Digging Holes in Popular Culture Miles Russell, 2002 What would Howard Carter have thought of Lara Croft and why do archaeologists feature so prominently in Star Trek Douglas Adams author of Hitchhiker s Guide to the Galaxy writes the preface to this unusual collection of papers dedicated to exploring the role of the archaeologist in popular culture The clichés and stereotypes of archaeology that abound in popular culture the sense of mystery and adventure the excitement generated by a dangerous treasure hunt or a thrilling detective story rarely hint at the monotonous hours spent by modern archaeologists researching in laboratories and libraries and filling out paperwork Yet the role models provided by fictional characters such as Dr Who Indiana Jones Captain Jean Luc Picard and Lara Croft have had a powerful influence on how archaeologists and the practices of archaeology are viewed by the general public At times hilarious these papers nevertheless address serious cultural issues relevant to archaeology today colonialism the indigenous voice gender roles objectivity and ownership of the past

Science, Culture and the Search for Life on Other Worlds John W. Traphagan, 2016-08-26 This book explores humanity s thoughts and ideas about extraterrestrial life paying close attention to the ways science and culture interact with one another to create a context of imagination and discovery related to life on other worlds Despite the recent explosion in our knowledge of other planets and the seeming era of discovery in which we live to date we have found no concrete evidence that we are not alone Our thinking about life on other worlds has been and remains the product of a combination of scientific investigation and human imagination shaped by cultural values particularly values of exploration and discovery connected to American society The rapid growth in our awareness of other worlds makes this a crucial moment to think about and assess the influence of cultural values on the scientific search for extraterrestrial life Here the author considers the junction of science and culture with a focus on two main themes 1 the underlying assumptions many of which are tacitly based upon cultural values common in American society that have shaped the ways researchers in astrobiology and SETI have conceptualized the nature of their endeavor and represented ideas about the potential influence contact might have on

human civilization and 2 the empirical evidence we can access as a way of thinking about the social impact that contact with alien intelligence might have for humanity

The Psychology of Public Belief in Unexplained Phenomena Barrie Gunter, 2025-12-19 This groundbreaking book explores the fascinating psychology behind public beliefs in extraterrestrial visitors and UFOs unidentified flying objects now often termed Unidentified Aerial Phenomena Drawing on extensive opinion polls and academic research data from around the world Barrie Gunter delves into the complex psychological processes that shape our interpretations of ambiguous experiences The analysis reveals how psychological factors profoundly influence our beliefs about extraterrestrial life The book explores how an individual's religious and paranormal beliefs internalised cultural narratives personality characteristics and cognitive biases create frameworks through which they process and recall unexplained phenomena The book also investigates how these psychological predispositions affect responses to government secrecy potentially fuelling conspiracy theories about extraterrestrial activity Neither dismissing unexplainable occurrences as bogus nor accepting them at face value this nuanced exploration illuminates the crucial role of social and cognitive psychology in understanding why certain beliefs take hold It fills a significant gap in current literature offering valuable insights for students and scholars of cognitive social and para psychology interested in the psychological underpinnings of extraterrestrial beliefs

Journal of the West Lorrin L. Morrison, Carroll Spear Morrison, 1993

Psychology Serving Humanity: Proceedings of the 30th International Congress of Psychology Saths Cooper, Kopano Ratele, 2014-06-27 This is the second of two volumes collecting the key proceedings of the 30th International Congress of Psychology the first to be held in Africa in the 123 years of its history The theme of the conference was Psychology Serving Humanity a recognition of psychology's unfulfilled mission in the majority world and a reflection of what that world requires from psychology Mainstream Psychology finds its largest number of exponents and leading personalities in the high income countries of the global West The Other Psychologies referred to by different names are scattered across the rest of the world Some of the names of these other forms of Psychology include indigenous Psychology The main driver of indigenous and other forms of non mainstream Psychology is the endeavour to embed the discipline in the dynamics of local societies Psychology has entered an interesting era however While the dominant philosophy underpinning the discipline remains Western Psychology in the majority world in 2000s may have reached a tipping point It took over a hundred years but the

2004 and 2012 International Congresses of Psychology held in China and South Africa heralded a newfound possibility for the discipline. There is an opening of the field to potentially new thought and forms of the practice of Psychology. These proceedings are published in the hope that all psychologists especially those located in well resourced institutions in the West confront the divided reality that characterizes Psychology so as to creatively consider the opportunity opened up by the growing field at the peripheries. Care was taken when assembling both conference and proceedings to ensure that the entire international psychological community was represented. Volume One contains contributions to Majority World Psychology. Volume Two contains contributions to Western Psychology.

The Oxford Handbook of the Development of Imagination
 Marjorie Taylor, 2013-04-02 Children are widely celebrated for their imaginations but developmental research on this topic has often been fragmented or narrowly focused on fantasy. However, there is growing appreciation for the role that imagination plays in cognitive and emotional development as well as its link with children's understanding of the real world. With their imaginations, children mentally transcend time, place, and/or circumstance to think about what might have been, plan and anticipate the future, create fictional relationships and worlds, and consider alternatives to the actual experiences of their lives. *The Oxford Handbook of the Development of Imagination* provides a comprehensive overview of this broad new perspective by bringing together leading researchers whose findings are moving the study of imagination from the margins of mainstream psychology to a central role in current efforts to understand human thought. The topics covered include fantasy, reality distinctions, pretend play, magical thinking, narrative, anthropomorphism, counterfactual reasoning, mental time travel, creativity, paracosms, imaginary companions, imagination in non-human animals, the evolution of imagination, autism, dissociation, and the capacity to derive real-life resilience from imaginative experiences. Many of the chapters include discussions of the educational, clinical, and legal implications of the research findings, and special attention is given to suggestions for future research.

The UFO Invasion Kendrick Frazier, Barry Karr, Joe Nickell, 2023-10-17 UFOs and space aliens are visiting Earth. Now it's time to get the facts. Did a flying saucer really crash near Roswell, New Mexico, in 1947, and have we been victims of a sinister government conspiracy to hide its alien occupants in a secret facility? Is there truth behind the swirled crops phenomenon? Have humans been abducted by aliens? In an effort to counter media misinformation, *The UFO Invasion* offers definitive behind-the-scenes accounts of each case of extraterrestrial visitations and paranormal claims. This fully documented look at sightings encounters the Roswell incident, MJ-12 documents, crop circles, the alien autopsy, and more, will challenge, illuminate, anger, and amuse. Included are revealing articles by Robert A. Baker, Robert E. Bartholomew, Joseph A. Bauer, William B. Blake, Robyn M. Dawes, C. Eugene Emery, Zen Faulkes, John F. Fischer, Kingston A. George Jr., Philip J. Klass, Joe Nickell, James E. Oberg, Peter J. Reeve, Ian Ridpath, Robert Sheaffer, Armando Simon, Lloyd Stires, Trey Stokes, Dave Thomas, Richard L. Weaver, Col. USAF Jeff Wells, and Robert P. Young. Also, SETI coordinator Thomas P. McDonough ponders searching for extraterrestrial intelligence.
