Longman Language Activation Dictionary:

Established corpus linguistic methods such as concordancing and textual statistics are increasingly being complemented by visualization and geolocation of digital language data. Empirically there is a growing need to document and analyse what people do with language in the increasingly technologized communicative ecology of the 21st century.

Language and Computers Studies in Digital Linguistics invites contributions which explore innovative intelligent and creative ways of using digital language data resources and infrastructure for linguistic description. Contributions that contribute to the development and refinement of usage based models in linguistics using both quantitative and qualitative methods analyse all aspects of digitally mediated communication from orthography to pragmatics and sociolinguistics.

Recent Advances in Natural Language Processing Ruslan Mitkov, Nicolas Nicolov, 1997-01-01 This volume is based on contributions from the First International Conference on Recent Advances in Natural Language Processing RANLP 95 held in Tzigov Chark Bulgaria 14-16 September 1995. This conference was one of the most important and competitively reviewed conferences in Natural Language Processing NLP for 1995 with submissions from more than 30 countries. Of the 48 papers presented at RANLP 95 the best revised papers have been selected for this book in the hope that they reflect the most significant and promising trends and latest successful results in NLP. The book is organised thematically and the contributions are grouped according to the traditional topics found in NLP: morphology, syntax, grammars, parsing, semantics, discourse, grammars, generation, machine translation, corpus processing and multimedia. To help the reader find his/her way the authors have prepared an extensive index which contains major terms used in NLP, an index of authors which lists the names of the authors and the page numbers of their papers, a list of figures and a list of tables. This book will be of interest to researchers, lecturers and graduate students interested in Natural Language Processing and more specifically to those who work in Computational Linguistics, Corpus Linguistics and Machine Translation.

Language, Discourse and Translation in the West and Middle East Robert de Beaugrande, Abdullah Shunnaq, Mohamed Helmy Heliel, 1994-10-20 The papers collected in this volume are a selection of papers presented at a conference on Language and Translation Irbid Jordan 1992. In their revised form they offer comparisons between Western and Arabic language usage and transfer. The articles bring together linguistic and cultural aspects in translation in a functional discourse framework set out in Part One. Theory Culture Ideology. Part Two addresses aspects for comparisons among translations and their cultural contexts: equivalence, stylistics and paragraphing. Part Three features Arabic-English language contact specifically in technical writing, the media and academia. Part Four deals with problems in lexicography and grammar terminology: verb-particle combinations and semantic diversity of radical doubling forms and includes a proposal for a new approach to English-Arabic dictionaries. Part Five turns to issues of interest to language teachers with practical proposals and demonstrations. Part Six deals with geopolitical factors linking the West and Middle East focusing on equality in communication and exchange of information.
