Palaeolithic Although socioeconomic development in Anatolia was markedly different from cultural evolution in Eurasia the hunters and gatherers in Anatolia who adopted sedentary lifeways did not entirely lose their ancient beliefs during the transition to plant cultivation in the eighth millennium BCE Archaic beliefs and imagery fused with new practices and innovations during the development of agrarian societies One diagnostic motif which was perpetuated from the Palaeolithic to the Neolithic and beyond is represented by the production of female figurines statuettes Their significance for communal life has been linked to spiritual concepts of the continuity of life the vegetation cycle and the protection of the natural habitat of all living things as recorded in myths and historical folk art of Uralic and other peoples The bear plays a significant role as a mythical animal in the imagery of Eurasia whereas this motif was lost in Anatolia during the transition from antiquity to the Middle Ages

Expanding Mindscapes Erika Dyck, Chris Elcock, 2023-11-21 The first collection of its kind to explore the diverse and global history of psychedelics as they appealed to several generations of researchers and thinkers Expanding Mindscapes offers a fascinatingly fluid and diverse history of psychedelics that stretches around the globe While much of the literature to date has focused on the history of these drugs in the United States and Canada editors Erika Dyck and Chris Elcock deliberately move away from these places in this collection to reveal a longer and more global history of psychedelics which chronicles their discovery use and cultural impact in the twentieth century The authors in this collection explore everything from LSD psychotherapy in communist Czechoslovakia to the first applications of LSD 25 in South America to the intersection of modernism and ayahuasca in China Along the way they also consider how psychedelic experiments generated their own cultural expressions where the specter of the United States may have loomed large and where colonial empires exerted influence on the local reception of psychedelics in botanical and pharmaceutical pursuits Breaking new ground by adopting perspectives that are currently lacking in the historiography of psychedelics this collection adds to the burgeoning field by offering important discussions on underexplored topics such as gender agriculture parapsychology anarchism and technological innovations

just an adaptation of the pagan winter solstice celebration **Bear** Wolf D. Gielen, Juris G. Draguns, Jefferson M. Fish, 2008-06-19 In an era of globalization characterized by widespread migration and cultural contacts psychologists counselors and other mental health professionals face a unique challenge how does one practice successfully when working with clients from so many different backgrounds Gielen Draguns and Fish argue that an understanding of the general principles of multicultural counseling is of great importance to all practitioners The lack of this knowledge can have several negative consequences during therapy including differences in expectations between counselor and client misdiagnosis of the client's concerns missed non verbal cues and the client feeling that she has been misunderstood This volume focuses on the general nature of cultural influences in counseling rather than on counseling specific ethnic groups Counseling practices from all over the world not just those of Western society are explored Bringing together the work of a diverse group of international experts the editors have compiled a volume that is not only concise and teachable but also an essential guidebook for all mental health professionals
