The Volitional Theory of Causation W. J. Mander, 2023-01-10 This book presents a history of the volitional theory of causation the philosophical proposal that volition or will of the same or broadly the same stamp as that which we experience in our own deliberate and voluntary doings should be taken as the basis for all causality Few today know much about the volitional theory of causation and even fewer have given it any serious attention But if current opinion regards this suggestion as an unusual one of minor importance the historical record shows otherwise revealing that it is a theory which has been proposed and developed again and again throughout the modern era Its obscurity is only a recent phenomenon Starting at the beginning of the Early Modern period and progressing right up the modern times the historical discussion takes in both supporters and critics as well as both famous and less well known figures to tell the story of a long running debate which contemporary history of philosophy has forgotten The principal figures discussed are Berkeley Hume Reid Maine de Biran Schopenhauer Mansel Mill Martineau Alexander Campbell Fraser Borden Parker Bowne and G F Stout although many other philosophers are also considered The book ends with a consider of the philosophical merits of the theory **The Husserlian Mind** Hanne Jacobs, 2021-07-20 Edmund Husserl 1859 1938 is widely regarded as the principal founder of phenomenology one of the most important movements in twentieth century philosophy His work inspired subsequent figures such as Martin Heidegger his most renowned pupil as well as Jean Paul Sartre and Maurice Merleau Ponty all of whom engaged with and developed his insights in significant ways His work on fundamental problems such as intentionality consciousness and subjectivity continues to animate philosophical research and argument The Husserlian Mind is an outstanding reference source to the full range of Husserl's philosophy Forty chapters by a team of international contributors are divided into seven clear parts covering the following areas major works phenomenological method phenomenology of consciousness epistemology ethics and social and political philosophy philosophy of science metaphysics Contained in these sections are chapters on many of the key aspects of Husserl's thought including intentionality transcendental philosophy reduction perception time self and subjectivity personhood logic psychology ontology and idealism

Offering an unparalleled guide to the enormous range of his thought The Husserlian Mind is essential reading for students and scholars of Husserl phenomenology and the history of twentieth century philosophy It will also be of interest to those in related fields in the humanities social sciences and psychology and the cognitive sciences **Lotze's System of Philosophy**

Santinello,2022-03-08 This is the fourth volume of Models of the History of Philosophy a collaborative work on the history of the history of philosophy dating from the Renaissance to the end of the nineteenth century The volume covers the so called Hegelian age in which the approach to the past of philosophy is placed at the foundation of doing philosophy up to identifying with the same philosophy A philosophy which is however understood in a different way as dialectical development as hermeneutics as organic development as eclectic option as a philosophy of experience as a progressive search for truth through the repetition of errors The material is divided into four large linguistic and cultural areas the German French Italian and British It offers the detailed analysis of 10 particularly significant works of the way of conceiving and reconstructing the general history of philosophy from its origins to the contemporary age This systematic exposure is preceded and accompanied by lengthy introductions on the historical background and references to numerous other works bordering on philosophical historiography [A Review of the Systems of Ethics Founded on the Theory of Evolution](#) Cora May
